RE: NASPO ValuePoint Master Service Agreement #MA176 (the "Contract") with T-Mobile USA, Inc. ("Contractor" or "T-Mobile")

Dear Ms. Woodward:

Action Requested:

Contractor requests to add the product(s) and/or service(s) referenced in this document (collectively, the "Products") to the Contract.

Action Log: X Verify Log is attached

PRODUCTS: T-Mobile SASE (Secure Access Service Edge) provided by Versa, a third-party provider ("Third-Party Provider" or "Versa")

PRODUCT OVERVIEW:

T-Mobile SASE offers a set of security capabilities that protects access for the work-from-anywhere workforce and remote devices (e.g. IoT, routers, fixed wireless) with a suite of advanced security capabilities on a single, unified platform for a simpler, scalable, and cost-effective solution.

T-Mobile SASE provides this protection through the capabilities of Private Access and Secure Internet Access while offering two authentication options.

Private Access uses a modern secure connection that enables protected access to company apps and data. It offers the following features:

- User Authentication and authorization offering least privileged access, ensuring only authorized users gain access to the application required.
- Direct access to cloud-hosted applications from the T-Mobile cloud gateway.

Secure Internet Access (SIA) offers a suite of advanced security capabilities that safeguards users and their data when using the internet. It offers the following features:

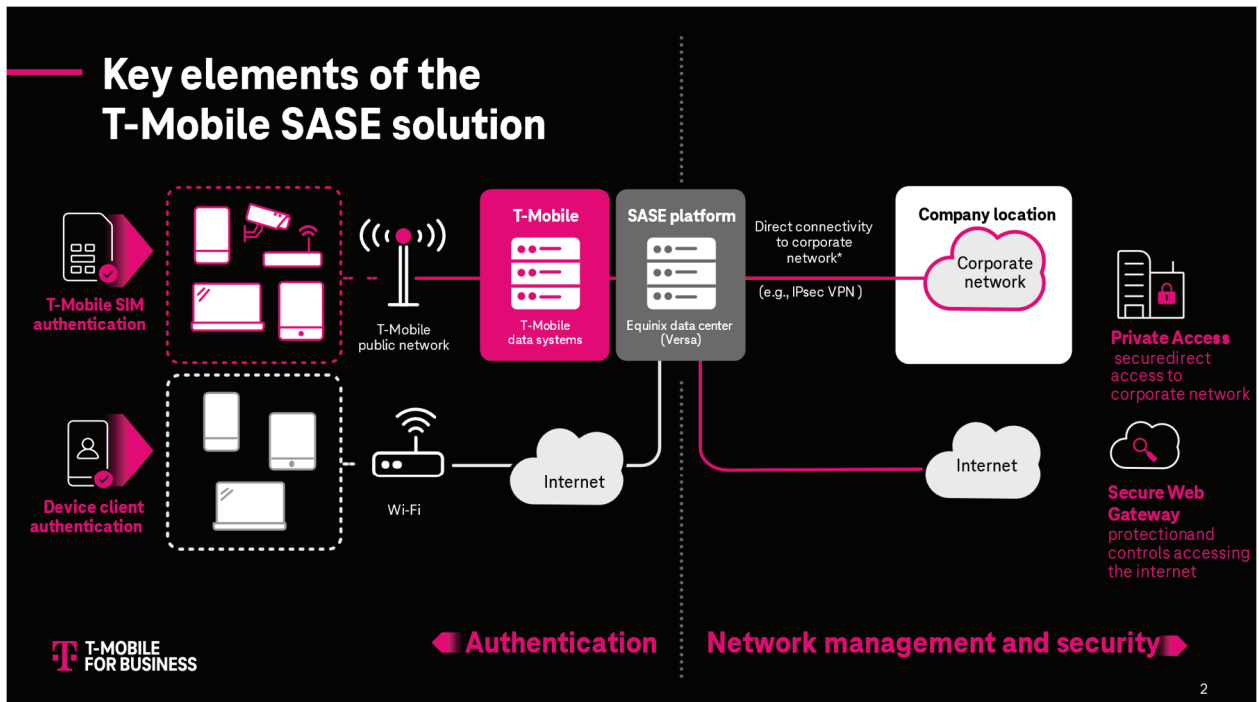

NASPO ValuePoint Wireless Data, Voice and Accessories Product Add Request

- Next-generation firewall to inspect traffic for threats as it comes from the internet to keep the threat from making it to the user's device or organization's intranet. Traffic inspection is looking for ransomware, malware, and viruses.
- Content filtering restricts access to websites, reducing threats of visiting a malicious site as well as potential time-wasting personal browsing.

Two Authentication Options

T-Mobile SASE offers two options to authenticate and safeguard access for users and devices. An organization could have some workers with one or the other, or both, depending on the use case, type of device, and work situation:

- T-SIMsecure (clientless) is an Industry 1st- unique to T-Mobile. T-SIMsecure integrates with the T-Mobile network to provide automatic authorization for access and protection, for a single device when on the T-Mobile network by using the T-Mobile SIM card.
- SASE device client provides authorized access and protections to users when connected to Wi-Fi or another cellular network.
