Subject: Comments from Thailand on WTO Notification G/TBT/N/USA/1967 - Proposed Rule on Products Containing Perfluoroalkyl and Polyfluoroalkyl Substances (PFAS), Maine Department of Environmental Protection (DEP)
Date: Tuesday, May 2, 2023 1:58:24 AM

Dear Colleagues of USA WTO TBT Enquiry Point,

Please refer to your Notification G/TBT/N/USA/1967 Products Containing Perfluoroalkyl and Polyfluoroalkyl Substances (PFAS) notified to WTO TBT on 16 February 2023.

Having reviewed the full text of the regulation, Thailand would like to inform you of the following:

The new rule to prevent selling products and product components containing intentionally added PFAS could have a beneficial impact on public health and the environment. However, it would be better to give maximum - minimum limits of PFAS in the form of contamination.

Your consideration of our comments would be appreciated.

Best regards,

Thai Industrial Standards Institute (TISI)
