STATEMENT BY FIRM Titcomb Associates was founded in 1969 by Robert P. Titcomb to provide surveying services to both the private and public sectors. Robert Titcomb established a reputation as an innovative professional committed to providing high quality surveying services to his clients; that same commitment to excellence is carried on today by his son, David E. Titcomb. Over the past 44 years Titcomb Associates has been engaged in all aspects of land surveying, including boundary location, topography, hydrography, site development, route and corridor surveys and Global Positioning System (GPS) applications. Our company's client list includes federal, state, municipal, industrial, commercial and private entities, reflecting the breadth of experience and diversity and talents that have made our company a leader in the surveying profession. Our focus at Titcomb Associates is to provide land surveying and mapping services to support other professions, i.e. engineers, architects, environmental consultants, and real estate professionals. This approach has allowed the company to concentrate its efforts and skills toward providing accurate and comprehensive spatial information on which engineers and land use professionals can rely upon. Titcomb Associates maintains offices in Falmouth and Bath, Maine. Our company currently employs three Professional Land Surveyors with over 80 years of combined experience and licenses to practice Land Surveying in Maine, New Hampshire and Vermont. The company has the resources to dispatch six field crews equipped with state-of-the-art Leica survey equipment including real-time kinematic (RTK) GPS and Robotic Total Stations. Information is processed with AutoCAD or Carlson Survey software to create a final product that is comprehensive and reliable.
