Notice of Data Breach

Dear <First Name> <Last Name>,

Fidelity Investments Life Insurance Company ("FILI") is notifying you of a cybersecurity event that has occurred at Infosys McCamish, LLC ("IMS"), a third-party service provider we use in the administration of your FILI life insurance policy. The incident likely resulted in an unauthorized third party obtaining information held by IMS regarding you and your policy. We are writing to provide you with information about this event, and some additional measures you can take to help you protect against possible identity theft or fraud.

WHAT HAPPENED?

In early November, IMS notified us that it experienced a cybersecurity event which disrupted the services that IMS provides for us. Since learning of this event, we have been engaged with IMS to understand IMS's actions to investigate and contain the event, implement remedial measures, and safely restore its services. In response to the incident, IMS retained a third party firm which conducted a forensics investigation of the incident. Through that investigation, IMS learned that between October 29, 2023, and November 2, 2023, an unauthorized third party gained access to certain IMS systems and obtained data stored on those systems. We believe it is likely that the data included certain information about you, as further described below. Please note that this incident did not impact or involve any of FILI's networks or systems.

WHAT INFORMATION WAS INVOLVED?

IMS continues to investigate and review the incident. At this point, they are unable to determine with certainty what personal information was accessed as a result of this incident. However, based on information recently provided by IMS to FILI, we believe that the following information related to you was likely acquired by the third party: your name, Social Security number, state of residence, bank account and routing number (if you provided that information to us to make premium payments on your life insurance policy) and date of birth.

WHAT WE ARE DOING.

We take this event and the security of personal information in our care and in the care of our vendors very seriously. As noted above, upon learning of this incident, we quickly engaged with IMS to understand the nature and scope of the incident and determine the impact on FILI and its customers. Once IMS provided indication that data about some FILI customers may have been exfiltrated by the third party, we conducted a manual review of our records to identify the individuals potentially affected by this event. In addition, we remain engaged with IMS as they continue their investigation of this incident and its impact on the data they maintain for FILI.

WHAT YOU CAN DO.

While we are not aware of any misuse of your personal information because of this incident, **we have arranged for you to enroll, at your option, in credit monitoring and identity restoration services for 24 months at no cost to you.** This service allows you to monitor your credit reports and to detect any unusual activity that may affect your personal financial situation. The service is provided by TransUnion Interactive, a subsidiary of TransUnion, one of the three nationwide credit reporting companies. We encourage you to remain vigilant for fraudulent activity or identity theft by regularly reviewing your statements for your financial and other accounts, monitoring your credit reports, and promptly reporting any suspicious activity to local law enforcement, or your appropriate state authority. For details on additional ways to protect yourself, please refer to the enclosed instruction sheet.

FOR MORE INFORMATION.

If you have additional questions regarding this incident, please feel free to call us at (844) 528-1268, Monday through Friday from 8:30 am to 7:00 pm ET.

Notice of Data Breach

Dear <First Name><Last Name>,

Empire Fidelity Investments Life Insurance Company (“EFILI”) is notifying you of a cybersecurity event that has occurred at Infosys McCamish, LLC (“IMS”), a third-party service provider we use in the administration of certain EFILI life insurance policies. The incident likely resulted in an unauthorized third-party obtaining certain personal information about you (details of which are provided below) that was held by IMS. We had received your personal information from the holder of a policy that we issued. We are writing to provide you with information about this event, and some additional measures you can take to help you protect against possible identity theft or fraud.

WHAT HAPPENED?

In early November, IMS notified us that it experienced a cybersecurity event which disrupted the services that IMS provides for us. Since learning of this event, we have been engaged with IMS to understand IMS’s actions to investigate and contain the event, implement remedial measures, and safely restore its services. In response to the incident, IMS retained a third party firm which conducted a forensics investigation of the incident. Through that investigation, IMS learned that between October 29, 2023, and November 2, 2023, an unauthorized third party gained access to certain IMS systems and obtained data stored on those systems. We believe it is likely that the data included certain information about you, as further described below. Please note that this incident did not impact or involve any of EFILI’s networks or systems.

WHAT INFORMATION WAS INVOLVED?

IMS continues to investigate and review the incident. At this point, they are unable to determine with certainty what personal information was accessed as a result of this incident. However, based on information recently provided by IMS to EFILI, we believe that the following information related to you was likely acquired by the third party: your name, Social Security number and, if provided by the policy holder, your address.

WHAT WE ARE DOING.

We take this event and the security of personal information in our care and in the care of our vendors very seriously. As noted above, upon learning of this incident, we quickly engaged with IMS to understand the nature and scope of the incident and determine the impact on EFILI and its customers. Once IMS provided indication that data about some EFILI policies may have been exfiltrated by the third party, we conducted a manual review of our records to identify the individuals potentially affected by this event. In addition, we remain engaged with IMS as they continue their investigation of this incident and its impact on the data they maintain for EFILI.

WHAT YOU CAN DO.

While we are not aware of any misuse of your personal information because of this incident, **we have arranged for you to enroll, at your option, in credit monitoring and identity restoration services for 24 months at no cost to you.** This service allows you to monitor your credit reports and to detect any unusual activity that may affect your personal financial situation. The service is provided by TransUnion Interactive, a subsidiary of TransUnion, one of the three nationwide credit reporting companies. ADDITIONAL STEPS TO PROTECT YOURSELF

Directions for Placing a Fraud Alert:

You may want to consider placing an initial fraud alert on your credit file. A fraud alert tells creditors to contact you before they open any new accounts or change your existing accounts. You may place a fraud alert in your file by calling one of the three nationwide credit reporting agencies. The agency that processes your fraud alert will notify the other two credit reporting agencies on your behalf. An initial fraud alert stays on your credit report for 90 days. When you place this alert on your credit report, you will receive information about ordering one free credit report from each of the credit reporting companies. Once you receive your reports, review them carefully for inquiries from companies you did not contact, accounts you did not open, and debts on your accounts that you cannot explain. Verify the accuracy of your Social Security number, address(es), full name and employer(s). Notify the credit reporting companies if any information is incorrect.

Notice of Data Breach

Dear <First Name><Last Name>,

Fidelity Investments Life Insurance Company ("FIL") is notifying you of a cybersecurity event that has occurred at Infosys McCamish, LLC ("IMS"), a third-party service provider we use in the administration of your FIL life insurance policy. The incident likely resulted in an unauthorized third party obtaining information held by IMS regarding you and your policy. We are writing to provide you with information about this event, and some additional measures you can take to help you protect against possible identity theft or fraud.

WHAT HAPPENED?

In early November, IMS notified us that it experienced a cybersecurity event which disrupted the services that IMS provides for us. Since learning of this event, we have been engaged with IMS to understand IMS's actions to investigate and contain the event, implement remedial measures, and safely restore its services. In response to the incident, IMS retained a third party firm which conducted a forensics investigation of the incident. Through that investigation, IMS learned that between October 29, 2023, and November 2, 2023, an unauthorized third party gained access to certain IMS systems and obtained data stored on those systems. We believe it is likely that the data included certain information about you, as further described below. Please note that this incident did not impact or involve any of FIL's networks or systems.

WHAT INFORMATION WAS INVOLVED?

IMS continues to investigate and review the incident. At this point, they are unable to determine with certainty what personal information was accessed as a result of this incident. However, based on information recently provided by IMS to FIL, we believe that the following information related to you was likely acquired by the third party: your name, Social Security number, and date of birth.

WHAT WE ARE DOING.

We take this event and the security of personal information in our care and in the care of our vendors very seriously. As noted above, upon learning of this incident, we quickly engaged with IMS to understand the nature and scope of the incident and determine the impact on FIL and its customers. Once IMS provided indication that data about some FIL customers may have been exfiltrated by the third party, we conducted a manual review of our records to identify the individuals potentially affected by this event. In addition, we remain engaged with IMS as they continue their investigation of this incident and its impact on the data they maintain for FIL.

WHAT YOU CAN DO.

While we are not aware of any misuse of your personal information because of this incident, **we have arranged for you to enroll, at your option, in credit monitoring and identity restoration services for 24 months at no cost to you.** This service allows you to monitor your credit reports and to detect any unusual activity that may affect your personal financial situation.
