Dear Mr. Todd and other Commissioners at LURC,

I am writing to request that LURC hold a public hearing on DP4889, First Wind's proposed Bowers Mt. project.

I believe that this project will have significant adverse impact on the beautiful scenic lakes in this recreationally important area. Those lakes close in to the project, Pleasant, Junior, Shaw and Duck along with those a bit further out, Sysladobsis, Scraggly, Bottle and Keg Lakes. Please consider this and hold a public hearing on this issue,

I am resident of the state and come out to the area a couple times a year to ski in the winter and hike and swim in the summer. This is beautiful land and will be adversely affected by the Bower's Mt. project.

yours,

gabrielle wellman
