Project R101.06074.012
April 15, 2014

EXECUTIVE SUMMARY

The following report presents the findings of a Phase I Environmental Site Assessment (ESA) performed by Ransom Consulting Inc. (Ransom) for the residential apartment property located at 7 Chestnut Street in the City of Auburn, Androscoggin County, Maine (the "Site"). This Phase I ESA was performed in accordance with the requirements of ASTM International Designation: E 1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, which meets the requirements of the United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI), 40 CFR Part 312.

The purpose of this Phase I ESA was to document the environmental history of the Site, evaluate the likelihood that a release of oil and/or hazardous material (OHM) has occurred or has the potential to impact the Site, and provide our professional opinion regarding evidence of *recognized environmental conditions (RECs)* in connection with the Site. Furthermore, this Phase I ESA was performed to support and assist the Maine Department of Environmental Protection (MEDEP) Bureau of Remediation and Waste Management (BRWM) Division of Technical Services, Vapor Intrusion Investigation and Data Analysis program, as part of their ongoing vapor intrusion and indoor air quality investigation at the Site and vicinity.

The Site consists of a rectangular-shaped parcel of land, encompassing approximately 0.6 acres, located at the southeastern corner of the intersection of Chestnut Street and Webster Street in the City of Auburn. The Site is currently improved with one building (the "Site Building"), which is currently utilized as a multi-family apartment building. The Site Building is a one and two-storied structure, occupying an approximate footprint of 8,800 square feet, and constructed on concrete slab with no basement. The building is partitioned into 15 residential apartments and a shared laundry room. The Site Building has been connected to municipal water and sanitary sewer services, since its construction, and is heated by wall-mounted, natural gas-fired heaters, located in the living room area of each apartment. The northwestern and western portions of the Site consists of asphalt-paved parking areas and driveways, which are utilized by the Site tenants for automobile parking. The eastern and southeastern portions of the Site consist of overgrown vegetated/wooded areas.

Based on available information, the western portion of the Site was originally improved with two residential dwellings from circa 1873 to circa 1914. These residential dwellings were located along Webster Street (formerly Manley Street) and were identified as 45 & 47 Manley Street. A laundry facility (Everett Laundry) reportedly operated at the back of the residence at 47 Manley Street from circa 1914 to circa 1948. The residence and laundry facility were demolished and the Beal's Linen and Malo Cleaners buildings were constructed at the Site circa 1950. The residence at 45 Manley Street was reportedly demolished circa 1981 and its property was utilized as a parking lot for Beal's Linen. Malo Cleaners and Beal's Linen reported operated as dry cleaners from circa 1950 to circa 1986 and a commercial linen service also operated at the Beal's property during the same timeframe. The Malo Cleaners and Beal's Linen buildings were demolished in 1986 and the existing apartment building was constructed in 1987. The Site has been utilized as for residential apartment use, since the building's construction.

The former Beal's Linen building was reportedly constructed on a concrete slab with no basement and was partitioned into the dry cleaning/laundry facility and a three-bay garage for storage of their fleet of commercial automobiles for linen delivery service. Automotive repair and gasoline filling operations were reportedly not conducted in the Beal's Linen building or property. The northern half of the former Malo Cleaners building was reportedly constructed on a concrete slab with no basement; however, the

southern half of the building was reportedly constructed on an unfinished, earthen floor. The previous buildings were reportedly connected to municipal water and sewer.

According to the former Site owner, Mr. Dick Lecompte, the former Beal's Linen building was inferred to have been heated by a fuel oil-fired boiler, since an approximate 10,000-gallon underground storage tank (UST) containing fuel oil was encountered during the building's demolition in 1986. According to Mr. Lecompte, this UST was removed from the Site in 1986 by Clean Harbors Environmental Services (Clean Harbors) of South Portland, Maine. No information was included in MEDEP files or municipal records regarding the removal of this UST or whether a release of fuel oil was observed during its removal that would have potentially impacted soil and/or groundwater conditions at the Site; however, the former Site owner stated that he was not aware of a release of fuel oil in connection with this former UST. The former Malo Cleaner's building was reportedly heated by its dry cleaner process steam boiler; however, the fuel source (i.e., fuel oil, natural gas, etc.) was not identified during our municipal records research or by persons knowledgeable about the Site.

Properties in the Site vicinity have been developed for residential use dating back to the 1800s. The western adjoining property was improved as the Webster Street School circa 1914 and was redeveloped for residential apartments and a day care facility in 2012. The northeastern adjoining property has been utilized as a community center and park, since the 1970s. The eastern adjoining property formerly consisted of a wooded gully prior to the 1970s and has since been developed as the Chestnut Street Park. According to the City of Auburn, Gully Brook is culverted underground beneath the eastern adjoining Chestnut Street Park. This brook historically flowed in an open channel through the eastern adjoining property and was converted to an underground culvert during the 1950s. The brook reportedly discharges into the Androscoggin River near Great Falls, approximately 2,000 feet southeast of the Site. Based on field observations and Site topography, the localized shallow groundwater flow at the Site is presumed to be to the east/southeast towards Gully Brook beneath the adjoining Chestnut Street Park.

As part of Ransom's assessment of the Site, Environmental Data Resources, Inc. (EDR) conducted an environmental database search. Ransom also reviewed the MEDEP online databases. The Site was not identified on federal and state databases searched by EDR or Ransom, and no properties within a one-mile radius were identified by EDR or Ransom with documented adverse environmental conditions that are anticipated to have adversely impacted environmental conditions at the Site. This conclusion is based upon the locations of these properties, which are considered to be downgradient from the Site with respect to the inferred groundwater flow direction (southeasterly), or are located at distances that make it unlikely for these properties to have impacted environmental conditions at the Site.

From October 2013 to April 2014, MEDEP conducted preliminary sub-slab soil vapor and indoor air assessments at the Site, adjoining properties, and along the utility corridor beneath Chestnut Street to the north of the Site to evaluate the extent and exposure risk of chlorinated volatile organic compounds (CVOCs) that have likely originated from dry cleaning solvent releases at the Site. Based on the results of their investigation, elevated concentrations of CVOCs, specifically trichloroethene (TCE) and tetrachloroethene (PCE), were detected in the samples at concentrations that potentially posed a health risk to occupants of the Site Building. Based on the preliminary results, the MEDEP is proposing to conduct additional investigation activities at the Site and surrounding properties. Vapor mitigation activities (i.e., installation of a sub-slab depressurization system) are under construction in the Site Building in order to mitigate known impacts to indoor air quality from vapor intrusion of CVOCs likely originating from historic dry cleaning solvent releases at the Site. MEDEP has assigned Remediation ID: 02284 (Beal's Linen) to this investigation.

In conformance with the scope and limitations of ASTM International Standard Practice E 1527-13 and US EPA AAI (40 CFR Part 312), Ransom has completed a Phase I ESA for the Site identified by the City of Auburn Assessor's Office as Block 335 on Tax Map 250, which corresponds to 7 Chestnut Street, City of Auburn, Androscoggin County, Maine. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report. Based on the information obtained during this Phase I ESA, Ransom has identified the following *recognized environmental condition (REC)* in connection with the Site: MEDEP's ongoing vapor intrusion and indoor air quality investigation at the Site and vicinity have identified CVOC-impacted indoor air in the Site Building and impacted soil vapor at the Site and vicinity likely originating from historic dry cleaning solvent releases at the Site. Elevated concentrations of CVOCs have been detected in the indoor air of the Site Building that potentially pose a health risk to occupants of the building.

In addition to the *REC* identified above, the former 10,000-gallon fuel oil UST that was removed from the Site in 1986 was identified as an environmental concern during this Phase I ESA. This assertion is based on potential unknown or unreported fuel oil releases associated with this former UST, since no documentation was provided to Ransom by persons knowledgeable about the Site or during our municipal research and state and federal environmental database review indicating whether soil or groundwater conditions were assessed during the UST removal activities.

Based on the findings of this assessment, it is Ransom's opinion that historic dry cleaning operations at the Site, have impacted indoor air in the Site Building and soil vapor conditions at the Site and vicinity. It is Ransom's opinion that additional investigation is warranted and recommended to address the above-stated *REC*, further document current conditions at the Site and vicinity in relation to current regulatory cleanup and/or risk-based guidelines. Vapor mitigation activities (i.e., installation of a sub-slab depressurization system) are recommended and warranted for the Site Building in order to mitigate known impacts to indoor air quality from vapor intrusion of CVOCs likely originating from dry cleaning solvent releases at the Site.

Ransom also recommends that a Remedial Investigation Work Plan should be prepared and a subsurface investigation be performed to evaluate current soil, groundwater, and soil vapor conditions at the Site and vicinity. Findings from the additional investigation(s) should be used to evaluate potential health and environmental risks and identify whether additional remediation or mitigation measures are necessary to eliminate these potential health and environmental risks.

This summary does not contain all the information that is found in the full report. The report should be read in its entirety to obtain a more complete understanding of the information provided and to aid in decisions made or actions taken based on this information.

1.0 INTRODUCTION

The following report presents the findings of a Phase I Environmental Site Assessment (ESA) performed by Ransom Consulting Inc. (Ransom) for the property located at 7 Chestnut Street in the City of Auburn, Androscoggin County, Maine (the "Site"). The Phase I ESA was prepared for the Maine Department of Environmental Protection (MEDEP) Bureau of Remediation and Waste Management (BRWM) Division of Technical Services, Vapor Intrusion Investigation and Data Analysis program, as part of their ongoing vapor intrusion and indoor air quality investigation at the Site and vicinity.

Please refer to the appended Figure 1, Site Location Map, to view the general location of the Site on a 7.5-minute topographic quadrangle.

1.1 PURPOSE

The purpose of this Phase I ESA was to assess the environmental condition of the Site by performing "all appropriate inquiry" into the previous ownership and uses of the Site consistent with good commercial or customary practice, taking into account commonly known and reasonably ascertainable information. The goal of the assessment was to identify "recognized environmental conditions" (RECs) in connection with the Site. The term RECs means:

The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

The term REC includes both controlled RECs (CRECs) and historical RECs (HRECs) as further defined below:

The term CRECs means:

A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

The term HRECs means:

A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

By performing a Phase I ESA of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C. §9601) and petroleum products, a user satisfies one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability.

1.2 SCOPE OF WORK

This Phase I ESA was performed in general accordance with the requirements of the American Society for Testing and Materials International Designation: E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, 2013 (ASTM E1527-13), USEPA All Appropriate Inquiry (AAI), 40 CFR Part 312, and our MEDEP Agreement to Purchase Services Contract No. 20120515*4932, dated May 1, 2012, and included the completion of the following tasks:

1. Review municipal records and search state and federal environmental databases for sites or conditions of environmental concern;
2. Review historical land use records to evaluate past use of the Site and adjoining properties;
3. Perform a site reconnaissance to visually and/or physically observe current conditions of the Site and the general land use of surrounding properties; and
4. Conduct interviews with readily available past and present owners, operators, and occupants of the Site.

1.3 SIGNIFICANT ASSUMPTIONS

No significant assumptions were made during the performance of this Phase I ESA.

1.4 LIMITATIONS, EXCEPTIONS, DEVIATIONS AND DATA GAPS

Along with the limitations set forth in various sections of the ASTM E 1527-13 protocol, the accuracy and completeness of this report is limited by the following:

1. Access Limitations: None
2. Physical Obstructions to Observations: None
3. Outstanding Information Requests: None
4. Historical Data Source Failure: Reasonably ascertainable historical information sources researched in this assessment allowed uses of the property to be traced from the present back to 1873, at which time the western portion of the Site appeared to be developed for residential purposes. Since the Site history could not be traced back to pre-development, this constitutes historical data failure according to the review requirements of ASTM E 1527-13. However, as the Site was reportedly residential from the late 1800s to the early 1900s, this historical data failure does not appear to represent a significant data gap that warrants additional research or assessment.
5. Exceptions: None
6. Deviations: None
7. Data Gaps: None

8. Other: None

The findings provided by Ransom in this report are based solely on the information reported in this document. Should additional information become available in the future, this information should be reviewed by Ransom and the findings presented herein may be modified. Information obtained from state and local agencies is not necessarily all-inclusive and that files may have been reviewed and purged by officials prior to review by the public.

1.5 SPECIAL TERMS AND CONDITIONS

This Phase I ESA was conducted in accordance with our executed contract with the MEDEP, dated May 15, 2012. Authorization was provided in writing by the MEDEP, as described above, and site access was coordinated through the Site owner, Mr. Joseph Dunne, who provided an explanation of the Site and facilities to be assessed.

1.6 USER RELIANCE

This report was prepared for the MEDEP, and therefore, is a public document. However, the services, findings, and conclusions, noted herein, and associated documents provided to the client by Ransom are solely for the benefit of the MEDEP, their affiliates and subsidiaries and their successors, assigns, and grantees. Other than for public informational purposes, reliance or any use of this report by anyone other than the MEDEP, for whom it was prepared, is prohibited. Reliance or use by any such third party, without explicit authorization in the report or reliance letter, does not make said third party a third party beneficiary to Ransom's contract with the MEDEP. Any such unauthorized reliance on or use of this report, including any of its information or conclusions, will be at the third party's risk. For the same reasons, no warranties or representations, expressed or implied in this report, are made to any such third party.

2.0 SITE DESCRIPTION

2.1 LOCATION AND LEGAL DESCRIPTION

The Site consists of a rectangular-shaped parcel of land, encompassing approximately 0.6 acres, located at the southeastern corner of the intersection of Chestnut Street and Webster Street in the City of Auburn, Androscoggin County, Maine. The Site is identified by the City of Auburn Assessor's Office as Block 335 on Tax Map 250, which corresponds to 7 Chestnut Street.

Please refer to the appended Figure 2, Site Plan, for the layout of the Site and adjoining properties.

2.2 SITE AND VICINITY CHARACTERISTICS

The Site is located in a mixed residential and municipal recreational park area of Auburn. The Site is bounded by Chestnut Street to the northwest, Webster Street to the southwest, residential properties to the southeast and the Chestnut Street Park (tennis and basketball courts and associated park grounds) to the east.

A photograph log is included as Appendix A.

2.3 CURRENT USE OF THE SITE

The Site is currently improved with one building (the "Site Building"), which is currently utilized as a multi-family apartment building.

2.4 DESCRIPTION OF STRUCTURES, ROADS, OTHER IMPROVEMENTS ON THE SITE

The Site Building is a one & two-storied structure, occupying an approximate footprint of 8,800 square feet constructed on concrete slab with no basement. The building is a wood-frame and vinyl-sided structure and is partitioned into 15 single-family residential apartments and a shared laundry room. The eastern portion of the building is a one-storied structure encompassing approximately 4,590 square-feet and is partitioned into 7 apartments (Apartments 1 through 7) and a laundry room. The western portion of the building is a two-storied structure encompassing approximately 4,210 square-feet and is partitioned into 8 apartments (Apartments 8 through 15). Apartments 8, 9, 12, and 13 are located on the ground level and Apartments 10, 11, 14, and 15 are located on the second floor. The apartments at the eastern portion of the building are accessed from the outside through exterior doors and the apartments at the western portion of the building are accessed through common hallway corridors.

The northwestern and western portions and of the Site consists of asphalt-paved parking areas and driveways, which are utilized by the Site tenants for automobile parking. The eastern and southeastern portions of the Site consist of overgrown vegetated/wooded areas.

Utilities

The Site Building is serviced with municipal water and sanitary sewer services, provided by the City of Auburn. Electricity is provided by Central Maine Power Company (CMP). Each apartment is heated by a wall-mounted, natural gas-fired heater, located in the living room area of each apartment. Natural gas is provided by Unitil Corporation (Unitil).

Please refer to the appended Site Plan (Figure 2) for the location of key site features.

2.5 CURRENT USES OF ADJOINING PROPERTIES

As part of Ransom's reconnaissance, observations were made of adjoining properties from the Site or public right-of-ways. Observations included current use of adjoining properties and potential visible evidence of environmental impacts.

As discussed in Section 4.4.1, topography in the Site vicinity appears to slope downward in a general southeasterly direction. Therefore, properties to the northwest in the Site vicinity are inferred to be upgradient of the Site. Properties to the southeast of the Site are inferred to be downgradient of the Site, and properties to the northeast and southwest in the Site vicinity are inferred to be crossgradient of the Site.

1. Northwest: Chestnut Street, beyond which are residential properties (14 & 16 Chestnut Street). These properties are unlikely to adversely impact environmental conditions at the Site, since no adverse environmental conditions were identified at these properties during our reconnaissance or reported during our review of municipal records and federal and state environmental databases.
2. North: Chestnut Street, beyond which are the City of Auburn's Police Activities League (PAL) community center/park (24 Chestnut Street). This property is unlikely to adversely impact environmental conditions at the Site, since no adverse environmental conditions were identified at this property during our reconnaissance or reported during our review of municipal records and federal and state environmental databases.
3. East: Chestnut Street Park. This property is unlikely to adversely impact environmental conditions at the Site, since no adverse environmental conditions were identified at this property during our reconnaissance or reported during our review of municipal records and federal and state environmental databases.
4. South: Residential properties (37 Webster Street & 12 Bearce Street). These properties are unlikely to adversely impact environmental conditions at the Site, since no adverse environmental conditions were identified at these properties during our reconnaissance or reported during our review of municipal records and federal and state environmental databases.
5. West: Webster Street, beyond which is the Webster School Apartments (95 Hampshire Street). As discussed in Section 4.7, this adjoining property is not anticipated to adversely impact environmental conditions at the Site, based on its former school use and reported environmental activities conducted during redevelopment of the property for multi-tenant residential use with oversight/guidance by the MEDEP's Voluntary Response Action Program (VRAP).

3.0 USER-PROVIDED INFORMATION

An ASTM User Questionnaire, completed by Ms. Becky Blais, Environmental Specialist III for the MEDEP, is included in Appendix C as Supplemental Documentation.

3.1 TITLE RECORDS

No title records in connection with the Site were provided by the MEDEP. No environmental liens or activity/use restrictions regarding the Site were identified in the title records provided by the Site owner or by Ransom during our chain-of-title research at the Androscoggin County Registry of Deeds.

3.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS (AULS)

No environmental liens or activity/use restrictions in connection with the Site were identified by the MEDEP.

3.3 SPECIALIZED KNOWLEDGE

Specialized knowledge in connection with the Site, including the property's former use as a dry cleaner and their ongoing vapor intrusion and indoor air quality investigation at the Site and vicinity, was provided by the MEDEP and discussed throughout this report.

3.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

It is Ransom's understanding that the MEDEP has provided Ransom with commonly known or reasonably ascertainable information pertinent to recognized environmental conditions in connection with the Site.

3.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

MEDEP did not identify a reduction in the purchase price, as compared to the fair market value, that was due to the Site being impacted by hazardous substances or petroleum products.

3.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

It is Ransom's understanding that the current Site owner, Mr. Joseph Dunne, has provided Ransom with available information pertinent to recognized environmental conditions in connection with the Site.

3.7 REASON FOR PERFORMING PHASE I ESA

This Phase I ESA was performed to support the MEDEP's environmental due diligence of the Site, as part of their ongoing vapor intrusion and indoor air quality investigation at the Site and vicinity.

3.8 PREVIOUS ENVIRONMENTAL REPORTS

No previous environmental reports in connection with the Site were provided by the MEDEP or the Site owner with the exception of sampling results of MEDEP's ongoing vapor intrusion and indoor air quality investigation at the Site and vicinity.

4.0 RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

Ransom contracted Environmental Data Resources, Inc. (EDR) to conduct a search of federal and state databases containing known and suspected sites of environmental contamination. The number of listed sites identified within the approximate minimum search distance (AMSD) from the federal and state environmental records database listings specified in ASTM E 1527-13 are summarized in the following table. Detailed information for sites identified within the AMSDs is provided in Sections 4.1.1 and 4.1.2, along with an opinion about the significance of the listing to the analysis of RECs in connection with the Site. A copy of the EDR research data and descriptions of the databases is included in Appendix B of this report.

DATABASE RECORD	AMSD (Miles)	Total Sites Found	On Subject Property	On Adjoining Property
Federal NPL List	1	0	No	No
Federal Delisted NPL List	0.5	0	No	No
Federal CERCLIS List	0.5	0	No	No
Federal CERC-NFRAP List	0.5	0	No	No
Federal RCRA CORRACTS Facilities List	1	0	No	No
Federal RCRA Non-CORRACTS TSD Facilities List	0.5	0	No	No
Federal RCRA Generators List	Property and Adjoining	0	No	No
Federal Institutional/Engineering Controls Registries	0.5	0	No	No
Federal ERNS List	Property Only	0	No	No
State-Equivalent NPL List	1	0	No	No
State-Equivalent CERCLIS/SHWS List or Delisted SHWS	0.5	1	No	No
State Landfill and/or Solid Waste Disposal Site List	0.5	0	No	No
State Leaking AST List	0.5	28	No	No
State Registered AST List	Property and Adjoining	0	No	No
State Leaking UST List	0.5	31	No	No
State Registered UST List	Property and Adjoining	1	No	Yes
State Institutional/Engineering Controls Registries	Property Only	0	No	No
State Voluntary Cleanup Sites	0.5	8	No	Yes
Brownfield Sites	0.5	4	No	Yes

The following presents a discussion of pertinent surrounding properties identified within the databases outlined above. Discussions have not been included for databases in which no properties were identified, or for properties which were determined not to represent a threat to the environmental condition of the Site, based on their location with respect to the Site, or the significance of the environmental concern represented by the identified property.

4.1.1 Site

The Site was not identified on any state or federal environmental databases searched by EDR.

4.1.2 Discussion of Database Findings

State Equivalent CERCLIS/Hazardous Waste Sites/ALLSITES

EDR identified 1 State Equivalent CERCLIS/State Hazardous Waste Sites (SHWS) and/or ALLSITES property (John's Cleaners; 355 Main Street in Lewiston), which is located approximately 1 mile east of the Site. This property is not anticipated to have adversely impacted environmental conditions at the Site, due to its distance and location across the Androscoggin River from the Site.

State LAST Sites

EDR identified 28 State Leaking Aboveground Storage Tank (LAST) properties within 0.5 miles of the Site; however, these properties are not anticipated to have adversely impacted environmental conditions at the Site, since they have been properly investigated and/or remediated with prior MEDEP oversight/guidance, or are located in positions and/or at distances that are unlikely to have adversely impacted the Site.

State LUST Sites

EDR identified 31 State Leaking Underground Storage Tank (LUST) properties within 0.5 miles of the Site; however, these properties are not anticipated to have adversely impacted environmental conditions at the Site, since they have been properly investigated and/or remediated with prior MEDEP oversight/guidance, or are located in positions and/or at distances that are unlikely to have adversely impacted the Site.

State Registered UST Sites

The western adjoining property (Webster School Apartments; 95 Hampshire Street) was identified by EDR as a State Registered Underground Storage Tank (UST) property. As discussed in Section 4.2.1, the former, removed fuel oil UST at this property is not anticipated to have adversely impacted environmental conditions at the Site, since it was previously removed with MEDEP oversight/guidance and was located on the property at a distance that is unlikely to have adversely impacted the Site.

State Voluntary Cleanup Sites

The western adjoining property (Webster School Apartments; 95 Hampshire Street) was identified by EDR as a State VRAP property. As discussed in Section 4.2.1, this property is not anticipated to have adversely impacted environmental conditions at the Site, since it has been properly investigated with

MEDEP and USEPA oversight/guidance in accordance with MEDEP's VRAP and USEPA's Brownfields program.

EDR identified 7 additional State VRAP properties within 0.5 miles of the Site; however, these properties are not anticipated to have adversely impacted environmental conditions at the Site, since they have been properly investigated and/or remediated with prior MEDEP and/or USEPA oversight/guidance and are located at distances that are unlikely to have adversely impacted the Site.

Brownfield Sites

The western adjoining property (Webster School Apartments; 95 Hampshire Street) was identified by EDR as a Federal Brownfields property. As discussed in Section 4.2.1, this property is not anticipated to have adversely impacted environmental conditions at the Site, since it has been properly investigated with MEDEP and USEPA oversight/guidance in accordance with MEDEP's VRAP and USEPA's Brownfields program.

EDR identified 3 additional Federal and/or State Brownfield properties within 0.5 miles of the Site; however, these properties are not anticipated to have adversely impacted environmental conditions at the Site, since they have been properly investigated and/or remediated with prior MEDEP and/or USEPA oversight/guidance and are located at distances that are unlikely to have adversely impacted the Site.

Orphan Sites

EDR orphan site designation indicates insufficient address information for the site to be plotted. Ransom reviewed the 19 Orphan Sites identified by EDR and determined that they are located at positions considered to be crossgradient/downgradient from the Site, or are beyond the applicable ASTM search parameters, and therefore, are unlikely to impact the Site.

4.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

4.2.1 State Regulatory Agency File Review

Ransom reviewed the following MEDEP online databases for information pertaining to the Site and/or properties in the vicinity of the Site with known and/or suspected environmental contamination and their potential to adversely impact environmental conditions at the Site.

1. "Division of Remediation Sites List" (MEDEP "Sites List") online database;
2. "Non-Conforming Tanks" online database;
3. "Registered Underground Oil Storage Tanks" online database;
4. "Active and Out of Service Underground Oil Storage Tanks Including Tanks That Have Not Been Properly Abandoned" online database; and
5. "Oil Storage Tank Search & Operator Training" online database;
6. "Hazardous and Oil Spill" online database.

Webster School Apartments: 95 Hampshire Street

The western adjoining Webster School Apartments were identified on the “MEDEP Sites List,” “Registered Underground Oil Storage Tanks,” and “Hazardous and Oil Spill” online databases. This property was redeveloped for apartment and day care facility reuse from circa 2010 to 2012 with environmental oversight activities conducted as part of the MEDEP’s and USEPA’s Brownfields Program and MEDEP’s VRAP (REM #01906); and therefore, this property is not anticipated to have adversely impacted environmental conditions at the Site.

The online databases did not identify any additional properties with known and/or suspected environmental contamination that are anticipated to adversely impact environmental conditions at the Site.

4.2.2 Local Regulatory Agency File Review

Assessor’s Office

Information provided by the City of Auburn Assessor’s Office included a current property card and historic property cards (assessed from 1951 to 2013) for the Site. According to the Assessor’s Office, the Site consisted of three lots (Parcel#:s: 8-2-30, 8-2-31 & 8-2-32) prior to 1986. Information provided by the property cards regarding the Site history coincided with information discussed in Section 4.5 of this report. The property cards did not include information pertaining to underground or aboveground storage tanks, hazardous waste storage, and/or adverse environmental conditions at the Site other than the Site’s former use as drycleaning/laundromat facilities (Beal’s Linen/Cleaners & Malo Cleaners) from circa 1948 to 1986.

Code Enforcement and Planning Department

Information provided by the City of Auburn Code Enforcement and Planning Department included demolition permits for the former Beal’s Linen and Malo Cleaners buildings in 1985 and building permits for construction of the existing Site Building in 1986 and subsequent plumbing permits for the Site Building in 1999 and 2012. The Code Enforcement and Planning Department’s file did not include information pertaining to underground or aboveground storage tanks, hazardous waste storage, and/or adverse environmental conditions at the Site.

Fire Department

Information provided by the City of Auburn Fire Department included inspection reports for the Site from 1986 to 2012. Information provided by the Fire Department regarding the Site history coincided with information discussed in Section 4.0 of this report. The Fire Department’s file for the Site did not include any additional information pertaining to underground or aboveground storage tanks, hazardous waste storage, and/or adverse environmental conditions at the Site.

Engineering Department

The Engineering Department did not have a file for the Site; however, the department provided sewer plans for the culverted Gully Brook storm sewer system located at the western adjoining Chestnut Street Park property, which is further discussed in Section 4.4.3.

4.3 PREVIOUS INVESTIGATIONS/ASSESSMENTS

As previously discussed, this Phase I ESA was performed to support and assist the MEDEP with their environmental due diligence of the Site, as part of their ongoing vapor intrusion and indoor air quality investigation at the Site and vicinity.

From October 2013 to April 2014, MEDEP has conducted sub-slab soil vapor and indoor air assessments at the Site, adjoining properties, and along the utility corridor beneath Chestnut Street to the north of the Site. Based on the results of their investigation, elevated concentrations of chlorinated volatile organic compounds (CVOCs), specifically trichloroethene (TCE) and tetrachloroethene (PCE), were detected in the samples at concentrations that potentially posed a health risk to occupants of the Site Building. Based on preliminary results of this investigation, MEDEP may conduct additional indoor air assessments at properties in the Site vicinity. Vapor mitigation activities (i.e., installation of a sub-slab depressurization system) are under construction in the Site Building in order to mitigate known impacts to indoor air quality from vapor intrusion of CVOCs likely originating from dry cleaning solvent releases at the Site.

Ransom does not have knowledge of previous environmental investigations/assessment studies conducted at the Site other than MEDEP's ongoing vapor intrusion and indoor air quality investigation at the Site and vicinity.

4.4 PHYSICAL SETTING SOURCES

4.4.1 Topography

Based on the Lewiston, Maine USGS Quadrangle, the general elevation of the Site is approximately 190 feet above mean sea level, as referenced to the National Geodetic Vertical Datum (NGVD). The topography of the Site slopes downward to the southeast.

4.4.2 Soils/Geology

According to the 2002 Surficial Geology of the Lewiston, Maine Quadrangle, surficial soils at the eastern portion of the Site are identified as artificial fill (af) and surficial soils at the western portion of the Site are identified as braided stream alluvium (Pa). The artificial fill is composed of man-made or natural emplaced materials of nearly any composition and variable thickness and the braided stream alluvium consists of fluvially-deposited sand, silt, gravel and occasional muck on terraces. Based on information provided by the City of Auburn municipal offices, the artificial fill soils were placed along the eastern portion of the Site and properties to the east (Chestnut Street Park) and northeast (City of Auburn property) during the 1950s to fill and grade a naturally-formed gully and brook that previously existed at these properties and to facilitate construction of the municipal storm water and sanitary sewer pipes/culverts constructed beneath these adjoining properties.

According to 1983 Bedrock Geology of the Lewiston, Maine Quadrangle, bedrock at the Site is identified as the Patch Mountain Member of the Sangerville Formation (Ssp), which consists of thin-bedded, calc-silicate granofels, quartz-plagioclase-biotite granofels, and marble. Ransom did not observe bedrock outcrops at the Site or vicinity during our reconnaissance.

4.4.3 Surface Water Bodies/Floodplains

Surface water bodies were not observed at the Site; however, information provided by the City of Auburn indicates that Gully Brook is culverted underground beneath the eastern adjoining Chestnut Street Park. According to the City of Auburn, Gully Brook historically flowed in an open channel through the eastern adjoining property and was converted to an underground culvert during the 1950s. This brook reportedly originates from wetland areas located approximately 2,500 feet north of the Site. Gully Brook currently receives storm water drainage and flows as an open channel and culverted stream at various areas throughout the City of Auburn. The brook reportedly discharges into the Androscoggin River near Great Falls approximately 2,000 feet southeast of the Site. Gully Brook reportedly consisted of a combined sanitary/storm sewer system from the 1950s until the 2000s, when the City of Auburn separated the combined system, removed sanitary sewer lines from the Gully Brook culvert, and installed new sanitary sewer lines throughout the City.

Based on the Androscoggin County, Maine National Flood Insurance Program Map (Community Panel Number 23001C0326E), the Site is not located within a 100 or 500-year flood zone.

4.4.4 Hydrogeology

Based on field observations and Site topography, the localized shallow groundwater flow is presumed to be to the east/southeast towards Gully Brook. It should be noted that groundwater flow direction at the Site cannot be confirmed without the completion of a groundwater elevation survey. Shallow groundwater flow may also be influenced by underground utilities, heterogeneous subsurface soil strata, and/or other subsurface structures, which may act as preferred pathways of flow.

4.5 HISTORICAL USE INFORMATION FOR THE SITE

The history of the Site was researched to ascertain past use from the present back to the property's first developed use, or back to 1940, whichever was earlier. Reasonably ascertainable historical information sources researched in this assessment allowed uses of the Site to be traced from the present back to 1873, at which time the Site was reportedly developed for residential purposes. The following standard historical sources were reviewed by Ransom:

1. Information provided by the Site owner, Mr. Joseph Dunne; and the former Site owner, Mr. Dick Lecompte.
2. Information provided by City of Auburn officials and municipal offices.
3. Sanborn Fire Insurance Maps provided by EDR, dated 1902 to 1988 (Appendix D).
4. Historical city directories provided by EDR, dated 1961 to 2013 (Appendix B).
5. Historical topographic maps provided by EDR, dated 1908 to 1979 (Appendix D).
6. Aerial photographs provided by EDR, dated 1953 to 2011 (Appendix E).
7. Information provided by the Auburn Historical Society (dating back to 1873).

The following table presents a summary of the historical use of the Site over time.

Year(s)	Property Use and Observed Details	Reference Source
1986 to Present	Site Building- Apartments (7 Chestnut Street) <u>Note:</u> Former Malo Cleaners and Beal's Laundry/Cleaners buildings demolished in 1986 and current Site Building constructed in 1987.	Municipal Offices, Aerial Photos & Interviews
circa 1981 to circa 1986	Beal's Laundry & Cleaners (7 Chestnut Street) <u>Notes:</u> Malo Cleaners building/property sold to Beal's Cleaners in 1980. Former residence at southwestern portion of Site [45 Manley Street (currently Webster Street)] was demolished in 1981 and its land was acquired by Beal's Laundry.	Municipal offices, Interviews, Sanborn Maps, Aerial Photos & City Directories
circa 1950 to circa 1980	Beal's Laundry & Cleaners (7 Chestnut Street) Malo Cleaners (15 Chestnut Street) & Residence (45 Manley Street) <u>Notes:</u> Former residence at northwestern portion of Site [47 Manley Street (currently Webster Street)] was demolished circa 1950 and its land was acquired by Beal's Laundry. Beal's Laundry/Cleaners and Malo's Cleaners buildings constructed circa 1950.	Municipal offices, Interviews, Sanborn Maps, Aerial Photos, Topo Maps & City Directories
circa 1914 to circa 1950	Residence & Everett Laundry (47 Manley Street) & Residence (45 Manley Street) <u>Notes:</u> Everett Laundry operated in back of residence beginning circa 1914.	Interviews, Sanborn Maps & Topo Maps
circa 1873 to circa 1914	Residences (45 & 47 Manley Street)	Sanborn Maps & Historical Society

4.6 HISTORICAL USE INFORMATION FOR ADJOINING PROPERTIES

Historical uses of the adjoining properties to the Site are presented in the table below and were identified in the standard historical sources listed above during the course of researching the Site.

Year(s)	Property Use and Observed Details	Reference Source
Northeast		
circa 1873 to Present	Residential	Municipal offices, Sanborn Maps, Aerial Photos, Topo Maps & Historical Society
North		
circa 2013 to Present	City of Auburn-Police Activities League (PAL) community center and park	Municipal offices
circa 1975 to circa 2013	City of Auburn-Goff Hill community center/park	Municipal offices, Sanborn Maps, Aerial Photos & Topo Maps
Prior to circa 1975	Unimproved land <u>Notes:</u> Gully Brook culverted underneath property in the 1950s.	Municipal offices, Sanborn Maps, Aerial Photos, Topo Maps & Historical Society

Year(s)	Property Use and Observed Details	Reference Source
East		
circa 1975 to Present	City of Auburn-Chestnut Street Park	Municipal offices, Sanborn Maps, Aerial Photos & Topo Maps
Prior to circa 1975	Unimproved land <u>Notes:</u> Gully Brook culverted underneath property in the 1950s.	Municipal offices, Sanborn Maps, Aerial Photos, Topo Maps & Historical Society
South		
circa 1873 to Present	Residential	Municipal offices, Sanborn Maps, Aerial Photos, Topo Maps & Historical Society
West		
circa 2012 to Present	Webster School- apartments and day care facility	Municipal offices & Aerial Photos
circa 1914 to circa 2012	Webster School- elementary school	Municipal offices, Sanborn Maps, Aerial Photos, Topo Maps & Historical Society
Prior to circa 1914	Residential	Sanborn Maps, Topo Maps & Historical Society

4.7 CHAIN OF TITLE

According to property records reviewed at the City of Auburn Assessor's Office, the Site has been owned by Sultan Corporation (Joseph Dunne) since 2003 (Book 5488, Page 202). No environmental liens or activity/use restrictions regarding the Site were noted in the title records obtained during our research at the Androscoggin County Registry of Deeds.

5.0 SITE RECONNAISSANCE

From March 20 to April 4, 2014, Ransom conducted multiple visits to the Site concurrent with MEDEP's indoor air assessment of the Site and vicinity. Ransom was accompanied by MEDEP personnel during the Site reconnaissance. The Site owner, Mr. Joseph Dunne, was interviewed by telephone following the Site reconnaissance. A photograph log is included in Appendix A.

5.1 METHODOLOGY AND LIMITING CONDITIONS

The Site reconnaissance included observations of the property grounds for evidence of releases, or potential releases of oil and/or hazardous materials (OHM), or a material threat of releases of OHM. Weather conditions at the time of the reconnaissance ranged from 30° to 50°F.

5.2 GENERAL SITE SETTING

The Site is located in a mixed residential and municipal recreational park area of Auburn. The Site is bounded by Chestnut Street to the northwest, Webster Street to the southwest, residential properties to the southeast and the Chestnut Street Park (tennis and basketball courts and associated park grounds) to the east.

The Site is improved with one building (the "Site Building"), which is utilized as a multi-family apartment building. The building is partitioned into 15 single-family residential apartments and a shared laundry room. Seven apartments (Apartments 1 through 7) and the laundry room are located at the eastern portion of building (one-story). Eight apartments (Apartments 8 through 15) are located at the western portion of the building. Most of the apartments were occupied during our reconnaissance with the exception of Apartments 8 and 14. Apartment 8 was undergoing interior renovations (i.e., painting and woodwork) during our reconnaissance.

The northwestern and western portions and of the Site consists of asphalt-paved parking areas and driveways, which are utilized by the Site tenants for automobile parking. The eastern and southeastern portions of the Site consist of overgrown vegetated/wooded areas. The southeastern property boundaries consist of concrete block and poured-concrete foundations presumably remaining from the former Beal's Linen and Malo Dry Cleaners building. These former foundations currently serve as retaining walls for the Site property. The eastern portion of Site slopes downward steeply to the adjoining Chestnut Street Park, which is approximately 20 to 30 feet lower in elevation than the Site.

5.3 INTERIOR AND EXTERIOR OBSERVATIONS

5.3.1 Hazardous Substances and Petroleum Products

Ransom observed approximately 50 miscellaneous-sized, retail containers (i.e., less than 5-gallon) of various over-the-counter household cleaning chemicals stored on shelves and on the floors in the residential apartments of the Site Building. As previously discussed, Apartment 8 was undergoing renovations during our reconnaissance, and approximately 3 to 5 gallon pails of paint and various over-the-counter renovation caulks, primers, and adhesives were observed in this apartment. Ransom did not observe staining and/or obvious evidence of leakage, indicative of a release of OHM, in connection with these containers during our reconnaissance. No OHM was observed at exterior portions of the Site during our reconnaissance.

5.3.2 Storage Tanks

Ransom did not observe aboveground storage tanks (ASTs) or evidence of vent/fill pipes suggesting the presence of underground storage tanks (USTs) at the Site during our reconnaissance. According to persons knowledgeable about the Site, no USTs are currently in use or abandoned at the Site.

5.3.3 Odors

No strong, pungent, or noxious odors indicative of a release of OHM to the environment were noted at the Site, during our reconnaissance.

5.3.4 Pools of Liquid

Ransom did not observe pools of liquid, indicative of a release of OHM, at the Site, during our reconnaissance.

5.3.5 Drums

Ransom did not observe drums that may contain OHM at the Site during our reconnaissance.

5.3.6 Unidentified Substance Containers

Ransom observed no unidentified substance containers during the site reconnaissance.

5.3.7 Polychlorinated Biphenyls (PCBs)

Transformers

Neither pad-mounted nor pole-mounted transformers were observed on the Site during the reconnaissance.

Other

No other electrical equipment, likely to contain PCBs, was observed at the Site, during our reconnaissance.

5.4 INTERIOR OBSERVATIONS

5.4.1 Heating/Cooling

As previously stated, the apartments in the Site Building are heated by wall-mounted, natural gas-fired heaters. One heater is located in the living room area of each apartment. Central air-conditioning is not provided to the Site Building; however, window-mounted air-conditioning units are reportedly utilized by the apartments during the summer months.

5.4.2 Stains or Corrosion

No stains or corruptions, indicative of a release of OHM, were observed at the Site.

5.4.3 Drains and Sumps

One floor drain was observed in the laundry room of the Site Building, which is reportedly connected to the municipal sewer system. No other drains or sumps were observed in the Site Building, with the exception of bathroom drains and sinks, which are reportedly connected to the municipal sewer system. No staining or odors, indicative of an OHM release, were noted in connection with these drains or sinks, during our reconnaissance.

5.4.4 Other Hazardous Building Materials

Based on the age of the Site Building (constructed in 1987), it is not anticipated that asbestos-containing building materials (ACBM), lead-based paint (LBP), PCB-containing fluorescent light ballasts, and other potential universal wastes exist at the Site.

5.5 EXTERIOR OBSERVATIONS

5.5.1 Pits, Ponds or Lagoons

No pits, ponds, or lagoons reported to have been utilized for waste disposal or waste treatment purposes were observed on the Site, during our reconnaissance.

5.5.2 Stained Soil or Pavement

Neither stained soil nor stained pavement, with the exception of de minimis staining from parked cars, was observed on the Site during the site reconnaissance.

5.5.3 Stressed Vegetation

Ransom did not observe stressed vegetation, indicative of an OHM release, at the Site, during our reconnaissance.

5.5.4 Solid Waste

Municipal solid waste was observed stored on-site in trash receptacles and one dumpster. Municipal solid waste is reportedly disposed off-site by local contractors. Obvious evidence of staining and/or odors, indicative of a release of OHM, were not observed in connection with the trash receptacles or dumpster. Ransom did not observe regulated waste at the Site during our reconnaissance.

5.5.5 Waste Water

The Site Building is reportedly connected to the municipal sewer system. No strong, pungent, or noxious odors indicative of a release of OHM were noted in connection with the floor drain in the laundry room or bathroom drains and sinks inside the Site Building, during our reconnaissance.

5.5.6 Wells

As previously discussed, municipal water is currently available to the Site. Ransom did not observe groundwater monitoring, water supply wells, dry wells, irrigation wells, or injection wells at the Site.

5.5.7 Septic Systems

Neither septic systems nor cesspools were observed on the Site during the site reconnaissance.

5.5.8 Drains

One surface water drain (i.e., catch basin) is located in the asphalt-paved parking lot at the western portion of the Site. This drain is reportedly connected to the municipal storm sewer system. No staining, leakage, and/or odors, indicative of a release of OHM, were noted in connection with this catch basin during our reconnaissance. No other surface water drains (i.e., catch basins) were observed on the Site.

6.0 INTERVIEWS

Ransom interviewed the following entities/individuals in an effort to obtain information indicating potential RECs in connection with the Site.

6.1 PAST AND PRESENT SITE OWNERS

On April 1, 2014, Ransom interviewed the Site owner, Mr. Joseph Dunne. Mr. Dunne stated that he acquired the Site in 2003 and has operated the property for residential apartment use since his acquisition. Mr. Dunne stated that he is not aware of any underground or aboveground storage tanks, hazardous waste storage, and/or adverse environmental conditions at the Site or vicinity with the exception of the MEDEP's vapor intrusion and indoor air quality investigation at the Site and vicinity. Information provided by Mr. Dunne has been included throughout the pertinent sections of this report.

On April 1, 2014, Ransom interviewed the former Site owner, Mr. Dick Lecompte. Mr. Lecompte stated that he acquired the Site in 1986, demolished the Beal's Linen and Malo Cleaner's buildings, and constructed the existing apartment building in 1987. Mr. Lecompte, indicated that the former Beal's Linen building was likely heated by a fuel oil-fired boiler, since an approximate 10,000-gallon UST containing fuel oil was encountered during the building's demolition in 1986. According to Mr. Lecompte, this UST was removed from the Site in 1986 by Clean Harbors Environmental Services (Clean Harbors) of South Portland, Maine. No information was included in MEDEP files or municipal records, regarding the removal of this UST or whether a release of fuel oil was observed during its removal that would have impacted soil and/or groundwater conditions at the Site. Mr. Lecompte stated that he was not aware of a release of fuel oil in connection with this former UST.

6.2 SITE MANAGER

Information provided by the current Site owner/manager, Mr. Joseph Dunne, regarding current and historic Site uses has been included throughout the pertinent sections of this report.

6.3 SITE OCCUPANTS

Site occupants have been interviewed at various times during MEDEP's vapor intrusion and indoor air quality investigation. The Site occupants stated that they were not aware of any adverse environmental conditions at the Site or vicinity with the exception of the MEDEP's vapor intrusion and indoor air quality investigation.

6.4 LOCAL GOVERNMENT OFFICIALS

In April 2014, Ransom conducted interviews with municipal officials with the City of Auburn, regarding their knowledge of the Site and vicinity. Specifically, Ransom interviewed Mr. David O'Connell, Fire Prevention Officer; Mr. Gary Johnson, Assistant City Engineer; and Mr. Eric Cousens, Director of Planning & Permitting. These municipal officials indicated that they had no personal knowledge of underground or aboveground storage tanks, hazardous waste storage, and/or adverse environmental conditions at the Site and vicinity.

7.0 EVALUATION

7.1 FINDINGS

The Site consists of a rectangular-shaped parcel of land, encompassing approximately 0.6 acres, located at the southeastern corner of the intersection of Chestnut Street and Webster Street in the City of Auburn. The Site is currently improved with one building (the "Site Building"), which is currently utilized as a multi-family apartment building. The Site Building is a one & two-storied structure, occupying an approximate footprint of 8,800 square feet constructed on concrete slab with no basement. The building is partitioned into 15 residential apartments and a shared laundry room. The Site Building has been connected to municipal water and sanitary sewer services since its construction and is heated by wall-mounted, natural gas-fired heaters, located in the living room area of each apartment. The northwestern and western portions and of the Site consists of asphalt-paved parking areas and driveways, which are utilized by the Site tenants for automobile parking. The eastern and southeastern portions of the Site consist of overgrown vegetated/wooded areas.

Based on available information, the western portion of the Site was improved with two residential dwellings from circa 1873 to circa 1914. These residential dwellings were located along Webster Street (formerly Manley Street) and were identified as 45 & 47 Manley Street. A laundry facility (Everett Laundry) reportedly operated at the back of the residence at 47 Manley Street from circa 1914 to circa 1948. The residence and laundry facility were demolished and the Beal's Linen and Malo Cleaners buildings were constructed at the Site circa 1950. The residence at 45 Manley Street was reportedly demolished circa 1981 and its property was utilized as a parking lot for Beal's Linen. Malo Cleaners and Beal's Linen reported operated as dry cleaners from circa 1950 to circa 1986 and a commercial linen service also operated at the Beal's property. The Malo Cleaners and Beal's Linen buildings were demolished in 1986 and the existing Site Building was constructed in 1987. The Site has been utilized as for residential apartment use since the building's construction.

The Beal's Linen building was reportedly constructed on a concrete slab with no basement and was partitioned into the dry cleaning/laundry facility and a three-bay garage for storage of their fleet of commercial automobiles for linen delivery service. Automotive repair and gasoline filling operations were reportedly not conducted in the Beal's Linen building or property. The northern half of the Malo Cleaners building was reportedly constructed on a concrete slab with no basement; however, the southern half of the building was reportedly constructed on an unfinished, earthen floor. The buildings were reportedly connected to municipal water and sewer.

The Beal's Linen building was inferred to have been heated by a fuel oil-fired boiler since an approximate 10,000-gallon UST containing fuel oil was encountered during the building's demolition in 1986. No information was included in MEDEP files or municipal records regarding this UST removal or whether a release of fuel oil was observed during its removal that would have impacted soil and/or groundwater conditions at the Site. However, the former Site owner stated that he was not aware of a release of fuel oil in connection with this former UST. The Malo Cleaner's building was reportedly heated by its dry cleaner process steam boiler; however, the fuel source (i.e., fuel oil, natural gas, etc.) was not provided during our municipal records research or by persons knowledgeable about the Site.

Properties in the Site vicinity have been developed for residential use dating back to the 1800s. The western adjoining property was improved as the Webster Street School circa 1914 and was redeveloped for residential apartments and a day care facility in 2012. The northeastern adjoining property has been utilized as a community center and park since the 1970s. The eastern adjoining property consisted of a

wooded gully prior to the 1970s and has been developed as the Chestnut Street Park since the 1970s. According to the City of Auburn, Gully Brook is culverted underground beneath the eastern adjoining Chestnut Street Park. This brook historically flowed in an open channel through the eastern adjoining property and was converted underground during the 1950s. The brook reportedly discharges into the Androscoggin River near Great Falls approximately 2,000 feet southeast of the Site. Based on field observations and Site topography, the localized shallow groundwater flow at the Site is presumed to be to the east/southeast towards Gully Brook beneath the adjoining Chestnut Street Park.

The Site was not identified on federal and state databases searched by EDR or Ransom, and no properties were identified by EDR or Ransom with documented adverse environmental conditions within a one-mile radius that are anticipated to have adversely impacted environmental conditions at the Site. This conclusion is based upon the locations of these properties, which are considered to be downgradient from the Site with respect to the inferred groundwater flow direction (southeasterly), or are located at distances that make it unlikely for these properties to have impacted environmental conditions at the Site.

From October 2013 to April 2014, MEDEP has conducted sub-slab soil vapor and indoor air assessments at the Site, adjoining properties, and along of the utility corridor beneath Chestnut Street to the north of the Site. Based on the results of their investigation, elevated concentrations of CVOCs, specifically TCE and PCE, were detected at concentrations in the samples that potentially posed a health risk to occupants of the Site Building. Based on the preliminary results, the MEDEP is proposing to conduct additional investigation activities at the Site and surrounding properties. Vapor mitigation activities (i.e., installation of a sub-slab depressurization system) are under construction in the Site Building in order to mitigate known impacts to indoor air quality from vapor intrusion of CVOCs likely originating from historic dry cleaning solvent releases at the Site. MEDEP has assigned Remediation ID: 02284 (Beal's Linen) to this investigation.

7.2 CONCLUSIONS

Ransom has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM International Standard Practice E 1527-13 and US EPA AAI (40 CFR Part 312) for the Site identified by the City of Auburn Assessor's Office as Block 335 on Tax Map 250, which corresponds to 7 Chestnut Street, City of Auburn, Androscoggin County, Maine. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report.

Based on the information obtained during this Phase I ESA, Ransom has identified the following *recognized environmental condition (REC)* in connection with the Site: MEDEP's ongoing vapor intrusion and indoor air quality investigation at the Site and vicinity have identified CVOC-impacted indoor air in the Site Building and impacted soil vapor at the Site and vicinity likely originating from historic dry cleaning solvent releases at the Site. Elevated concentrations of CVOCs have been detected in the indoor air of the Site Building that potentially pose a health risk to occupants of the building.

In addition to the *REC* identified above, the former 10,000-gallon fuel oil UST that was removed from the Site in 1986 was identified as an environmental concern during this Phase I ESA. This assertion is based on potential unknown or unreported fuel oil releases associated with this former UST, since no documentation was provided to Ransom by persons knowledgeable about the Site or during our municipal research and state and federal environmental database review indicating whether soil or groundwater conditions were assessed during the UST removal activities.

7.3 OPINIONS

Based on the findings of this assessment, it is Ransom's opinion that historic dry cleaning operations at the Site have impacted indoor air in the Site Building and soil vapor conditions at the Site and vicinity. It is Ransom's opinion that additional investigation is warranted and recommended to address the above-stated REC, and further document current conditions at the Site and vicinity in relation to current regulatory cleanup and/or risk-based guidelines.

8.0 RECOMMENDATIONS

Ransom recommends that a Remedial Investigation Work Plan should be prepared and a subsurface investigation be performed to evaluate current soil, groundwater, and soil vapor conditions at the Site and vicinity. Findings from the additional investigation(s) should be used to evaluate potential health and environmental risks and identify whether additional remediation or mitigation measures are necessary to eliminate these potential health and environmental risks.

Vapor mitigation activities (i.e., installation of a sub-slab depressurization system) are recommended and warranted for the Site Building in order to mitigate known impacts to indoor air quality from vapor intrusion of CVOCs likely originating from dry cleaning solvent releases at the Site.

9.0 ADDITIONAL SERVICES AND NON-SCOPE CONSIDERATIONS

9.1 ADDITIONAL SERVICES

No additional services beyond the standard scope of services prescribed by ASTM E 1527-13 were requested by the MEDEP.

9.2 NON-SCOPE CONSIDERATIONS

The following environmental issues are outside the scope (non-scope considerations) of the standard practice defined by ASTM E 1527-13. This Phase I ESA does not identify or evaluate these non-scope considerations:

1. Asbestos-containing building materials;
2. PCBs in building materials
3. Radon;
4. Lead-based paint;
5. Lead in drinking water;
6. Wetlands;
7. Regulatory compliance;
8. Cultural and historic resources;
9. Industrial hygiene;
10. Health and safety;
11. Ecological resources;
12. Endangered species;
13. Indoor air quality;
14. High-voltage power lines;
15. Biological agents; and
16. Mold.

11.0 SIGNATURE(S) OF ENVIRONMENTAL PROFESSIONAL(S)

Environmental Professional

We declare that, to the best of our professional knowledge and belief, we meet the definition of an Environmental Professional as defined in §312.10 of 40 CFR Part 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Aaron R. Martin, C.G.
Associate Project Manager/Environmental Scientist

Eriksen P. Phenix, C.G.
Project Geologist

Peter J. Sherr, P.E.
Senior Project Manager

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/10/2013 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 09/10/2013 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

RITE AID #3467	61 UNION STREET	SSE 1/8 - 1/4 (0.144 mi.)	14	34

State- and tribal - equivalent CERCLIS

ME SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Protection's Uncontrolled Hazardous Substance Sites Program List of Investigations.

A review of the ME SHWS list, as provided by EDR, and dated 01/06/2014 has revealed that there is 1 ME SHWS site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal institutional control / engineering control registries

ME INST CONTROL: Sites with Land Use Restrictions in place.

A review of the ME INST CONTROL list, as provided by EDR, and dated 01/06/2014 has revealed that there are 7 ME INST CONTROL sites within approximately 0.5 miles of the target property.

State and tribal voluntary cleanup sites

ME VCP: A list of sites where the necessary investigation and/or remediation activities have been completed to the Department's satisfaction and the applicants to the VRAP have been issued final certification documents. The list does not include those sites that are currently participating in the VRAP but have not yet received certification.

A review of the ME VCP list, as provided by EDR, and dated 01/06/2014 has revealed that there are 8 ME VCP sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 09/24/2013 has revealed that there are 3 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

Local Lists of Hazardous waste / Contaminated Sites

ME ALLSITES: The Sites List Database is the public record of information regarding properties that have been, are now, or are planned to be addressed by the Division of Remediation of the Bureau of Remediation and Waste Management. This database is not intended to be a comprehensive, all-inclusive source of information regarding the properties listed therein.

A review of the ME ALLSITES list, as provided by EDR, and dated 01/06/2014 has revealed that there are 10 ME ALLSITES sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/10/2013 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
ANDROSCOGGIN DIE CO INC	11 SUMMER ST	E 1/8 - 1/4 (0.184 mi.)	28	53

US MINES: Mines Master Index File. The source of this database is the Dept. of Labor, Mine Safety and Health Administration.

A review of the US MINES list, as provided by EDR, and dated 08/01/2013 has revealed that there is 1 US MINES site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
G.A. PETERSON CO.		WNW 0 - 1/8 (0.063 mi.)	3	10

NY MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

A review of the NY MANIFEST list, as provided by EDR, has revealed that there is 1 NY MANIFEST site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
WEBSTER SCHOOL ASSOCIATES LP	99 HAMPSHIRE STREET	SSE 0 - 1/8 (0.118 mi.)	B9	17

ME DRYCLEANERS: A listing of drycleaning facilities that use perchloroethylene.

A review of the ME DRYCLEANERS list, as provided by EDR, and dated 12/31/2012 has revealed that there are 2 ME DRYCLEANERS sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 4 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 2 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
 Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D011
 Waste name: SILVER

Waste code: P001
 Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste code: P042
 Waste name: 1,2-BENZENEDIOL, 4-[1-HYDROXY-2-(METHYLAMINO)ETHYL]-, (R)-

Waste code: P075
 Waste name: NICOTINE, & SALTS

Waste code: P081
 Waste name: NITROGLYCERINE (R)

Violation Status: No violations found

Is the business corporation or private: INDIVIDUAL OWNER
Is it on an aquifer?: Not reported
Public drinking water available at business or on a well: UNKNOWN
Is the business on a sewer system w/ the city: UNKNOWN
Water Type: UNKNOWN
Septic tank on site or connected to city sewer? UNKNOWN
Do they store chemicals on site: YES
Is there an inventory of chemicals: False
Have they received a notice of violation?: Not reported
Are they a significant non-complier?: Not reported
Was enforcement notified?: Not reported
Date they were returned to compliance: Not reported
Comments: Dry well in ground, then pumped to sewer.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Number of Days to Update: 78	Next Scheduled EDR Contact: 04/21/2014
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2013	Source: EPA

Date Made Active in Reports: 01/28/2014	Last EDR Contact: 01/09/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 04/21/2014
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/31/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/08/2013	Telephone: 703-603-8704
Date Made Active in Reports: 12/06/2013	Last EDR Contact: 01/10/2014
Number of Days to Update: 151	Next Scheduled EDR Contact: 04/21/2014
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/10/2013
Date Data Arrived at EDR: 10/02/2013

Data Release Frequency: Annually

LCP: Municipal Landfill Closure Database

The Municipal Landfill Closure and Remediation Program was established in 1988 to assist nearly 400 municipalities with the closure of their unlicensed municipal solid waste landfills. Project managers in this program have conducted site investigations and provided technical engineering assistance to aid municipalities in this process. Funding to accomplish this goal was provided by the state, utilizing several bonds that supported a 75% state cost sharing reimbursement process.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEL HWS: Sites Removed from the Uncontrolled Sites List

Sites are removed from the List once it is determined that they are not "worthy of listing". This term is used as there are a number of reasons to remove a site from the List, including: no file exists, the site was reported as an oil spill, there is no evidence of a hazardous substance release or based on an investigation the site is referred to another program unrelated to hazardous substance or hazardous waste. Sites are removed on a case by case basis. The USP intends this to be an on-going process, as time and resources allow.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 06/30/2013	Source: Environmental Protection Agency

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Child Care Listing

Source: Department of Human Services

Telephone: 207-287-5060

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Source: Office of Geographic Information Systems

Telephone: 207-287-6144

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Most Recent Revision:	1981

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> ANDROSCOGGIN, ME	<u>FEMA Flood Electronic Data</u> Not Available
---	--

Flood Plain Panel at Target Property: Not Reported

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> LEWISTON	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: HARTLAND

Soil Surface Texture: very fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.11 Min: 4.23	Max: 6 Min: 3.6
2	9 inches	18 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.11 Min: 4.23	Max: 6 Min: 3.6
3	18 inches	27 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.11 Min: 4.23	Max: 6.5 Min: 5.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
4	27 inches	44 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14.11 Min: 4.23	Max: 6.5 Min: 5.1

Soil Map ID: 2

Soil Component Name: MADE LAND

Soil Surface Texture: very gravelly sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 122 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	59 inches	very gravelly sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 141.14 Min: 0.42	Max: 7.8 Min: 4.5

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 3

Soil Component Name: HARTLAND

Soil Surface Texture: very fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Source: Office of Geographic Information Systems

Telephone: 207-287-6144

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Public Water Supply Wells Database

Source: Department of Human Services, Drinking Water Program

Telephone: 207-287-6196

There are 3 types of public water systems in Maine: Transient Systems; Community Systems and Non-transient Non-community Systems

OTHER STATE DATABASE INFORMATION

RADON

Maine Radon Test Results

Source: Department of Human Services

Telephone: 207-287-5698

The state of Maine Radiation Control Program's - Radon/Indor Air Quality Section's position on radon map, is that they should be used neither to predict the presence of high nor low values in any given geographic or geologic area. The only conclusion that should be drawn from this data is that radon is omnipresent in the soil gasses in the state of Maine, and therefore all residences and buildings that come in contact with the ground should be tested for radon.

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Supplemental Documentation

Phase I Environmental Site Assessment
7 Chestnut Street
Auburn, Maine
MEDEP REM ID: 02284

**User Questionnaire
ASTM E 1527-13 Phase I Environmental Site Assessment**

In order to qualify for one of Landowner Liability Protections (LLP) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user of the Phase I Environmental Site Assessment must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Site Name: Former Beals Linen Property

Site Address: 7 Chestnut Street, Auburn, Maine

Ransom Project No. 101.06074.012

Ransom Environmental Professional: Aaron R. Martin, C.G.

1. Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25)

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

Yes No (if Yes, provide additional information on attachment)

2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26)

Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded in a registry under federal, tribal, state or local law?

Yes No (if Yes, provide additional information on attachment)

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)

As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes No (if Yes, provide additional information on attachment)

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29)

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Yes No N/A (if No, provide additional information on attachment)

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as a user,

- a) Do you know the past uses of the property? Yes X No _____
- b) Do you know of specific chemicals that are present or once were present at the property?
Yes X No _____
- c) Do you know of spills or other chemical releases that have taken place at the property?
Yes X No _____
- d) Do you know of any environmental cleanups that have taken place at the property?
Yes _____ No X (See below)

(If Yes for any of these questions, provide additional information on attachment)

6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

Yes X (See Below) No _____ (if Yes, provide additional information on attachment)

User:

The following user was interviewed to complete this questionnaire:

Name: Becky Blais

Title: ES III, Project Manager

Firm: DEP

Relationship to Site: Project Manager

Interviewer:

The following Ransom staff completed the interview:

Name: Becky Blais

Date: 4/14/14

Signature: *Becky Blais*

IV. NARRATIVE

11/29/10: While in the vicinity I visited this 2000-gallon, heating oil, underground storage tank (UST) facility that was planned-for-removal by Simard & Sons Inc.. The school was closed and the UST inactive and not abandoned yet. The area is dense sub-urban residential use, served by municipal water and sewer service.

Friday 12/16/11: Visiting again when in the area I found the UST appeared to have been removed, natural gas hooked up to the building, and the building was near complete being converted to the Webster School Community Center. I am not aware of prohibited oil discharges being reported during the UST abandonment.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ransom Env. Consultants, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Qualifications

Phase I Environmental Site Assessment
7 Chestnut Street
Auburn, Maine
MEDEP REM ID: 02284

EDUCATION

B.S. in Environmental Science
University of Iowa, 2001

PROFESSIONAL REGISTRATIONS

- ▶ Certified Geologist, Maine, 2013
- ▶ 40-hour OSHA Hazardous Waste and Emergency Response Training
- ▶ 8-Hour Hazardous Materials and Waste Operation Annual Refresher
- ▶ 8-hour OSHA Hazardous Waste and Emergency Response Supervisor Training
- ▶ Maine Yankee Atomic Power Company Radiological Site Access Training

PROFESSIONAL AFFILIATIONS

- ▶ National Groundwater Association
- ▶ Geological Society of Maine

GENERAL BACKGROUND

Aaron Martin is an associate project manager at Ransom with over nine years of experience conducting environmental due diligence, various types of subsurface investigations, geotechnical investigations, underground and aboveground storage tank removals, remedial activities, fate and transport analysis, and hydrogeologic projects throughout New England and the Mid-Atlantic states. Throughout his career, Aaron has maintained professional relationships with clients including private sector, local municipalities, and various governmental agencies.

ENVIRONMENTAL DUE-DILIGENCE

Aaron has extensive experience conducting and managing Phase I and Phase II environmental site assessments, including historical and regulatory research. His experience also consists of a variety of environmental sampling, including soil and groundwater sampling, sediment and soil gas sampling, indoor air sampling, and surveying groundwater elevations.

SUBSURFACE INVESTIGATIONS

Aaron has experience conducting numerous geotechnical investigations, including overburden and bedrock borehole classifications, and rock quality designations. Aaron is familiar with a variety of subsurface investigation techniques including hollow-stem auger drilling, direct-push drilling, air-rotary drilling, bedrock coring, and cable-tool drilling.

HYDROGEOLOGIC EXPERIENCE

Aaron has conducted numerous clean water hydrogeologic investigations with the bottle water industry at various locations throughout New England. During these investigations, Aaron was responsible for initial source identification, oversight of soil boring program, monitoring well installations, production borehole pumping tests, stream gauging, water quality assessments, and aquifer monitoring programs.

REMEDIAL ACTIVITIES

He has overseen numerous environmental remediation projects, including underground and aboveground storage tank removals, drywell/infiltration galley closures, contaminated soil excavations and contaminated groundwater pump and treat systems.

EDUCATION

**B.S. in Field Ecology and
B.A. in Environmental Science**

The Evergreen State College, Washington, 1996

PROFESSIONAL REGISTRATIONS

- ▶ Certified Geologist, Maine, 2009
- ▶ Licensed Asbestos Inspector, Maine
- ▶ 40-hour OSHA Hazardous Waste and Emergency Response Training
- ▶ OSHA 8-hour Annual Refresher Training for Hazardous Waste Operations
- ▶ American Red Cross First Aid and CPR

PROFESSIONAL AFFILIATIONS

- ▶ National Groundwater Association
- ▶ Geological Society of Maine

GENERAL BACKGROUND

As a Project Geologist, Erik Phenix has over ten years of experience in the environmental consulting industry. Erik has performed numerous Phase I and Phase II environmental site assessments and remediation activities in both California and New England for a variety of properties including residential, agricultural, commercial, and industrial. Erik is familiar with a variety of subsurface investigation techniques including hollow-stem auger drilling, direct-push drilling, air-rotary drilling, bedrock coring, and cone penetrometer test (CPT) drilling. Throughout his career, Erik has maintained professional relationships with clients including private sector, city, county, and state agencies. Erik has experience in all areas of project design, permitting, coordination, implementation, analysis, reporting, and project management.

EDUCATION

B.S. in Chemical Engineering
University of Maine, 1990

Graduate Studies in Environmental Engineering
University of Maine, 2001 to Present

PROFESSIONAL REGISTRATIONS

- › Professional Engineer, Maine
- › OSHA 40-hour Hazwoper, Site Supervisory, and Confined Space Training
- › American Red Cross Adult CPR, First Aid, and First Responder

PROFESSIONAL AFFILIATIONS

- › American Council of Engineering Companies (ACEC), Maine
- › American Academy of Environmental Engineers (AAEE), Intern Environmental Engineer
- › Economic Development Council of Maine (EDCM) Member
- › Society of American Military Engineers (SAME) Member

GENERAL BACKGROUND

At Ransom, Peter Sherr is primarily responsible for client and project management, business development, staff leadership and mentoring, and technical project assistance and reviews.

Peter brings to Ransom more than 20 years of professional experience in environmental consulting and engineering. He has a strong background and well-developed skills in site assessment, subsurface investigation, remedial design engineering, Brownfields redevelopment, risk characterization, in-plant engineering services, construction services, and environmental regulatory compliance. Peter's project management experience includes client management, proposal writing, budget preparation, project coordination, financial management and tracking systems, and training of environmental staff and clients. He also has in-depth knowledge of state and federal environmental compliance regulations, reporting thresholds, and U.S. Environmental Protection Agency (U.S. EPA) Brownfields programs.

During his career, Peter has acquired extensive experience in Brownfields redevelopment including environmental assessment, investigation, remedial planning, and reuse planning and analysis, as well as U.S. EPA Brownfields grant coordination, administration, and planning.

Peter has managed a variety of projects related to the Massachusetts Contingency Plan (MCP) which required an in-depth understanding of state and federal reporting thresholds and cleanup criteria. He has assisted in obtaining regulatory closure for more than 25 MCP-classified sites.

Peter's experience also includes underground storage tank (UST) removals, environmental compliance audits, industrial wastewater characterizations, and preparation of facility waste minimization and hazardous material control documents including Best Management Practice plans, Spill Prevention, Control and Countermeasure (SPCC) plans, chemical inventory reports, and hazardous waste management training programs.
