Chapter 60 Review Request

April 20, 2011

To: Henry Jennings  
Director, Maine Board of Pesticide Control

From: Darin Hammond  
Senior Manager of Farm Operations  
Jasper Wyman and Son

I would like to request the Maine Board of Pesticide Control review Chapter 60 4 A, the Deblois Fish Hatchery Critical Pesticide Control Area for the following reasons.

The Facts and policies section is almost completely untrue at this time.

1 (a) There is no longer a fish cultural facility at this location, and the State of Maine has sold the property to Cherryfield, Foods Inc.

1 (b) The use of this property is no longer to hatch and propagate fish, it is now used as a migrant housing facility.

1 (c) The land is surrounded by blueberry land, but there is no longer a fish hatchery at the site.

1 (f) Connors Aquaculture is no longer involved in fish propagation at this location, and there is no longer a threat to fish propagation where there is no hatchery.

We feel that this rule as it is now is burdensome, and that the facts are untrue. We ask that this section be removed from the Chapter 60 regulations.

If I can be of any assistance in this matter please let me know

Thank you,

A handwritten signature in black ink that reads "Darin Hammond". The signature is written in a cursive, flowing style.
