

**Maine Department of Transportation
Qualified Products List of
High Density Polyethylene (HDPE) Pipe**

HDPE Pipe manufacturing facilities are required to be audited annually by the National Transportation Product Evaluation Program (NTPEP) to determine conformance with the appropriate AASHTO/ASTM Materials Specifications.

To determine if a pipe manufacturing plant is in conformance, please click on the following link:

<http://data.ntpep.org/Module/PIPE/StatusReport.aspx>

If the audit is complete and the plant is "Compliant", it meets MaineDOT's prequalification requirements. When clicking on the production details link (far right hand column) for each location, the blue X's denote the particular size and type of pipe that is manufactured at that location.

For more information about NTPEP's HDPE Pipe Program please visit: www.ntpep.org

PLEASE NOTE: Products often times may have multiple uses. Products appearing on this particular list are expressly pre-qualified for this category of usage only. Do not use these products for any other application unless this product is noted on other lists.

Manufacturers or their representatives seeking pre-qualification of their product should submit a completed copy of the [MaineDOT Preliminary Information for Product Evaluation Form](#) along with their product's technical data sheet, installation instructions, Material Safety Data Sheet (MSDS), and any other pertinent information.

If you are experiencing difficulties reading or printing this page, or any page on the Qualified Products List website, please contact the Product Evaluation Coordinator at 207-624-3268.
