5. What did you enjoy most about this meeting?
- LEAD Program – great program
 - Rebecca’s Presentation
 - Dr. Kirsten Milliken
 - Rebecca Morin – Mobius / Great
 - Dr. Kirsten Milliken – Portland West / Good info for transitioning youth
 - Info provided was great!
 - Learning about other agencies and resources
 - Happy to hear integration is being looked at on the regulation / policy level
 - I learned a lot today from the presentations. COSII and anger management
 - LEAD presentation and Co-Occurring Disorders
 - Co-Occurring Disorders / LEAD presentation
 - Co-Occurring Disorders
 - EPSDT – helpful information. Portland West helpful but not valuable to our region. Mobius – very helpful on TCM to be able to refer MH with MR too
 - Variety of information
 - LEAD program & Co-Occurring, and State integration initiative
 - The opportunity to gather information
 - Kirsten and Leslie’s presentation about anger management. Wish it was available in Knox, Waldo, and Lincoln counties. Sounds like a great program!
 - Mobius presentation was great, very informative. Claudia Bepko was very informative as well. Definitely would like to have her come back with trainings!
 - Hearing about services I knew nothing about
 - The presentations were all interesting and informative
 - LEAD, Co-Occurring Systems
6. What suggestions do you have for future meetings (include topics, locations, etc.)?
- Speakers need to speak up
 - Katie Beckett for a topic in the future
 - Information on Katie Beckett
 - Motivational interviewing to assist in case management assessments (not necessarily for co-occurring diagnoses)
 - Someone to explain ALL services through DHHS with contract information – a clear overview which includes a hierarchy chart
 - Dual diagnosis – mental health & dual diagnosis. Possibly a program similar to ‘Back On Track’ (Portland West) that can be modified for children with developmental disabilities
 - Use of CHAT and other evaluations in service plan development. Dual diagnosis, mental health *and* dual diagnosis
 - Good job with seating today
 - A meeting focusing on Co-Occurring, State Integration Initiative
 - None at this time
 - Heat and coffee
 - It is typically very cold in this room, maybe increasing the temperature for future meetings
 - N/A
 - More up-dates about the most current updates from the state / feds even if Doug Patrick can’t be there
 - More info about Co-Occurring systems

7. Additional Comments:

- **Power Point much better rather than writing on paper – too hard to see / read**
- **Missed having Doug Patrick speak. Was interested in any specific updates**
- **I think we continue to need quality assurance format for new billing system. Questions occur as we work through it. We need continuance support reading regs leaves room for may interpretations**
- **Due to the multiple changes going on it would be nice to either meet more often to talk directly to MaineCare , or Doug Patrick. Or be given access to a web-page which has questions followed by clear, concise answers with the perspective of the community provider in mind. Not from the perspective of DHHS, especially as they relate to CBHS. Also, what specifically does CBHS do?**
- **The anger management services was an interesting presentation and should be taught in the school systems instead of ‘I’ messages or at least in addition to the ‘T’ messages**
- **Info from Dr. Milliken did not seem to pertain to our population as she stated she did not adapt her meeting to people with cognitive disabilities**
- **The ‘Back On Track’ presentation was not useful due to its discussion of children with MR**
- **Thank you for the opportunity to present!**
- **Disappointed Doug Patrick or someone from DHHS not available to give us updates from the department as there are a number of issues which are causing concerns, i.e. PNMI, ¼ billing, etc. Ms. Bepko was pushy in regards to selling motivational interviewing which isn’t the only answer to dialogue and working with families with issues.**
- **Room set-up was much better**
- **The information provided related to co-occurring d/0 was misleading n regards to actually providing a billable services. Also having a license to actually provide the service and clinical licensure of the actual individual. A mini-training around the thought process and how to communicate with client’s and families is more appropriate.**
- **Good presenter about the LEAD program**
- **Disappointed Doug Patrick cancelled, room was cold, but seating arrangement was great**
- **N/A**
