**JSA designs new 135,000 s/f Riverview
psychiatric treatment center in Augusta**

AUGUSTA, ME Governor John Baldacci joined Sabra Burdick, acting commissioner for the Department of Behavioral and Developmental Services to unveil the state's new psychiatric treatment center. This advanced 135,000 s/f facility will house 92 patients and replace the Augusta Mental Health Institute, which has been in continuous operation for the past 163 years.

"This new building is a powerful statement about the State's commitment to improving services for person with mental illness and reducing the stigma associated with mental illness," said governor Baldacci. "Architecture plays a strong role in shaping the environment and expectations. This building is about hope, recovery, light, and respect."

Riverview Center is being touted as the next generation treatment center meticulously designed to promote healing while providing safety for staff and patients. "Creating a therapeutic environment that respects the dignity of the individual patients was paramount in the design philosophy at Riverview," said Todd Hanson, principal architect at JSA. "The goal was not to create a large institutional facility but to treat the center as a village of diverse neighborhoods that address the functional needs of the patients." By creating several enclosed courtyards and carefully orienting the wings, almost all common areas are washed with natural light and have access to secure, beautifully landscaped grounds.

Several unique features of the center can be noted. Each private bedroom has a scenic view across the Kennebec River. A treatment mall

gives patients the opportunity to use the art studio, library, teaching kitchen, greenhouse, computer lab, quiet lounge, hair salon, medical clinic and dental office. In addition, patients can enjoy indoor and outdoor dining, gymnasium, and exercise room.

"Our goal is to create an environment of support and hope for our patients," said Marya Faust, director of special initiatives and program manager for Riverview. "This place is all about respect for people who have mental illness and providing

them an environment where they feel safe and cared for. The natural landscape reflected in the artwork and design brings the outside in and promotes healing. We look forward to providing the best care possible for recovery to those who need our services the most."

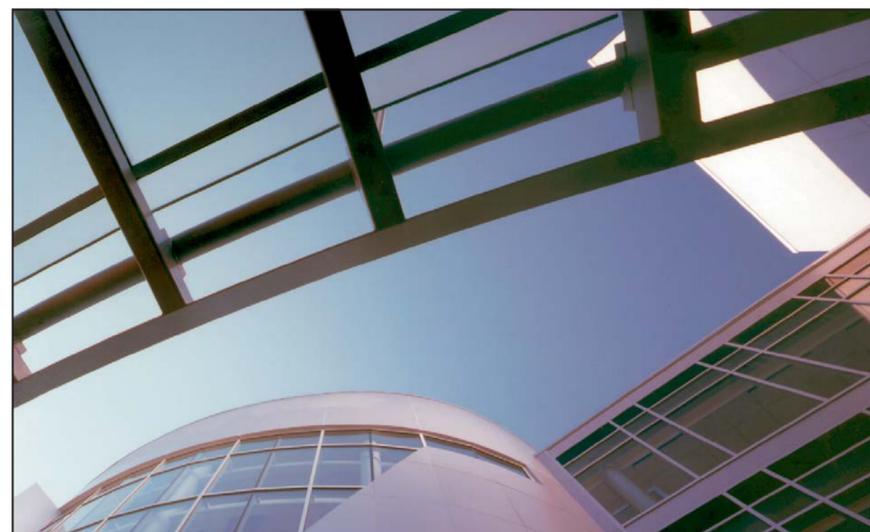

JSA is a national architecture, planning, and interior design firm and winner of over 50 industry awards and has three AIA Fellows on staff. The company has 24 years of experience in healthcare, education, hospitality, housing and senior living.
