**Bangor Hydro**  
ELECTRIC COMPANY

May 16, 2007

Mr. Robert Batteese  
Maine Department of Agriculture  
Board of Pesticides Control  
28 State House Station  
Augusta, Me 04333-0028

Dear Mr. Batteese;

The purpose of this letter is to inform the Board of Pesticides Control that Bangor Hydro-Electric Company plans on hydraulically spraying twenty four substations located in their service territory. See attached list for substation locations.

The motorized hydraulic spraying will be conducted under a drift management plan that will be on file in Bangor Hydro's place of Business. This plan and associated spray operation will work under stringent parameters to minimize the possibility of any off sight pesticide drift. Our intent is to spray these twenty four sites hydraulically this year and all our other locations will be sprayed with non-motorized low volume backpacks sprayers. New sites may be added next year for potential hydraulic spraying. The board will be notified every year with a new list of sites that will be hydraulically sprayed. As always, Bangor Hydro will treat it's transmission R-O-W corridors using non-motorized low volume backpacks sprayers. This practice will most likely never change.

If you have any questions please feel free to contact me at (207) 973-2582 or [mlambert@bhe.com](mailto:mlambert@bhe.com).

Thank you,  

Mark Lamberton  
Manager of Line Clearance
