Title: New System or Well Approval Application for Transient Public Water Systems
By: N. Saunders
SOP ID:
Revision: B
Accepted By:

Prepared

Date: April 27, 2010
Date of Revision: 4-27-2010
Date:

IS YOUR ESTABLISHMENT A PUBLIC WATER SYSTEM?

A public water system is defined as any publicly or privately-owned system of pipes or other constructed conveyances, structures and facilities through which water is obtained for or sold, furnished or distributed to the public for human consumption, if such system has at least 15 service connections or serves at least 25 individuals daily at least 60 days out of the year or bottles water for sale. The term "public water system" shall include any collection, treatment, storage or distribution pipes or other constructed conveyances, structures or facilities under the control of the supplier of water and used primarily in connection with such a system, and any collection or pretreatment storage facilities not under that control that are used primarily in connection with such a system.
(From the State of Maine Rules Relating to Drinking Water)

This definition means that if you serve water from your own source (well or surface intake) to 25 or more people per day, or have 15 or more service connections, and operate for 60 or more days per year, you are operating a public water system. There are three types of public water systems and each is regulated differently. The three types are:

Community Public Water System:

A public water system which serves at least fifteen service connections used by year-round residents or regularly serves at least 25 year-round residents. (Year-round is defined as permanent residence greater than six months.) Examples include water utilities, mobile home parks, apartment buildings, nursing homes.

Non-Transient, Non-Community Public Water System:

A non-community public water system that serves at least 25 of the same persons for six months or more per year. Examples include schools, office buildings, factories.

Transient Public Water System:

A non-community public water system that serves at least 25 persons, but not necessarily the same persons, for at least 60 days per year. Examples include restaurants, camps and campgrounds, motels and hotels, and bottled water companies.

“New Well” is defined as a well that has not been drilled yet or an existing well that has not been regulated as a public water source in the last three (3) years... new to the Maine Drinking Water Program (*this includes After the Fact wells*).

If you are planning a new well for a new or existing **Transient Public Water System**, the materials you need for well and system approval are within this application, or referred to in this application. If you are planning a well for a community or a non-transient, non-community system, please request the appropriate application from the Drinking Water Program.

Please contact the Drinking Water Program at (207)-287-2070 if you have any questions concerning the process for reviewing an application for a new well or a new public water system. Compliance of the entire public water system will be evaluated during a comprehensive inspection by the Drinking Water Program. Please contact Nate Saunders at 207-287-5685 or, nathan.saunders@maine.gov for more information.

GETTING APPROVAL FOR A TRANSIENT PUBLIC WATER SYSTEM OR WELL

If you own or operate a public water system in Maine, or are planning to establish one, drilling and utilizing a new well for serving water to the public requires written approval from the Maine Drinking Water Program (DWP) in the Department of Health and Human Services. This application has the material you need to complete this process.

Every public water system has two primary points of contact with the Maine Drinking Water Program:

- **Field Inspector**... responsible for helping you to complete the new well and system approval process and all aspects of inspecting your public water system. Your Field Inspector contact information is on the front cover of this publication.
- **Compliance Officer**... responsible for evaluating water quality and overall compliance of your public water system with the Maine Rules Relating to Drinking Water. Your Compliance Officer contact information is on the front cover of this publication.

STEPS OF THE NEW WELL AND SYSTEM APPROVAL PROCESS

1. Fill in the "Facility Information and Points of Contact" form.
2. Fill in the "Request for Preliminary Well/System Approval" form. Note that public water system wells must be 300 feet from leachfields and 1000 feet from underground storage tanks. See setback waiver policies at www.medwp.com, Downloadable Documents, New Well Approval.
3. Fill in the "Potential Sources of Contamination" form.
4. Provide (sketch) a "Site Plan for Preliminary Approval of the Proposed Well". A sample is provided in this packet

Send items 1-4 to your Field Inspector, identified on the front cover of this publication.

5. After Preliminary Approval has been granted by the Field Inspector, the well can then be drilled. (For a system with an existing well, after preliminary approval is granted, proceed to the next step)
6. Work with the Compliance Officer to arrange required water quality tests to be collected.
7. Fill in the "Request for Final Well/System Approval" form.
8. Fill in the "Water System Component Checklist and Questionnaire".

Send items 7-8 to your Field Inspector.

Note: If your public water system is already in operation serving water to the public, complete items 1 through 8 and send all materials to your Field Inspector.

9. After Final Well/System Approval is granted, contact the Field Inspector or Compliance Officer when water is being served to the public from this new well or new public water system.

Public Water System Facility Information and Points of Contact

Facility Name: _____
Tax Map & Lot Number: _____
Road Address: _____
City or Town: _____
County: _____
On-Site Contact Person: _____
On-Site Phone: _____
Person completing this form: _____

For Office Use Only

PWSID#: _____

Date Entered: _____

The Maine Drinking Water Program (DWP) keeps record of several contacts involved with managing and maintaining every public water system. Please record contact information below. If you have an existing public water system, please fill in the contact information below.

Administrative Contact (Principal point of contact for DWP correspondence)

Name: _____ Fax (dedicated line): _____
Mailing Address: _____ Emergency Phone: _____
City, State, Zip Code: _____ E-mail: _____
Phone: _____

Financial Contact (Receives the DWP fee annual bill)

Name: _____ Fax (dedicated line): _____
Mailing Address: _____ Emergency Phone: _____

**REQUEST FOR PRELIMINARY APPROVAL
FOR A TRANSIENT PUBLIC WATER SYSTEM OR WELL**
Note: Preliminary approval is required **before** a well is drilled.

Facility Name: _____
PWSID# (if an existing public water system): _____
Contact Name: _____
Town or City: _____

**NOTE THAT A NEW WELL MUST BE
DRILLED BY A WELL DRILLER
LICENSED IN THE STATE OF MAINE.
FOR A LIST OF WELL DRILLERS,
CONTACT THE MAINE WELL DRILLING
COMMISSION AT (207) 287-5699**

- This application is for (check one):
- An additional or new well for an existing public water system?
 - A well for an existing facility which has not been regulated before?
 - A well for a proposed facility which has not yet been constructed?

Allow 30 Days for Processing

I plan to drill the well by _____(date). I want to have it on-line by _____ (date)

This application will be returned unless accompanied by:

1. A location map (an "X" drawn on a map from the Maine Atlas and Gazetteer is sufficient)
2. A site plan (more detailed map of the well site) including:
 - A scale (1inch = 100 feet or similar)
 - All potential contaminant sources (leach fields, fuel tanks etc.) within 300 feet of the well.
 - Underground Storage Tanks within 1000 feet of the well.
 - Surface water bodies (lakes, streams, ponds) within 300 feet of the well.
 - Property boundaries and the land uses on adjacent properties
 - The general slope of land near the well
3. A copy of HHE 200 septic system design form if a leach field is within 300 feet of the well.

ESTABLISHMENT DESCRIPTION

CHECK ALL THAT APPLY: NUMBER OF:

- Restaurant _____ seats _____ meals per day _____ employees
- Hotel or Motel _____ units
- Campground _____ units
- RV Park _____ sites
- Children's Camp _____ campers and staff
- Other (describe) : _____

If a Take-Out eating establishment, check the services that will be provided using water from the well: Fountain soda Coffee Slush drinks Cup dispenser in bathroom Drinking Water fountain

Is this a seasonal operation? _____ If yes, season begins? _____ season ends? _____

How many feet away is the nearest property line? _____(feet)

How much land is controlled and/or owned? _____(acres)

How many feet to the nearest corner of any leachfield? _____(feet). *Setback waiver is required if less than 300 feet*

How many feet to the nearest underground storage tank? _____(feet). *Setback waiver is required if less than 1000 feet*

CERTIFICATION: I hereby certify that, to my knowledge, the information on this form and attachments is true and accurate and no site details have been omitted which would have a bearing on the suitability of the site for installation of a public water supply well. **Maine law makes it illegal for persons applying for a Departmental permit to make false statements upon an application with the intent to deceive department officials in the course of their official duties, or to create a false impression in a written application for pecuniary or other benefit. Unsworn Falsification is a Class D misdemeanor offense punishable by up to 364 days incarceration, a fine of up to \$2,000, or both.**

	29. Small engine repair shop			71. Sewer line	
	30. Snow dump (large commercial or municipal)			72. Sludge disposal or spreading	
	31. Stormwater impoundments or run-off area			73. Wastewater impoundment area	
	32. Truck terminal			74. Wastewater treatment plants, discharge	
BACTERIA AND INORGANICS SUCH AS NITRATES / NITRITES				75. Wood preserver	
	40. Animal burial (large scale site)			76. Other – Please indicate other potential contamination sites not included in this list. _____	
	41. Animal grazing				
	42. Barnyard				
	43. Manure pile				
	44. Manure spreading				
	45. Meat packer, slaughter house				
	46. Municipal wastewater plant				

EXAMPLE OF A SITE PLAN FOR PRELIMINARY APPROVAL OF PROPOSED WELL

An acceptable site plan must include:

- A scale (1inch = 100 feet or larger);
- Potential sources of contamination within 300 feet (leach field, fuel tank, etc.);
- Underground Storage Tanks within 1000 feet of the well;
- Property boundaries;
- A description of land uses on adjacent properties;
- The general slope of land near the well; and
- Surface water bodies within 300 feet of the well.

TRANSIENT PUBLIC WATER SYSTEM APPROVAL PROCEDURE FOR A NEW SYSTEM OR WELL WATER QUALITY TESTING REQUIRED FOR FINAL APPROVAL

Transient public water systems serve a constantly changing population of one-time or infrequent customers. Examples include restaurants, motels, parks, campgrounds and summer camps. Final approval of a well for a transient system requires satisfactory results for two tests. After the well is drilled it must be shock chlorinated and then pump tested for at least 48 hours. Continue to pump the well until you no longer detect the odor of chlorine (if there is still chlorine in the water when it reaches the lab, the test will be invalidated and you will need to test again for coliform bacteria). At the conclusion of the pump test, take samples for the following two tests:

Inorganic Parameters (*Test E1 at State Health Lab*): A good indicator of general groundwater quality includes: nitrite; chloride, hardness, fluoride, copper, iron, manganese, zinc, arsenic, barium, cadmium, chromium, lead, mercury, silver, selenium, sodium, color, turbidity, pH, and total coliform bacteria.

Volatile Organic Compounds (*Test VOC 524 at State Health Lab*): EPA method 502.2. A screening procedure which can detect the presence of more than 50 different hydrocarbon compounds including gasoline, kerosene, Methyl Tertiary Butyl Ether (MTBE), and many industrial solvents.

For a list of labs certified by the State of Maine, contact the Drinking Water Program at (207) 287-2070. To order bottles from the State Health Lab, call the Compliance Officer listed on the front page of this application.

CERTIFICATION

I hereby certify that, to my knowledge, the information on this form and attachments is true and accurate. I certify that the well has been drilled as specified on the preliminary approval request submitted earlier and that water test results are from raw water samples taken from the well described above. **Maine law makes it illegal for persons applying for a Departmental permit to make false statements upon an application with the intent to deceive department officials in the course of their official duties, or to create a false impression in a written application for pecuniary or other benefit. Unsworn Falsification is a Class D misdemeanor offense punishable by up to 364 days incarceration, a fine of up to \$2,000, or both.**
