## Animal Rabies 1<sup>st</sup> Quarterly Update

**January 1, 2012 – March 31, 2012**

Maine Center for Disease Control and Prevention (Maine CDC) provides quarterly updates on animal rabies to veterinarians and other animal health professionals. This update may be used as an educational tool to inform pet owners and other members of the public about the risk of rabies in Maine and in their communities.

This update provides information on rabid animals for the first quarter of 2012 (January 1-March 31). Results are based on animals submitted to the Health and Environmental Testing Laboratory (HETL) for rabies testing following contact with a human, domestic animal, or livestock (Table 1). USDA APHIS Wildlife Services performs supplemental surveillance of rabid animals with no human, domestic animal, or livestock exposure (Table 2). The count of positive animals statewide may not be representative of the true incidence of animal rabies in Maine because results are based only on those animals submitted for testing due to contact with a human or domestic animal. See HETL's rabies website for regularly updated rabies data at <http://www.maine.gov/dhhs/etl/rabies/rabies2012.htm>.

Rabies is transmitted when the virus is introduced into bite wounds, open cuts in skin, or onto mucous membranes from saliva or other potentially infectious material, such as neural tissue. Prompt recognition and reporting of possible exposures to medical professionals, public health officials, and local animal control officers is critical to ensure appropriate management and assessment of the need for post-exposure prophylaxis. Please refer to the Maine Rabies Management Guidelines when assessing a possible exposure ([www.maine.gov/dhhs/boh/ddc/documents/RabiesManagementGuide2005.pdf](http://www.maine.gov/dhhs/boh/ddc/documents/RabiesManagementGuide2005.pdf)). Maine CDC provides consultation and receives reports by phone at 1-800-821-5821 or fax at 1-800-293-7534. For more information, see the Maine CDC rabies website at [www.mainepublichealth.gov/rabies](http://www.mainepublichealth.gov/rabies).
