Page 208 of 210

Purpose: The Remediation Sites Database is a summary of information on properties under investigation and/or remediated by the Division of Remediation ("DR"), in the Bureau of Remediation and Waste Management ("BRWM") at the Maine Department of Environmental Protection ("DEP"). Programs within DR includes: [Brownfields](#); [Federal Facilities and Superfund](#); [Municipal Landfill Remediation](#); [Uncontrolled Sites](#); and the [Voluntary Response Action Program \(VRAP\)](#). In general these programs focus on investigation and remediation of releases of hazardous substances at sites, although the VRAP and Brownfields programs also address petroleum releases.

For More Information: The most comprehensive source of detailed information on each listed site is in the central files at the [BRWM File Room](#) in Augusta, Maine. For questions about particular sites on the list, please call the listed project manager or the Program contact person:

- Voluntary Response Action Program (VRAP) or Brownfields Program: Chris Redmond: chirstopher.redmond@maine.gov (207) 215-8597.
 - Federal Facilities & Superfund Program: Chris Swain: chris.swain@maine.gov (207) 485-3852.
 - Uncontrolled Sites Program or Landfill Closure Program: Peter Crockett: peter.g.crockett@maine.gov (207) 451-5710.
- [Remediation Sites \(Institutional Controls\) Database \(Data Refreshed Daily\)](#).

Locations: For the location of listed sites, see

Explanation of Terms: The following terms mean the following:

Status	Substatus	Means
Complaint investigated	Unsubstantiated	DR conducted a preliminary investigation of a potential release at the site, but found insufficient evidence to support further DEP expenditures on the site.
	Reviewing preliminary site information	The DR is in the initial stages of reviewing information relating to the potential release at the site.
Investigation stage	Need (awaiting resources)	DR has identified the need to investigate the site further but has not begun to fill the identified data gaps.
	Ongoing	DR has initiated an investigation into the potential release at the site.
Remediation stage	Needed (awaiting resources)	DR has determined that remediation or mitigation of a release is necessary at the site, but has not begun that action.
	Ongoing	DR has initiated remediation or mitigation of a release at the site.
Remedy in place: closed	Undertaking post-closure obligations	The site's remedial or mitigation systems have been installed to prevent ongoing exposure to site contaminants, but routine system monitoring, operation, maintenance is needed; and/or periodic monitoring of Environmental Covenants is needed.
	No (or <i>De-minimis</i>) contamination left on site	No hazardous substances remain at the site above the most stringent clean-up guidelines.
Transferred to other Division	Solid Waste	DR investigated the site and found that further follow-up may be warranted by the DEP's Division of Solid Waste
	RCRA	DR investigated the site and found that further follow-up may be warranted by the DEP's Hazardous Waste Licensing and Corrective Action Program
	Oil	DR investigated the site and found that further follow-up may be warranted by the DEP's Petroleum Investigation and Remediation Programs
	Other	DR investigated the site and found that further follow-up may be warranted by a DEP program other than the ones listed above
