

The Families Affected by Substance Abuse (FASA) Network is a group of providers who have been trained in completing Substance Abuse assessments for Child Welfare cases. This network was developed by the Child Welfare/Substance Abuse Committee and was established to provide statewide consistency in how Substance Abuse assessments are conducted for these cases. Only agencies/providers that have signed a Memorandum of Understanding and have completed the training are able to conduct these assessments.

To make a referral, please contact an agency listed below and request a FASA assessment:
