Re: Permit By Rule Application-Stream Crossing for | Proposed Access Road for MRC-Fiberight Waste Processing and Recycling Facility | Hampden, Maine

Dear Jim:

CES is assisting the MRC with the design and permitting of a proposed solid waste processing and recycling facility in Hampden, Maine. Enclosed please find a NRPA Permit by Rule application for a stream crossing of an intermittent stream associated with this project. This submittal is included as part of a larger submittal of MDEP Permit applications including a NRPA Individual Permit Application for wetland fill, and a NRPA Permit by Rule notification for minor impacts within 250 feet of a significant vernal pool on the same road. Please see Section 5 of the NRPA for site plans.

The proposed stream crossing involves crossing an approximately 40" wide intermittent stream channel. The existing road contains an existing culvert at the crossing. Downstream the channel was widened and extended approximately 100 feet. The existing culvert will be removed and a five foot wide by three foot high box culvert will be installed to provide greater than a 1.2 times bank full width opening. This opening has been sized based on the natural stream bank-full width observed downstream of the disturbed area. Construction is expected to occur in late Summer 2016 (July 15-October 1) during periods of low water, and will adhere to all standards and conditions outlined under Section 10 of Chapter 305 – Permit by Rule Standards and the current Erosion and Sediment Control BMPS.

Please contact us if we can provide additional information or if you have any questions during the department review.

Sincerely,
CES, Inc.
