

**MaineDOT Utility Task Force Meeting
September 20, 2012
MaineDOT Conference Room 216
Chair: Mike Moreau
Minutes**

Attendees: See Attached List

Agenda: Follow up on Electronic Letter 1s and Outstanding Check issue being resolved. New items: High Traffic Corridors & Lane Closures, 2013 Tentative Project Advertise Schedule, Underground Utility Inspections, Re-Connecting Private Electrical Service and Open Forum.

Follow Up Items –

- *Are Utilities Getting Electronic Letter 1s?* Yes receiving electronically and all using same letter. Seems to be working fine.
 - The letter is available on our web page and has been pushed to the Consultants.
 - If the issue develops again, please let Mike know and the source of the issue.
 - Please submit in a timely manner. Most are but still some require several requests before submitting.

Issue resolved.

- *Has the Outstanding Check Issue Been Resolved?* Believe this is referring to being billed or when payment is received, seems we were holding checks for a long time before processing.
 - Utilities are receiving billing from MaineDOT (DOT) and no one this group waiting for DOT to cash checks.

Let Mike know if bills or payments issues surface again.

New Items –

- *Lane Closures for Utility Work in High Traffic Corridors*
 - Recent issue in Wiscasset where DOT had a Night Work Project and in the same area Utility work with lane closure during the day which cause traffic delays. DOT received numerous phone calls complaining about the traffic delays even though the Utility work was not part of the DOT project.
 - Some internally at DOT felt the Utility Company should be working at night also. Some back and forth happened before all clear on why the work is done during the day. Coordinators, Utility Engineer and Highway Management discouraged asking Utilities to work at night
 - 1) Safety issues and Cost issues for utilities working at night
 - 2) DOT does not oversee or coordinate Utility work that is not part of a DOT construction project

Please communicate with DOT any High Traffic Corridor Utility projects involving lane closures which could cause traffic delays. Please also make the municipalities and any first responders aware of the work; when, where and timeframe.

- Will require a lot of communications from both sides to accomplish.

Q – Can High Priority Corridor maps be provided to the Utilities? Yes, will eventually be added to DOT Utility web page. Draft Map (pdf, needs improvement) is attached.

Suggestion: Add DOT policy on “not working certain Friday’s during holiday weekend during the summer” to Web page. Would also be helpful for the contractors to be aware also.

- Mike will look into adding to web page.
- Utilities indicate they usually do not work on Holiday weekend Friday’s unless the work is crucial.

○ ***Share 2013 Tentative Project Advertise Schedule***

- The schedule was share with the group (See Attached Project Advertise Schedule). Made aware this is about 85% accurate at this time and any changes will happen in the next 60 days. The schedules for any project in the list 2014 or beyond cannot be relied on.
- Final 2013 Schedule will be posted on the web.

Q – Is there a location on your web page which provides information on the Projects? i.e. starting and ending points. Until the Plan/Schedule is locked down not really so please direct any questions to Mike and he will provide you with a contact person on the project in question.

- Expect the 2013 Work Plan to be solid by the end of the year. Always working with funding concerns.
- Will be posted on the Web Page once finalized. Description will be available at that time.

Comment – as soon as DOT has the final Work Plan we will let you know – feel free to contact a coordinator for information.

○ ***Timely Underground Utility Inspections***

Situation: full construction project with water and sewer work also. Camera acceptance of the sewer line was required. New sewer line showed sags needing to be corrected. Once corrected camera shots were taken of the line with construction continuing, road being paved. There was a delay in sharing second camera run. Once shared it was determined there were more sags that needed to be corrected; hence requiring areas of the new pavement to be removed. Costly oversight and perception from the public; State continues to pave only to dig up a couple of months later.

- Lesson Learned item. But also please remember to share this type of information as soon as possible with DOT.

NOTE: Future Agendas will have Lessons Learned Item for this type of discussion. The do’s and don’ts learned.

○ ***Re-Connecting Private Underground Electric Services***

Situation: Recent project where property owners not directly impacted by our project / no ROW compensation; were asking for settlement due to Utility charges against them for reconnection to underground electrical. Utility company moved poles requiring reconnecting. DOT concern is the property owners indicate they were not notified of the need for service reconnection plus it is not DOT responsibility to notify property owner in this situation. Utilities should be notifying their customers.

Comment: Utilities do send letter or place cards on doors regarding this type of situation. Owners are advised of the roadwork happening and ask if they needed anything, now would be the time to request. Many time the owners do not response until they see the construction happening and utilities just do not have the staff to drop what happening to handle rush job. But when able to handle, DOT has been good to allow our Contractor’s equipment time to accomplish.

- One utility said they usually just reconnect without charging the customer. Another asked where is project; Bangor Area and project would be shared with the Utility involved. Mike to follow up with Utility.

Further discussion to happen internally to prevent DOT personnel getting involved in these Utility Company/customer issues; Suggestion – Utilities should contact and advise customers when any work being done that would effect them financially.

o *Open Forum/Other Business*

- Just to follow up on Letter Is, please submit in a timely manner and to the correct coordinator.
- Accommodation Policy- non-pole owners – Poles in ROW – do all need permitting? Yes required to meet DOT requirements.
 - o Believe many are not
 - o Compact areas – permits are issued by Municipality, not DOT – and not required to let DOT know if a permit was issued. This is problem when DOT has project, sometimes cutting through binder pavement for utility construction

Q – If DOT is not notified, and DOT has project in compact area and utility has work in the same area, who do we let know.

- o If know someone on DOT project (e.g. Utility Coord, Proj Mgr) or Brian Burne but Mike will follow up with Brian on the issue and will share information via e-mail.
- ROW Maps – wish to thank Joe Berry for his help with ROW Maps. Very much appreciated with tree issues Utilities are running into. Are they in the ROW or not?
 - o Still have the problem on State Aide Road – Towns responsibility.
- Towns may only have Tax Maps to work from. Most are just wrought portions but work with towns on when might be available for information.

Thank you all for attending. Please keep communications open.

Meeting Adjourned

Action Items:

- Provide Link to High Traffic Corridor Map – Mike (Mike will provide via email when available)
- Holiday work schedule Policy – Mike to add to Web page.
- When will 2014/15 Work Plan be posted - Mike to follow up
- Permitting/compact areas – Mike to discuss with Brian Burne

We have attempted to summarize our meeting as accurately as possible. If you feel that any of the items discussed herein are misrepresented in any way, please contact me within ten working days. In the absence of any corrections or clarifications, it will be understood that these minutes accurately summarize our discussions. Thank you for your continued participation and efforts in making DOT projects successful.

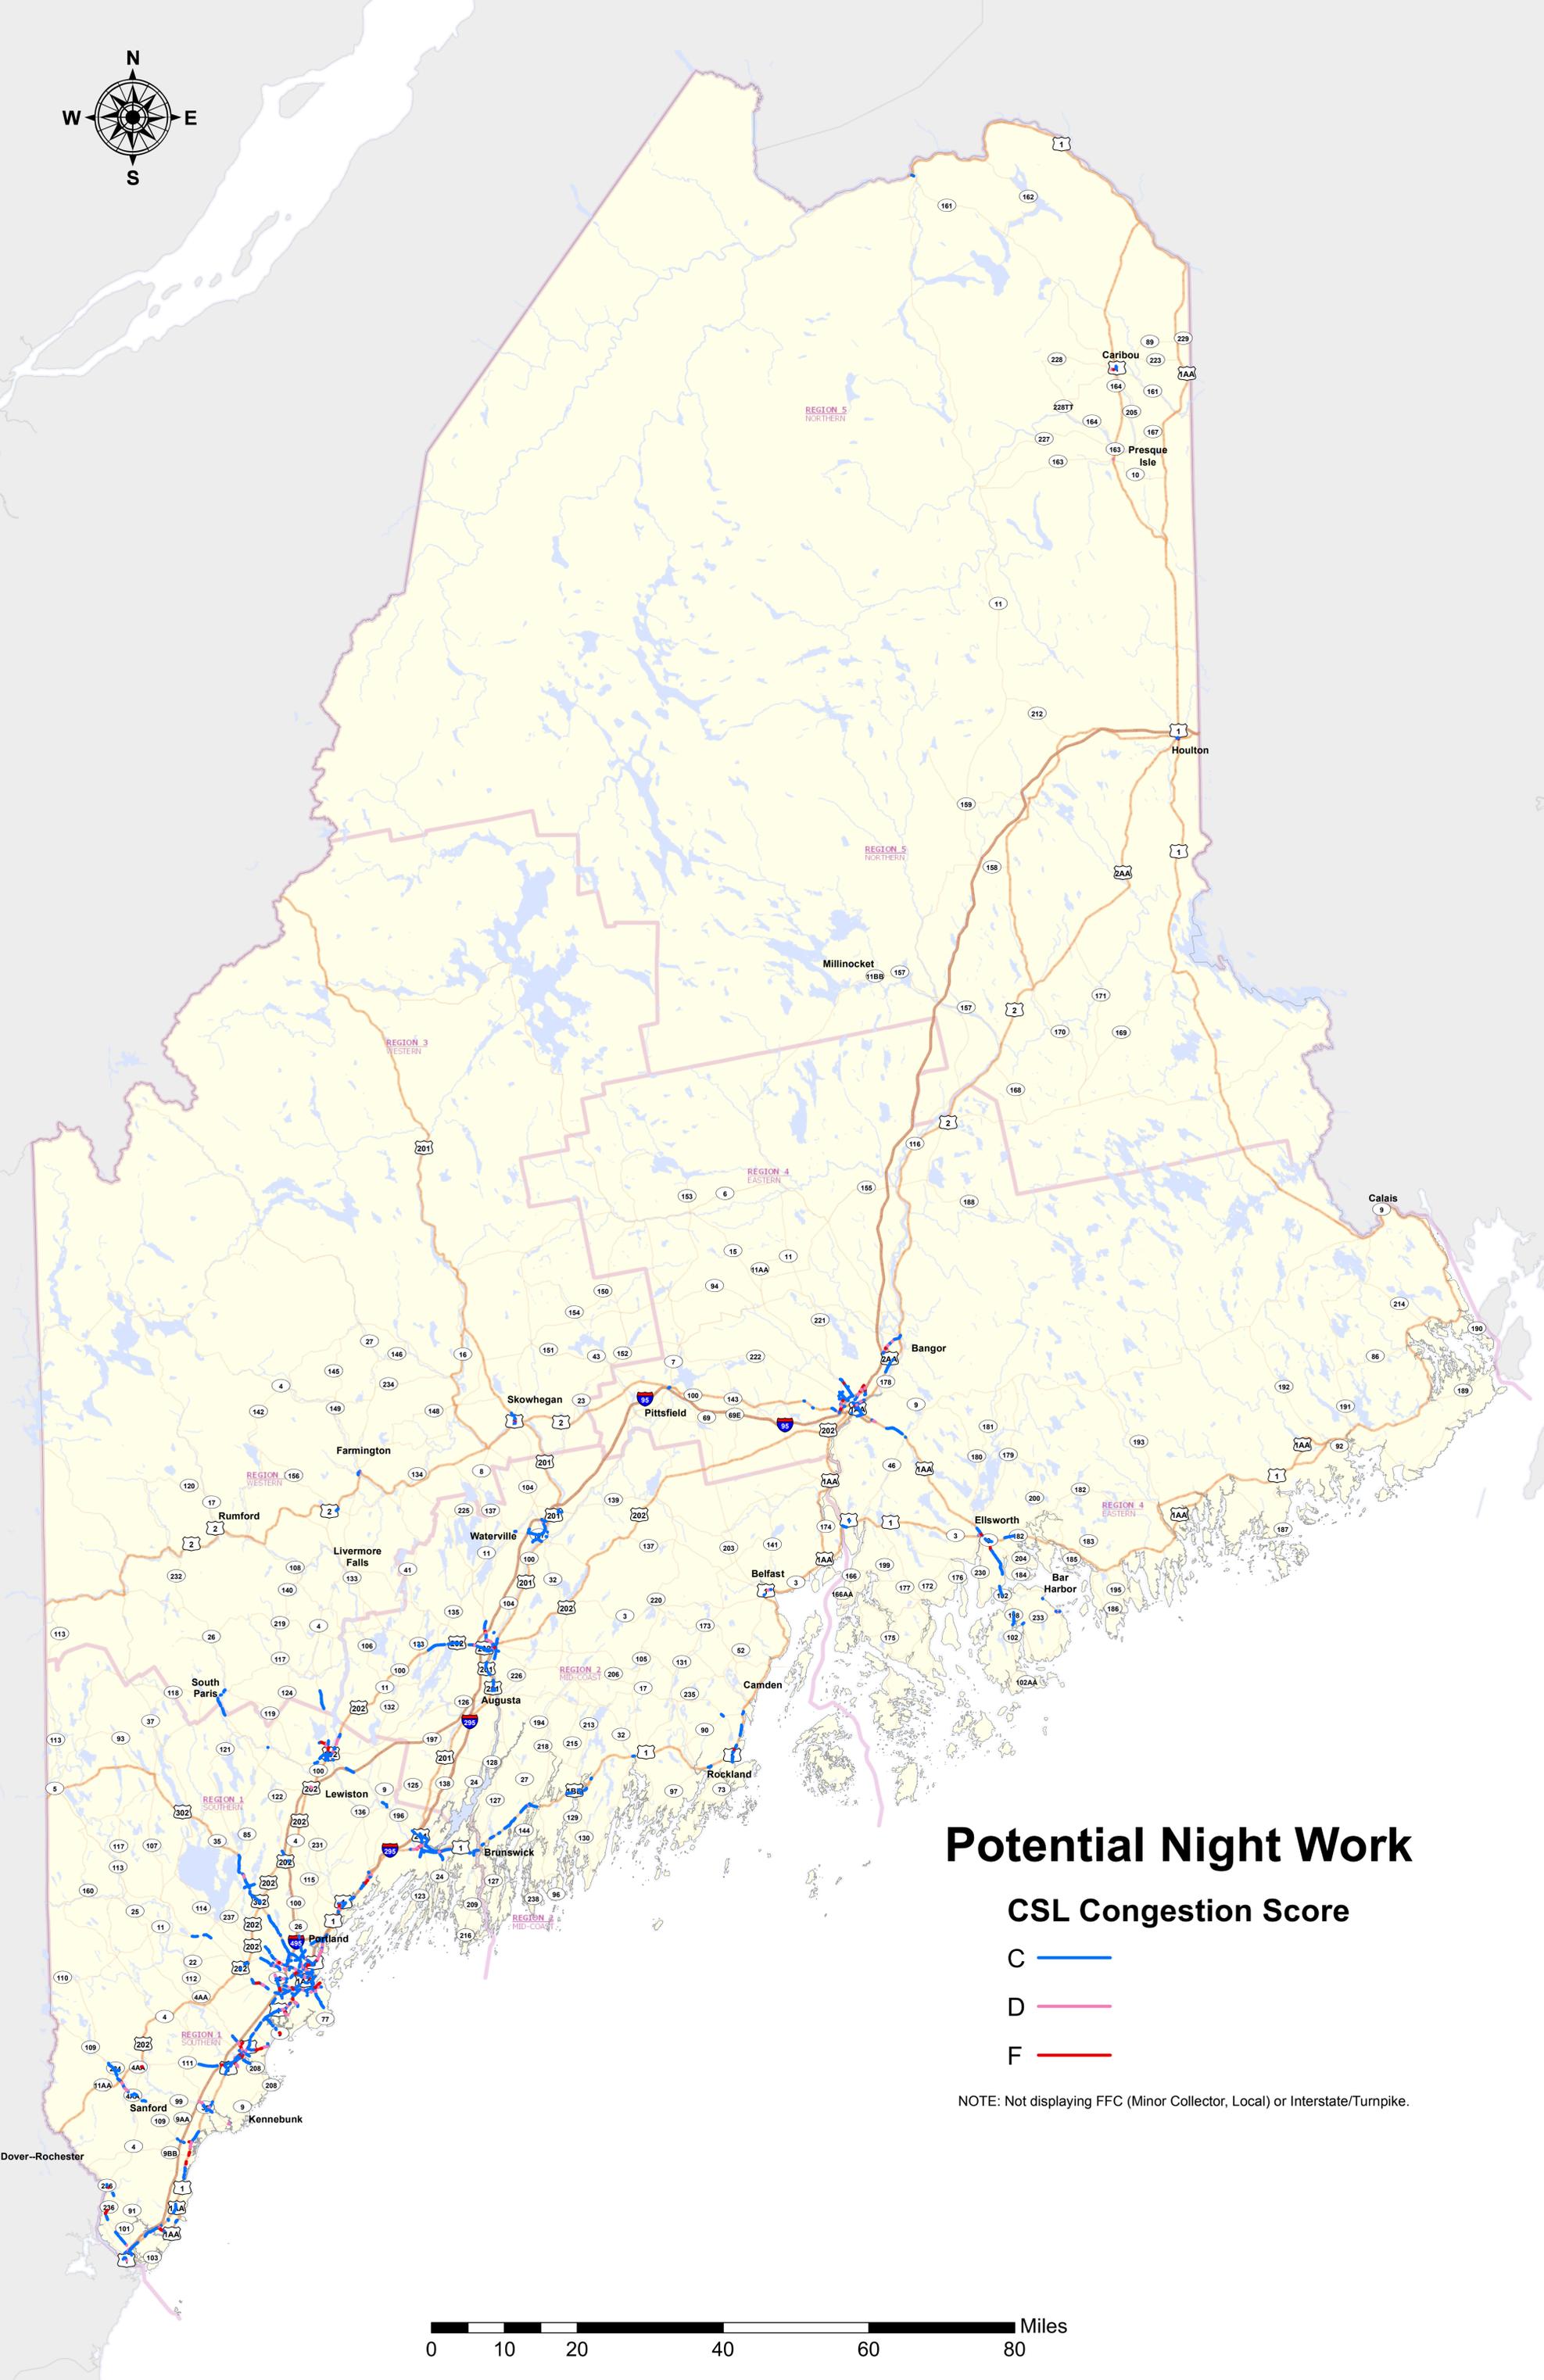

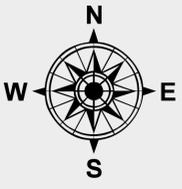

Regards, Mike
