

APPENDIX C

This collection of photographs were taken between July, 1998 and August, 2004 to illustrate characteristic landscapes within 15 miles of the Redington Mountain Wind Farm. The photographs were taken under a variety of atmospheric conditions during different times of the day and year to give a comprehensive view of the study area.

Most of the photographs were taken with Nikon digital cameras, set to replicate the image created by a 'normal' lens on a 35 mm film camera. All photographs are available on CD from EEC.

All images were taken by TJD& A staff unless otherwise noted. The photographs are referenced extensively in the report, on Maps 6-1 through 6-6, and on Table 6-3, Summary of Visual Impacts.

TABLE OF CONTENTS

Bald Mountain..... 1 - 7

North and South Crocker Mountains..... 8 - 14

Appalachian Trail from Caribou Valley Road to Spaulding Mountain..... 15 - 19

Mount Abraham..... 20 - 21

Appalachian Trail from Spaulding Mountain to Poplar Ridge..... 22 - 29

Appalachian Trail from Poplar Ridge to Saddleback Junior..... 30 - 32

The Horn on Saddleback Ridge..... 33 - 34

Saddleback Mountain..... 35 - 37

Route 27 in Carrabassett Valley near the Bigelow Substation..... 38 - 41

Rangeley Lake State Park..... 42

Lakeside Park in Rangeley Village..... 43

Eustis Ridge..... 44 - 46

Flagstaff Road on the North Branch of the Dead River..... 47

The causeway over Flagstaff Lake north of Stratton..... 48
