Chain pickerel	Threespine stickleback
Minnnows	Pumpkinseed sunfish
Golden shiner	American eel
Common shiner	

Physical Characteristics

Area – 10 acres	Temperatures:
	Surface - 61°F
Maximum depth – 10 feet	10 feet - 55°F

Principal fisheries: Brook trout

Milliken Mills Pond is a small impoundment located on Mill Brook. Headwater areas of Mill Brook support wild trout; however, heavy competition, predation, and marginal summer water temperatures limits any pond fishery for trout. As a result, MDIFW stocks legal-sized brook trout each spring to create a put-and-take fishery that is well utilized by local anglers.

A town-owned access site is available at the dam located off Milliken Mills Road. Most anglers fish this water from the shore, but a canoe or small boat could be carried in from the access site.

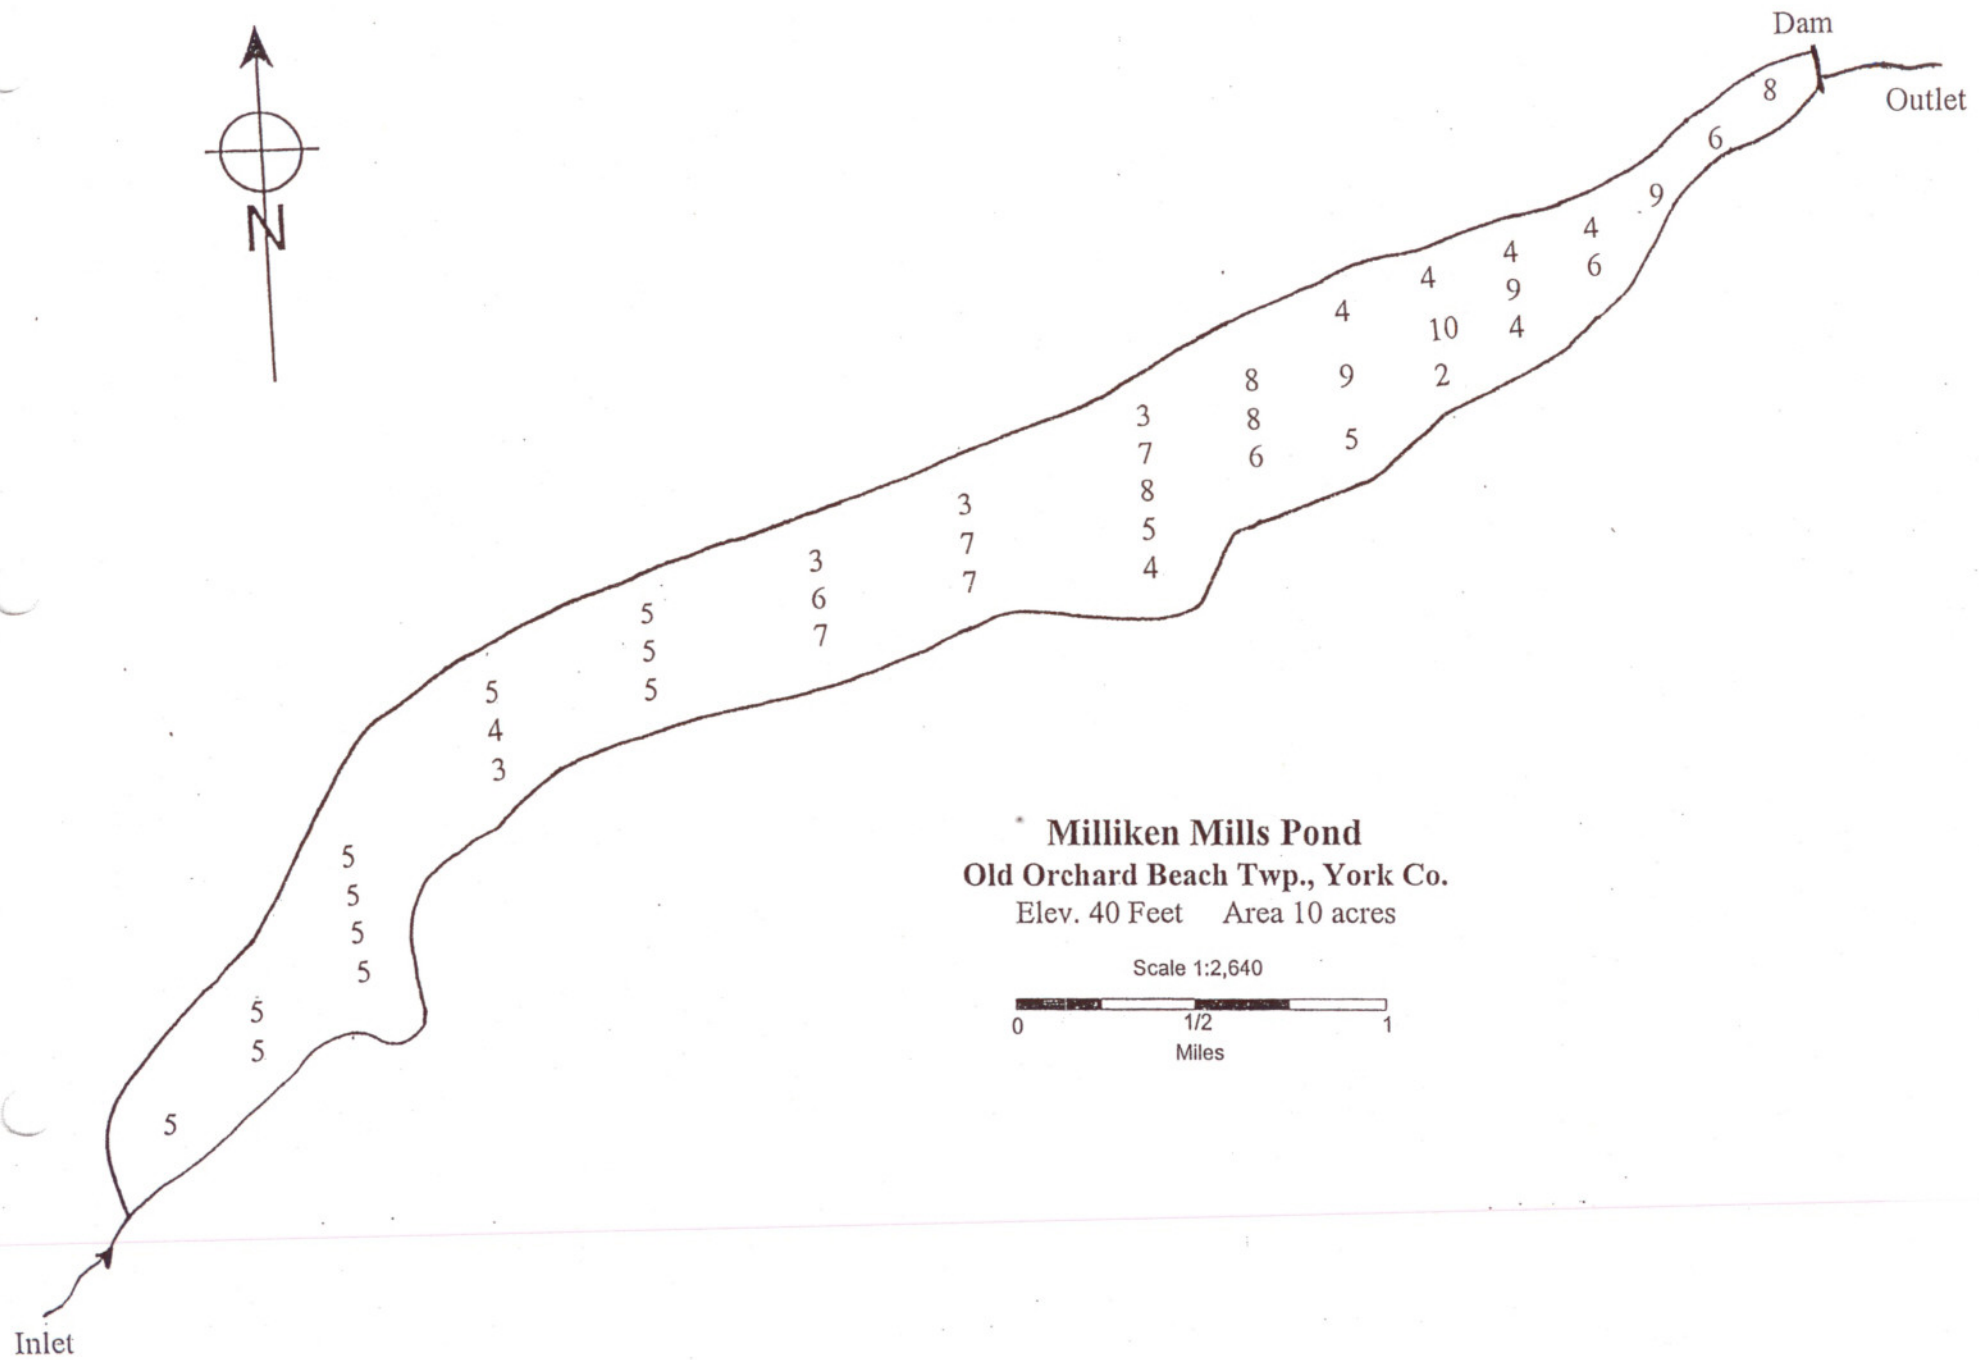

Surveyed – August 1951
