Our Guiding Principles

Guiding Principles were developed by the State of Maine to help the project team accomplish its goals in the most timely and cost-effective manner while meeting the essential requirements of the State.

- Always educate our stakeholders.

- Make our process more efficient and reduce manual labor or paper.

- Keep it simple – is it needed for go-live?

- Support the goal of standardization.

- Build a sustainable solution for users and for IT.

- Understand the why behind decisions.

- Use data elements consistently and clearly in decision-making.

- Do no harm – make things better than before.

- Build a tool that allows people to focus on strategic work.
