STATEMENT BY FIRM Kleinschmidt has provided engineering services to the water resources industry since its founding in 1966. Our services have expanded over the years in response to the changing needs of industry coming to work in harmony with the environment. In the 1980s we expanded into environmental and licensing services, and are now nationally known for this expertise, in addition to the engineering skills that have always been a hallmark of the company. In the 1990s, Kleinschmidt developed an Ecological Services Group to branch out into new areas. This group has become nationally known for ecosystem assessments, individual habitat and river restoration projects, watershed management, water supply reservoir management, dam removal, fish passage, and impact studies for wetlands. Today, Kleinschmidt has more than 130 employees and offers a depth of experience typically found in large organizations, while retaining the project control, communication, response time, flexibility, and personal attention that characterize smaller firms. Our clients' satisfaction can be measured by our long list of repeat clients, many of whom we continue to serve since 1966. We have offices nationwide and have served clients in 44 of the 50 states and in five Canadian provinces.
