This form must be completed and submitted with the Mileage Schedule B to meet the International Registration Plan (IRP) requirements for declaring estimated distance. To retain eligibility for IRP registration, each vehicle in the fleet must accrue actual distance in two or more jurisdictions after the first year of operation.

Actual distance accrued by the registrant for any vehicle in the fleet during the preceding year must be declared when establishing or renewing an apportioned fleet. "Distance" is the miles or kilometers declared for a jurisdiction. "Preceding Year" is the period of twelve consecutive months immediately prior to July 1 of the year immediately preceding the commencement of the registration or license year for which apportioned registration is sought.

If no travel occurred for a requested jurisdiction during the preceding July 1 through June 30, a reasonable estimate is required to receive registration authority. The percentage factor for any jurisdictions with a second or subsequent year estimate will be calculated over 100%. Estimates should be for a twelve-month projection. However, if one or more jurisdictions have actual distances for less than twelve months, any estimated jurisdictions should be for a similar time frame.

Method 1 – Known Route of Travel (This form may be copied if additional space is needed or attach a separate piece of paper using the same format.)
