

Fire Prevention Tips

Debris Burning

- **Never burn during windy days.**
- **Burning during evening hours is safest, due to less winds, lower temperatures and higher humidity levels.**
- **Always have plenty of water on hand.**
- **Have hand tools available.**
- **Place your materials on mineral soil to reduce the chance of your fire burning deep into organic-ground materials.**
- **Burn all debris at least 100' from all flammable materials, including homes and other buildings.**
- **Never leave your fire unattended.**
- **Always double check your fire before leaving.**
