

## **ICD-10 Billing Procedures for Methadone Clinics, Code H0020: Changes for September 27, 2015**

Due to the implementation of the ICD-10 code set on October 1, 2015, Methadone clinics will need to bill differently for the week of September 27, 2015 through October 3, 2015. Because you bill a weekly code of H0020, you will need to modify your usual billing procedures to ensure that your claims process correctly.

Please continue to bill H0020 as one (1) unit. The billing details below are based on the date of service:

### **September 27, 2015 – October 3, 2015**

- Use ICD-9 codes
- Use a start date September 27, 2015 and an end date of September 30, 2015

### **October 4, 2015 – October 10, 2015**

- Use ICD-10 codes
- Use the dates of service for the complete week as you usually bill

**All other codes** that you use require services to be split-billed when spanning the October 1, 2015 implementation date. Because H0020 is billed weekly, it is the exception and should be treated differently.

Please contact your assigned Provider Relations Specialist or the ICD-10 Specialist with questions:
