

RELEASE NOTES SW 05-09  
August 21, 2007

**Authorizations:**

**[DS-EIS-EOAS 01-00-0237](#) Units of Measure within Service Packages**

**Agreement Management:**

**[DS-EIS-EOAS 01-00-0242](#) New Column for Service type mismatch (Data Table)**

**[DS-EIS-EOAS 01-00-0243](#) Class Status Field change to LOV**

**[DS-EIS-EOAS 01-00-0244](#) Mainecare Enrolled field changed to LOV**

**[DS-EIS-EOAS 01-00-0245](#) Mainecare Application field changed to LOV**

**[DS-EIS-EOAS 01-00-0246](#) Social Security Number field validation**

**[DS-EIS-EOAS 01-00-0247](#) Activity Number field validation**

**[DS-EIS-EOAS 01-00-0248](#) Staging table fields for parameter fields default to 'N'**

**Reportable Events:**

**[DS-EIS-EOAS 01-00-0239](#) Losing Anchor**

**[DS-EIS-EOAS 01-00-0240](#) Date Modified Column (Data Table)**

## **Authorizations:**

### **DS-EIS-EOAS 01-00-0237 Units of Measure within Service Packages**

**Request:** Users need the ability to add a Unit of Measure within a Procedure Code within a Service Package.

**Fix:** As a short term fix the user now has the ability to add the Unit of Measure within the Procedure Code within the Service Package of an Authorization. The following rules apply:

## **Agreement Management:**

### **DS-EIS-EOAS 01-00-0242 New Column for Service type mismatch (Data Table)**

**Request:** New column to flag Service Type mismatch in a batch record added to the staging table.

**Fix:** Column added to data staging table.

### **DS-EIS-EOAS 01-00-0243 Class Status Field change to LOV**

**Request:** User asked for change in Class Status field to Yes/No LOV.

**Fix:** Free text entry is removed and restricted to Yes/No type LOV for Class Status field.

### **DS-EIS-EOAS 01-00-0244 Mainecare Enrolled field changed to LOV**

**Request:** User asked for change in Mainecare Enrolled field to Yes/No LOV

**Fix:** Free text entry is removed and restricted to Yes/No type LOV for Mainecare Enrolled field.

### **DS-EIS-EOAS 01-00-0245 Mainecare Application field changed to LOV**

**Request:** User asked for change in Mainecare Application field to Yes/No LOV

**Fix:** Free text entry is removed and restricted to Yes/No type LOV for Mainecare Application field.

## **DS-EIS-EOAS 01-00-0246 Social Security Number field validation**

**Request:** User asked for Social Security Number field format validation on the Agreement Service Encounter Screen.

**Fix:** Social Security field entry validation for a valid SSN format is added in the screen.

## **DS-EIS-EOAS 01-00-0247 Activity Number field validation**

**Request:** User asked for Activity Number field format validation on the Agreement Service Encounter Screen.

**Fix:** Social Security Number field format validation on the Agreement Service Encounter added to Screen.

## **DS-EIS-EOAS 01-00-0248 Staging table fields for parameter fields default to 'N'**

**Request:** User requesting Staging Table fields for flags to identify the following parameters to be defaulted to hold the value 'N'.

### Duplicate Record

- \*Contract Number not matching/not found
- \*Invalid Social Security Number
- \*Payment Request Type not matching/not found
- \*Service Type not matching/not found
- \*Null Values for Key record identifiers
- \*Activity Number not matching/not found
- \*Service Encounter start/end dates do not fall within Contract start/end dates

**Fix:** Staging table fields for flags to identify parameters developed and defaulted to value of 'N'.

## **Reportable Events:**

### **DS-EIS-EOAS 01-00-0239 Losing Anchor**

**Request:** This is a follow-up to the fix that was DS-EIS-EOAS 01-00-0209 in SW 05-07 when user were clicking on the go button for Reportable Events in My In Box of My Events. The problem now is that once they are in the Reportable Event and click on the Assessment List they again lose the Anchor to the Client although the list that shows is the list of assessment for that Reportable Event for that client in EIS Test. In addition the assessment is attaching itself to other clients both through the tickler reportable event and through the menu reportable event.

**Fix:** This issue was resolved after webexing with the user to see what was happening at the data base level.

### **DS-EIS-EOAS 01-00-0240 Date Modified Column (Data Table)**

**Request:** When using toad to check on a reportable event issue Wendy noted the following. In the Dept\_Event Table the modified by people\_id is not being populated within the Data Base, but the date modified is there?

**Fix:** Modified by Peo\_id is now being populated within the Data base.
