SUBJECT: Notice of Conditional Contract Award(s) under RFA # **202204059**  
**CTE Infrastructure**

Dear Superintendent James Anastasio,

This letter is in regard to the Request for Applications (RFA), issued by the State of Maine Department of Education for CTE Infrastructure. The Department has evaluated the proposals received using the evaluation criteria identified in the RFA, and the Department is hereby announcing its conditional contract awards to the following bidders:

- Biddeford- Biddeford Regional Center for Technology
- Lincoln- Northern Penobscot Tech.-Region 3
- Mexico- School of Applied Technology - Region 9
- Norway- Oxford Hills Technical School -Region 11

The bidders listed above received the evaluation team's highest rankings.

**Per the RFA Section D, paragraph three:**

All proposals that meet a combined score of 65 or more points for Criteria 2: Specifications of the Work to be Performed, Criteria 4: Budget Proposal, and Criteria 5: Evaluation will be considered eligible for funding **as it is available**. After making the conditional awards to the four highest scoring Applications, the available funding was exhausted, so no further awards could be made.

The Department will be contacting the aforementioned bidders soon to negotiate a contract. As provided in the RFA, the Notice of Conditional Contract Award is subject to execution of a written contract and, as a result, this Notice does NOT constitute the formation of a contract between the Department and the apparent successful vendor. The vendor shall not acquire any legal or equitable rights relative to the contract services until a contract containing terms and conditions acceptable to the Department is executed. The Department further reserves the right

to cancel this Notice of Conditional Contract Award at any time prior to the execution of a written contract.

As stated in the RFA, following announcement of this award decision, all submissions in response to the RFA are considered public records available for public inspection pursuant to the State of Maine Freedom of Access Act (FOAA). 1 M.R.S. §§ 401 et seq.; 5 M.R.S. § 1825-B (6).

This award decision is conditioned upon final approval by the State Procurement Review Committee and the successful negotiation of a contract. A Statement of Appeal Rights has been provided with this letter; see below.

Thank you for your interest in doing business with the State of Maine.

Sincerely,

*Steven Airoidi*

**Per the RFA Section D, paragraph three:**

All proposals that meet a combined score of 65 or more points for Criteria 2: Specifications of the Work to be Performed, Criteria 4: Budget Proposal, and Criteria 5: Evaluation will be considered eligible for funding **as it is available**. After making the conditional awards to the four highest scoring Applications, the available funding was exhausted, so no further awards could be made.

The Department will be contacting the aforementioned bidders soon to negotiate a contract. As provided in the RFA, the Notice of Conditional Contract Award is subject to execution of a written contract and, as a result, this Notice does NOT constitute the formation of a contract between the Department and the apparent successful vendor. The vendor shall not acquire any legal or equitable rights relative to the contract services until a contract containing terms and conditions acceptable to the Department is executed. The Department further reserves the right

to cancel this Notice of Conditional Contract Award at any time prior to the execution of a written contract.

As stated in the RFA, following announcement of this award decision, all submissions in response to the RFA are considered public records available for public inspection pursuant to the State of Maine Freedom of Access Act (FOAA). 1 M.R.S. §§ 401 et seq.; 5 M.R.S. § 1825-B (6).

This award decision is conditioned upon final approval by the State Procurement Review Committee and the successful negotiation of a contract. A Statement of Appeal Rights has been provided with this letter; see below.

Thank you for your interest in doing business with the State of Maine.

Sincerely,

**Evaluation Team Comments:**

1. *Does this project align secondary CTE programs to occupations that lead to employment which provides an entry annual wage meeting the state average, and the Maine workforce outlook projections demonstrate substantive growth?*
  - Answered well. Hit all the high points and tied in growth. Sufficient data.
  - Concern – a lot of data but not directly connected to budgeted CIP. Challenging to reconcile what he meant in reflection of CIP code.
  - Show a comprehensive economic need. Pulling in CDL as it is a shared space. Helping two programs with same funds.
  - About housing equipment... is it expanding program - yes
  - Does indicate sharing the space with CDL and used CIP. Is CDL needed for Ag?
  - Axillary supports for programs
  
2. *Alignment of secondary CTE programs to national and/or state industry standards which increase the CTE programs capacity to teach students technical skills required to join the workforce.*
  - stackable credentials. Doesn't call out specifications for CIP.
  - pesticide applicator license.
  - could have put in more work around tech skills for the workforce.
  
3. *Alignment of secondary CTE programs to postsecondary education and/or training opportunities, if applicable, to provide certifications, licensures, college degrees, volunteerism, and apprenticeships.*
  - cited limited dual enrollment. Is part of the nature of the program as some programs don't align as well to psec. Students get 3 credits dual enrollment.
  - May be giving available options.
  - apprenticeships and volunteerism... no details are given.
  - not answered as well as it could have been.

4. *Engagement of secondary CTE programs with business and industry partners to provide career pathway connections between students and the workforce. With this project, what new career pathways will be developed for students to enter the workforce?*
- industry are there through PAC
  - first part was answered well, but didn't see anything around new career pathways.
  - talked about what he has done, but not how it will increase.
5. *Engage the secondary CTE program advisory committees when determining the infrastructure updates required to meet the objectives of these funds?*
- PAC were involved in short-term and long-term goals. Supports what they want to do in the program.
  - PACs invested in program.
  - details on the equipment, but not the building – need to be careful with reading into what is written.
  - needed to work on the equipment that is needed for the program. The other goals can't be discussed without a building. Could have provided more details.
6. *Addresses program safety and educational requirements to provide the essential safety levels of a DOE approved program and/or improve the educational outcomes of the program(s).*
- safety of being out in the elements.
  - modernizing sprinkler system.
  - currently require students to be out in the element – likely as that is related to what farmers do.
  - expand curriculum if they can do work during the winter that they can't do now.
7. *Does this project align with the planning specifications provided by the Major Capital School Construction Programs? ([Educational Specifications](#), [Space Allocation Guidelines](#), [Standards & Guidelines for New School Construction & Major Renovation Projects](#))*
- referenced documents – but could have been more detailed.
  - is instructional space = to lab – (yes this is their technical space)
  - Shows he reviewed docs, but could have been a bit more detailed
  - met some of the issues. How would it affect educational instruction. Maybe too much jargon and could have been more to the point. If you are not a grant writer it is sometimes hard to know how to make a point.

- no guidelines given for space allocation needs. Is there enough dialog? What does construction discuss? Geographic CTEs in area – do we look at where economic growth through projects?
- looks at students, equipment going in, needs per square foot, safety.
- noted that Q&A stated they only need to understand they have to meet qualifications will hire those with the understanding. Focus on application.
- Space allocation using chapter 232 – this additional space will increase what he has. If currently provide a safe environment this would enhance the space. Had architect weigh in as this isn't a space we usually look at. Geographic – Ag programs of other schools reflect in need? Reviewing as Caribou and not the region.

**Evaluation Team Comments:**

1. *Application provides a description of how school will use DOE data reports to show successful increased alignment to the Governor's priority industries and Maine's workforce and economic recovery needs.*
  - Talks about baseline in academics and not as much program specific. Did talk about postsecondary. Has pre and post plan.
  - a bit vague on project in alignment with evaluation. Could have noted increases based on space.
  - no curriculum aligned to project.
  - Perkins indicators are referenced. Not tied to project.
  - notes offer more apprenticeship and can measure outcome.
  - would have liked more details, but is referencing back to what was asked. Did a good job at noting what he will do to measure. May have missed credentialing, may not be specifically aligned to project, but at the program level he met the need.
  
2. *Application provides a description of how successful outcomes will be continued.*

**Evaluation Team Comments:**

- Does this project align secondary CTE programs to occupations that lead to employment which provides an entry annual wage meeting the state average, and the Maine workforce outlook projections demonstrate substantive growth?*

**Comments:**

- good, but no detail data
- Started with schoolwide information and not necessarily directly related to project. May have been RFA questions as building wide vs specific programs.
- Facility is upgraded to support programs.

- Alignment of secondary CTE programs to national and/or state industry standards which increase the CTE programs capacity to teach students technical skills required to join the workforce.*

**Comments:**

- No specifics on what equipment can't be used with updates. Good, but could have been more tied to program. Connections would have helped justify building upgrade needs.

- Alignment of secondary CTE programs to postsecondary education and/or training opportunities, if applicable, to provide certifications, licensures, college degrees, volunteerism, and apprenticeships.*

**Comments:**

- answer reflected maintaining vs expanding, but is needed to keep programs enrolled.
- details on how the project increases.
- Will this keep school from decrease in enrollment. Could have been much more persuasive.

- Engagement of secondary CTE programs with business and industry partners to provide career pathway connections between students and the workforce. With this project, what new career pathways will be developed for students to enter the workforce?*

**Comments- 3 Projects**

---

- Is the key card need just CATC?
  - Other safety funds that could have been used?
- 

**Evaluation Team Comments:**

1. *Does this project align secondary CTE programs to occupations that lead to employment which provides an entry annual wage meeting the state average, and the Maine workforce outlook projections demonstrate substantive growth?*

**Comments:**

- Small amount of detail added from brief narrative. A. and B. well done C. not as much.

2. *Alignment of secondary CTE programs to national and/or state industry standards which increase the CTE programs capacity to teach students technical skills required to join the workforce.*

**Comments:**

- didn't mention specific standards.
- Did support expanding standards... not a lot of detail.

3. *Alignment of secondary CTE programs to postsecondary education and/or training opportunities, if applicable, to provide certifications, licensures, college degrees, volunteerism, and apprenticeships.*

**Comments:**

- no specifics given.
- Food pad – this is for the trailer that is already owned. How is this connected to question asked?

4. *Engagement of secondary CTE programs with business and industry partners to provide career pathway connections between students and the workforce. With this project, what new career pathways will be developed for students to enter the workforce?*

**Comments:**

- Gave standard answer for each section, could have given more detail for each specific section.

**Evaluation Team Comments:**

1. *Does this project align secondary CTE programs to occupations that lead to employment which provides an entry annual wage meeting the state average, and the Maine workforce outlook projections demonstrate substantive growth?*

Comments:

- expansion of 3 programs that align.
- could have given more details on project connection to expansion.

2. *Alignment of secondary CTE programs to national and/or state industry standards which increase the CTE programs capacity to teach students technical skills required to join the workforce.*

Comments:

- Gave big picture, but didn't give details on impact connected to project. Do have industry standards.

3. *Alignment of secondary CTE programs to postsecondary education and/or training opportunities, if applicable, to provide certifications, licensures, college degrees, volunteerism, and apprenticeships.*

**Comments:**

- all programs aligned.
- could have given more details on specific programs.

4. *Engagement of secondary CTE programs with business and industry partners to provide career pathway connections between students and the workforce. With this project, what new career pathways will be developed for students to enter the workforce?*

**Comments:**

- Details on programs is hard to align to project.

5. *Engage the secondary CTE program advisory committees when determining the infrastructure updates required to meet the objectives of these funds?*

**Comments:**

- mentioned survey to industry.

Comments: most of the programs listed are already aligned to national standards as part of their program approval process in some of them have been done within the last two years. They have not gone through a school review or several the programs are so new but they documented which standards they did align with
<div style="border: 1px solid black; height: 20px; width: 100%;"></div>

<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Comments: the additional space does allow them to do more in house in case of a different pandemic was to hit again or a resurgence. The school had continued to offer its endorsements and certifications along with dual enrollment opportunities to students the additional space will just help to continue practice
<ul style="list-style-type: none"> <li>Engagement of secondary CTE programs with business and industry partners to provide career pathway connections between students and the workforce. With this project, what new career pathways will be developed for students to enter the workforce?</li> </ul>
<input type="checkbox"/> Yes <input type="checkbox"/> No
Comments: reading the comments, it appears the a school will continues its advisory membership as a way to interact but I did not see how this project is increasing that involvement. The only increase will be from the additional programs that the school will bring on which these committees would automatically be part of anyways

<b>Criteria 2: Specifications of Work to be Performed</b> (Do projects accomplish the following?)
---

- |  |
|--|
| • Does this project align secondary CTE programs to occupations that lead to employment which provides an entry annual wage meeting the state average, and the Maine workforce outlook projections demonstrate substantive growth? |
|--|

x Yes <input type="checkbox"/> No
-----------------------------------

<u>Comments:</u> Additional classroom for machine tooling does appear to align by allowing students the additional CNC training. The culinary food trailer pad also provides an opportunity for food trailer, which is a different space/style of cooking and new opportunity for different kind of catering for students. The keypad system does increase security at the school in. And as a general rule. But does not appear to align with. The priorities at this time.

<ul style="list-style-type: none"> <li>Alignment of secondary CTE programs to postsecondary education and/or training opportunities, if applicable, to provide certifications, licensures, college degrees, volunteerism, and apprenticeships.</li> </ul>
x Yes <input type="checkbox"/> No
<p><u>Comments:</u> I cannot replace say if the opportunities for post secondary will be increase with the additional classroom or the food pad...can allow for greater depth of knowledge in each field and could lead to apprenticeship or live work opportunities.</p>
<ul style="list-style-type: none"> <li>Engagement of secondary CTE programs with business and industry partners to provide career pathway connections between students and the workforce. With this project, what new career pathways will be developed for students to enter the workforce?</li> </ul>
xYes <input type="checkbox"/> No
<p><u>Comments:</u> the school identified the machine tool classroom project may not increase the business and industry partnerships at this time beyond just having a better learning environment for the students. This in itself maybe increase that partnership by aligning with industries current structures. The addition of the food trailer pad project can increase the programs visibility to the public by having it in such a way that it will be at events or events around the pad shall increase the visibility of the program</p>

<u>Comments:</u> all three projects do have elements which will increase safety in its. The key car building security system appears to be only focused on safety but if students don't feel safe they have less opportunities to learn so maybe in some situations the additional card safety system could help students or faculty. No data was given that students and fac/staff feel unsafe at Capital without the system.

- Addresses program safety and educational requirements to provide the essential safety levels of a DOE approved program and/or improve the educational outcomes of the program(s).

xYes  No

Comments: it seems to reason that newer technologies versus information resources found in the 70s would be better....if the dust collection system is improperly designed installed and causing a hazard and should be removed regardless of this grant. The need for airborne particulates should be addressed either way

- Does this project align with the planning specifications provided by the Major Capital School Construction Programs?

Comments: it would appear from reading the details in the submission that the additional space will help in one program for students to be able to move around more and practice they're coping techniques more comfortably at the same time. In the other program of mass media it appears the additional sound recording studio will allow for the program to meet the required standards with greater ease. The ventilation system does help with air quality as it relates to the construction dust collection

- Alignment of secondary CTE programs to postsecondary education and/or training opportunities, if applicable, to provide certifications, licensures, college degrees, volunteerism, and apprenticeships.

Yes  No

Comments: the additional space and mass media program would allow for possibility of adding additional certifications to the program. In the culinary arts program they will continue to look at expanding postsecondary in concurrent enrollments

- Engagement of secondary CTE programs with business and industry partners to provide career pathway connections between students and the workforce. With this project, what new career pathways will be developed for students to enter the workforce?

Yes  No

Comments: Advisory committee have stated the additional elements for the school would increase and mimic what industry is doing currently

- Engage the secondary CTE program advisory committees when determining the infrastructure updates required to meet the objectives of these funds?

Yes  No

Comments: it appears the committees provide the insights to what is needed for the programs and the expansion of the spaces along with the need for better air quality

- Addresses program safety and educational requirements to provide the essential safety levels of a DOE approved program and/or improve the educational outcomes of the program(s).

x Yes  No

Comments: using the committees, the school identified programs that needed to have classroom expansions, and also in need for better air quality. At first glance the air qual it may not appear to help align with meeting state workforce projections but if air quality is improved, students may have the ability attend classes were in the past, they have not have, like during the COVID-19 events

Comments: My assumption is the less travel may allow to the farm as the reasoning given that extra time savings of two or miles between the two areas will increase the students ability to work. One part I'm confused about is the standard section is talking about pruning of the trees and the ability to grow items but the program listed as one that will be affected by this addition is the farm mechanics program which doesn't participate in much of this education as I understand it

- Alignment of secondary CTE programs to postsecondary education and/or training opportunities, if applicable, to provide certifications, licensures, college degrees, volunteerism, and apprenticeships.

Yes  No

Comments: a narrative read more like a program that is teaching planting and growing versus repairing mechanical machinery which was the program listed in the budget section

- Engagement of secondary CTE programs with business and industry partners to provide career pathway connections between students and the workforce. With this project, what new career pathways will be developed for students to enter the workforce?

Yes  No

Comments:

- Engage the secondary CTE program advisory committees when determining the infrastructure updates required to meet the objectives of these funds?

Yes  No

Comments: multiple committees gave feedback as to this expansion

- Addresses program safety and educational requirements to provide the essential safety levels of a DOE approved program and/or improve the educational outcomes of the program(s).

Yes  No

Comments: the school feels having the field or lab right next to the classroom will increase enrollment

Comments: because of the scope of the project and the details about each upgrade it might be challenging in this section to provide that level of detail beyond what has been provided. I'm OK with the information that was given and the level of detail about the other sections just because of the amount of work to be included. With this being said, it's still challenging for these upgrades types to directly linked to how they will show demonstrate growth in CTE. The details are more about retaining enrollment versus not being able to offer program because of unsafe environment

<ul style="list-style-type: none"> <li>Alignment of secondary CTE programs to national and/or state industry standards which increase the CTE programs capacity to teach students technical skills required to join the workforce.</li> </ul>
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Comments: upgrades that were described with the ventilation/electrical loan themselves to be aligned only blding upgrades not with technical teaching standards. Each program is approved using standards. Upgrades are to continue offering a clean/safe teaching environment
<ul style="list-style-type: none"> <li>Alignment of secondary CTE programs to postsecondary education and/or training opportunities, if applicable, to provide certifications, licensures, college degrees, volunteerism, and apprenticeships.</li> </ul>
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Comments: The school sees this as an opportunity to offer year round classes which they anticipate will offer additional opportunities and partnerships to students
<ul style="list-style-type: none"> <li>Engagement of secondary CTE programs with business and industry partners to provide career pathway connections between students and the workforce. With this project, what new career pathways will be developed for students to enter the workforce?</li> </ul>
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Comments: the school feels the cost savings this grant would provide them instead of upgrading the building with their current budget in using this grant, they will help city programs by focusing the funds on CTE curriculum versus repairs. It did not mention if additional pathways will be developed because of this grant directly
<ul style="list-style-type: none"> <li>Engage the secondary CTE program advisory committees when determining the infrastructure updates required to meet the objectives of these funds?</li> </ul>
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Comments: it is stated the committees have provided insight to safe working environments and I believe the intent of these improvements is to increase safe working environments. it did not state the committees gave direct feedback on these particular projects

I, Dwight Littlefield, accept the offer to become a member of the Request for Proposals (RFP) Evaluation Team for the State of Maine Department of Education. I do hereby accept the terms set forth in this agreement AND hereby disclose any affiliation or relationship I may have in connection with a bidder who has submitted a proposal to this RFP.

Neither I nor any member of my immediate family have a personal or financial interest, direct or indirect, in the bidders whose proposals I will be reviewing. "Interest" may include, but is not limited to: current or former ownership in the bidder's company; current or former Board membership; current or former employment with the bidder; current or former personal contractual relationship with the bidder (example: paid consultant); and/or current or former relationship to a bidder's official which could reasonably be construed to constitute a conflict of interest (personal relationships may be perceived by the public as a potential conflict of interest).

I have not advised, consulted with or assisted any bidder in the preparation of any proposal submitted in response to this RFP nor have I submitted a letter of support or similar endorsement.

I understand and agree that the evaluation process is to be conducted in an impartial manner without bias or prejudice. In this regard, I hereby certify that, to the best of my knowledge, there are no circumstances that would reasonably support a good faith charge of bias. I further understand that in the event a good faith charge of bias is made, it will rest with me to decide whether I should be disqualified from participation in the evaluation process.

**I agree to hold confidential all information related to the contents of Requests for Proposals presented during the review process until such time as the Department formally releases the award decision notices for public distribution.**
