

Knox Configure

What is Knox Configure?

Cloud-based tool that allows businesses to tailor a consistent standard, or “Gold Image”, for Samsung Smartphones and Tablets.

What does it do?

Create an easy to build profile and remotely configure most features/settings (hardware and software). Reduces the steps and resources required for device deployments and provides consistency of devices across all users. Deploy purpose built appliances suited to a business’s specific needs

Knox Configure Dynamic edition: \$10 per year per device

What problem does it solve?

KC can resolve concerns businesses have about deploying large numbers of devices to field employees.

- **Deployment & Management:** Quickly and remotely configure and deploy devices with minimal interaction. Updates to customer apps and configuration can be pushed to devices by IT admins.
- **Security & Employee Abuse:** Profiles are linked to the device IMEI, and cannot be removed, even if factory reset.
- **MDM Cost and Complexity:** Manage many of the same settings but in a low touch, low cost manner.

What can KC offer and manage?

- **Disable Pre-loaded apps**
- **Customizable Home Screen**
- **Manage Settings:** Connections, Security, Menus, Sounds, Display, etc.
- **Manage Apps / URLs:** Blacklist / Whitelist apps and URLs, remove browsers, define home page
- **Device Restrictions:** Disable Google Play, device features, hardware keys
- **Enable Kiosk Mode**
