2016 LABOR REIMBURSEMENT AND PRIVATE EQUIPMENT RATES

The Maine Department of Transportation has established the following schedule of rates for Maintenance, Collector Road Improvement and other force account projects, as applicable. The Department is sensitive to the fact that fuel prices may continue to be volatile. The Department may revise these rates if fuel prices escalate.

Equipment compensated based on bucket or body size must be rated per manufacturer's specifications for that size.

Time begins at the job location. The Equipment will be reimbursed for time the equipment is operating.

LABOR REIMBURSEMENT RATES (MAXIMUM)

On all town-financed force account projects the State will reimburse municipalities the cost of labor based on the wages actually paid, but NOT EXCEEDING the following scale, except as noted below. In addition, direct salary fringe benefits are eligible for reimbursement as supported and certified to the Department by the municipality. In this case, Equipment will then be reimbursed at the rate shown w/o an operator.

	Effect Date 1-Jan-16 <u>Str. Time</u>	State Pay Step	Effect Date 1-Jan-16 <u>*Overtime</u>

60 – up (Trans Worker III Classification)	\$17.66 /hr.	8	\$26.49 /hr.

*Time and one half reimbursement for labor only will be allowed in conformity with a town's current overtime pay practices. As concerns the "Equipment WITH Operator" rates, all hours including overtime hours will be paid at the rates as listed and explained on the following pages.

NOTE: On projects where Federal Funds are involved, workers who are not State or Municipal employees must receive pay equal to or greater than the latest prevailing Davis-Bacon wage rates for highway construction workers. In this case the State will reimburse a town for the actual cost of labor up to the State rate or the Davis-Bacon rate, whichever is greater.

PRIVATE EQUIPMENT RATES

The “with operator” rate is a combined rate covering equipment and labor plus an additional allowance for fringe benefits and incidental labor cost. The “without operator” rate is for equipment rental only.

Current D.O.T. Fleet Services Rental rates for State equipment can be obtained from any of the D.O.T.’s five area region offices.

Except as explained below, the following equipment rental rates determine the maximum the State will pay to hire various types of private equipment either with or without operator. These rates also determine the maximum reimbursement the State will pay for equipment provided or hired by a municipality for “Town Financed” force account work. The exception is that on certain projects where Federal funds are involved, equipment operators who are not State or Municipal employees must receive pay equal to or greater than the latest prevailing Davis-Bacon wage rate. In such cases, when the Davis-Bacon wage rate is greater than the comparable State rate listed on the previous page, the “with operator” rates will be adjusted upward by the difference between the two rates. The labor surcharge portion of the “with operator” rate will not be changed.
