EXTENSION OF ANNUAL CONTRACT

Commodity Item: Above Ground Single & Dual Compartment Fuel Tanks

Contractor: John W Kennedy Co Inc

Contract Period Extended To: 5/6/18

Current Pricing: See attached spreadsheet

New Lower Pricing: Adjust attached spreadsheet and e-mail back to me with this form

Extension Clause: The State reserves the right to extend this contract for a period of one year, with the consent of the contractor.

Agreement to Extend Contract:

In accordance with the above referenced Extension Clause, the undersigned agrees to continue in effect said Contract No # MA 050507*232 until May 6, 2018 with all terms, conditions remaining as shown in the original contract.

Copy of which is acknowledged on this date.

Contractor: JOHN W. KENNEDY CO

By: DAVID L. BLANCHETTE OPERATIONS MANAGER

E-mail Address: DLB@JWKEMAIL.COM

Date: 6-9-17

Dollar value the State has spent on this contract from 5/7/16 to present: \$

QUOTATION SPECIFICATION FORM

RFQ # 17D 1503170000000000749

Above Ground Dual/Split Compartment Fuel Tank

MaineDOT Dual/Split Compartment AST

The purpose and intent of these specifications is to describe Dual/Split compartment double wall steel self-contained Above Ground Storage Tank (AST) with dispensers.

INSTRUCTIONS FOR COMPLETING TECHNICAL SPECIFICATION SHEET

Please complete the checklist for technical specifications set forth below. Each Bidder must indicate whether it can meet the technical specifications by inserting an "X" next to each specification. The "X" will demonstrate that the Bidder's offering meets the technical specification. If a Bidder cannot meet a technical specification, then the Bidder must give an explanation for each exception and for equipment that is not available or that will be dealer installed. All explanations must be provided in detail on separate pages along with the justification as to why the alternative equipment or deliverables will be as good as the equipment or deliverables described in the detailed specifications for desired items. A copy of the vendor specification proposal must be provided. Following these instructions is essential for proper bid evaluation. **If a Bidder fails to provide requested information or if information on a quote is found to be false or misleading, the quote will be rejected as unresponsive. The award will be made on a best value basis to the vendor that either meets or most closely meets the specifications, while taking price and delivery into consideration.**

The following abbreviations must be used by interested Bidders:

X	Meeting Specification
N/A	Not Available
DI	Dealer Installed
AE	Approved equal process

1.0 Standards

- 1.1 Acceptable Manufacturer: Modern Welding Company of Ohio, Inc or approved equivalent. The State of Maine reserves the right to evaluate alternates and determine equivalency, in accordance with 5 MRSA §1825(B), "Alternate Bids".
- 1.2 U.L. 142, Underwriters Laboratories, Inc., Steel Aboveground Tanks for Flammable and Combustible Liquids.
- 1.3 U.L. 2085, Underwriters Laboratories 2 Hour Fire Rating's Standard for Insulated Aboveground Storage Tanks for Flammable and Combustible Liquids.
- 1.4 NFPA 30, National Fire Protection Association Flammable and Combustible Code.
- 1.5 NFPA 30A, National Fire Protection Association Automotive and Marine Service Station Code.
- 1.6 Uniform Fire Code International Fire Code Institute.
- 1.7 B.O.C.A. National Fire Prevention Code.
- 1.8 NFPA 31, Standard for Installation of Oil Burning Equipment.
- 1.9 PEI/RP200- Petroleum Equipment Institute, Recommended Practices for Installation of Aboveground Storage Systems for Motor Vehicle Fueling.

2.0 Submittals

- 2.1 Shop Drawings: Contractor shall submit Three 3 ___ copies of shop drawings for each tank, location of fittings, and accessories with specific dimensions shall be shown on all drawings.
- 2.2 Drawing Approval: Contractor shall receive drawing approval prior to product fabrication.
- 2.3 Catalog Data: Contractor shall submit ___3___ current copies of manufacturer's literature.
- 2.4 Certification: Each tank shall bear the U.L. 2085 label for "Insulated Secondary Containment Aboveground Tank for Flammable Liquids."

3.0 Product Description

- 3.1 Only new material shall be used in the manufacturing process, and the manufacturer shall ensure that the material used meets all appropriate specifications and quality assurance requirements.
- 3.2 Nominal capacity of the Double Bulkhead tanks are listed below
- 3.3 Two hour fire rated, ballistics, impact and steam hose certified.
- 3.4 Minimal material thickness of the tank(s) shall be per UL-142 requirements.
- 3.5 Minimum annular space insulation thickness material to be 3" with only UL-2085 listed insulation material.
- 3.6 Internal Load: Tank shall be able to withstand an air pressure test of 3 to 5 psi.
- 3.7 Tank shall be designed to support accessory equipment such as ladders, pumps, floating suction, etc. when installed according to manufacturer's instructions and limitations.
- 3.8 Tank(s) shall be provided with suitably designed and located lifting lugs which have a 2:1 safety factor.
- 3.9 NO Catwalk installed but available at a future time.
- 3.10 Tank(s) shall be capable of storing liquids with a specific gravity up to 1.0.
- 3.11 Tank(s) is designed for operation at atmospheric pressure only. Both inner and outer tanks shall have openings of sufficient size to meet normal and emergency venting requirements stated in U.L. 142, UFC and NFPA.
- 3.12 Tank(s) shall be capable of storing gasoline and diesel fuel at ambient temperatures.
- 3.13 Tank shall be constructed with butt welded or offset joint construction. Lap welded seams will not be accepted.
- 3.14 Certification Plate: Underwriters Laboratories label "Insulated Secondary Containment Aboveground Tank for Flammable Liquids." shall be affixed to each tank.
- 3.15 Approved flexible connectors at all flanged connections.
- 3.16 All threaded fittings shall be of a material of construction consistent with the requirements of the Underwriters Laboratories. All fittings shall be protected using threaded plugs or suitable closure caps.

- 3.17 All flanged nozzles shall be of a material of construction consistent with the requirements of the Underwriters Laboratories. All nozzles shall be protected using suitable closure caps.
- 3.18 Manways shall conform to Underwriters Laboratories 142 standard with regard to construction, bolting and gaskets.
- 3.19 Design of the steel supports shall be per approved UL listing and be able to support the weight of the tank filled to capacity.
- 3.20 Two Gasboy or approved equivalent single hose, single product 18-22 GPM dispensers will be installed on one end under rainhood (Gas/Diesel).
- 3.21 Two ¾ HP FE Petro or approved equivalent submersible pumps.
- 3.22 Simplex dual product remote fill (Gas/Diesel).
- 3.23 Separate Morrison Brothers or approved equivalent overfill valves for each compartment.
- 3.24 Separate Morrison Brothers or approved equivalent clock gauges for each compartment.
- 3.25 Three 8" Morrison Brothers or approved equivalent emergency vents.
- 3.26 One 5' rainhoods.
- 3.27 One 5'x5' Dispenser Pans.
- 3.28 All welded or flanged steel pipe.
- 3.29 Proper valves and fittings for above listed equipment for a complete system.
- 3.30 Product identification and warning labels.
- 3.31 Color – off white or almond.
- 3.32 One end of tank needs to have accessibility for stick measuring

4.0 Delivery

- 4.1 Must be delivered. Deliveries locations varies from Kittery Maine to Madawaskas Maine. MDOT will be responsible for providing equipment to remove tanks for trailers.
- 4.2 Vendor must notify MaineDot two weeks prior to delivery of delivery date.

5.0 Air Tank Test

- 5.1 The primary and secondary tanks shall successfully complete an air pressure test prior to installation. While maintaining pressure of 3-5 psig on the primary tank, the annular space bounded by the primary and secondary containment tank shall be pressurized to 1 1/2 to 3 psig. The secondary tank shall then be checked for tightness. **Tested on delivery**

6.0 Tank Options: Priced Separately

On a separate document list any optional equipment and their corresponding prices not listed in these specifications.

- 6.1 Veeder-Root TLS-350 Automatic Tank Gauge system and compatible remote fuel management software required to operate offsite or approved equivalent to be installed.
- 6.2 Veeder-Root TLS4C Automatic Tank Gauge system and compatible remote fuel management software required to operate offsite or approved equivalent to be installed.
- 6.3 A Catwalk that is capable of being installed later.

7.0 Dual Compartment AST Tanks: Priced Separately

- 7.1 4000 Gal / 4000 Gal
- 7.2 6000 Gal / 6000 Gal
- 7.3 4000 Gal / 8000 Gal

8.0 Warranty

- 8.1 Terms and conditions of warranty must be provided with bid proposal.
- 8.2 Terms and conditions of warranty must be provided with bid proposal (Warranty must be clearly defined and all components covered must be clearly listed and identified).
- 8.3 Vendor shall be (100%) responsible for all repair costs to include parts, labor during the warranty period.

- This bid and the pricing structure contained herein will remain firm for a period of 180 days from the date and time of the bid opening.
- No personnel currently employed by the Department or any other State agency participated, either directly or indirectly, in any activities relating to the preparation of the Bidder's proposal.
- No attempt has been made or will be made by the Bidder to induce any other person or firm to submit or not to submit a proposal.
- The undersigned is authorized to enter into contractual obligations on behalf of the above-named organization.

Debarment, Performance, and Non-Collusion Certification

By signing this document I certify to the best of my knowledge and belief that the aforementioned organization, its principals, and any subcontractors named in this proposal:

- a. Are not presently debarred, suspended, proposed for debarment, and declared ineligible or voluntarily excluded from bidding or working on contracts issued by any governmental agency.
- b. Have not within three years of submitting the proposal for this contract been convicted of or had a civil judgment rendered against them for:
 - i. fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a federal, state or local government transaction or contract.
 - ii. violating Federal or State antitrust statutes or committing embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;
 - iii. are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State or Local) with commission of any of the offenses enumerated in paragraph (b) of this certification; and
 - iv. have not within a three (3) year period preceding this proposal had one or more federal, state or local government transactions terminated for cause or default.
- c. Have not entered into a prior understanding, agreement, or connection with any corporation, firm, or person submitting a response for the same materials, supplies, equipment, or services and this proposal is in all respects fair and without collusion or fraud. The above mentioned entities understand and agree that collusive bidding is a violation of state and federal law and can result in fines, prison sentences, and civil damage awards.

- **Failure to provide this certification may result in the disqualification of the Bidder's proposal, at the discretion of the Department.**

To the best of my knowledge all information provided in the enclosed proposal, both programmatic and financial, is complete and accurate at the time of submission.

State of Maine Tank Bid Summary

Exceptions to this bid:

5.0 Air Tank Test

Will not be performed by distribution. Must be performed by licensed tank installer.

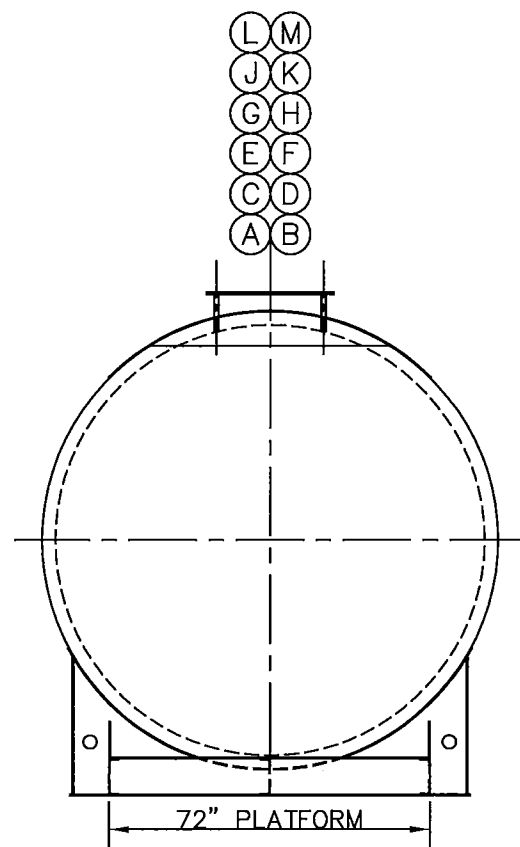

State of Maine Bid “Warranty”

WARRANTY: The Seller warrants all new equipment, if installed and operated in a proper manner, against defects in workmanship and material for 12 months from the date of shipment. Warranties and liabilities shall be limited to the Buyer, and shall not extend to the Buyer's vendees. The Seller's liability will not extend beyond the description on the face hereof. In no event shall the Seller's liability exceed the purchase price of the equipment. Damage caused by chemical reaction, electrolytic action or foreign materials are to be assumed by the Buyer, and in no way are they to be considered part of the warranty.

Upon notice of any defect by the Buyer, and confirmation by the Seller, the Seller shall have the right to furnish all material, and/or perform all labor, required for the correction of any errors or omissions on the part of the Seller, and no charge will be allowed for any material furnished or labor performed by the Purchaser, or others, unless the Seller is given sufficient written notice and a written order is issued by the Seller for such material and/or labor.

SYSTEMS TECHNOLOGY...
The Modern Way.

The Answers to your fueling systems needs.

Whether fueling heavy equipment, over-the-road tractor trailers, lawnmowers, or golf carts, Modern Welding Company has the fuel dispensing system for your application. For over seventy years, Modern Welding Company has been the industry leader in manufacturing UL Listed underground and aboveground storage tanks. Modern Welding Company has nine manufacturing subsidiaries located coast to coast, offering regional service at competitive prices. Visit our website at www.modweldco.com for a complete list of our products and facilities. You can even "Request a Quote" online.

Modern's Aboveground Systems Technology (AST) consists of any of the following UL Listed aboveground storage tanks:

Single Wall Construction

- ✓ UL-142 Horizontal Tank
- ✓ Vertical Configurations
- ✓ Rectangular Configurations

Double Wall Construction

- ✓ UL-142 Horizontal Tank
- ✓ Vertical Configurations
- ✓ Rectangular Configurations
- ✓ STI's F-921/Flameshield Configurations
- ✓ Fireguard®, 2 Hour "Fire Rated" Configuration
- ✓ Modern "IOC", Integrated Overflow Protection Tank
- ✓ SuperVault™ MH, 4 Hour "Fire Rated", Multi Hazard Tank

The Professionals...
Modern Welding Company
The Smart Fueling Choice.

Dispensing Diesel Fuel With 20,000 Gallon Fireguard Tank

Industrial Applications

Terminal Fueling

Fuel Dispensing Configurations to meet Your Requirements

Agricultural Applications

Ethanol Fuels

The Steel Tank Institute has researched compatibility issues concerning the storage of ethanol based fuels. Shop fabricated "Steel" underground and aboveground storage tanks, when used for the storage of ethanol based fuels, has exhibited no long term detrimental structural or permeation issues. As with all fuels, STI recommends that tank owners implement a maintenance program for all tanks and associated equipment, including monitoring and removing water that may accumulate within the tank system.

Modern's ASTs offer the components.

- ✓ Listed tank
- ✓ Manway (as required)
- ✓ Normal vent
- ✓ Emergency vents
- ✓ Spill container
- ✓ Locking fill cap
- ✓ Fill pipe adapter
- ✓ Level gauge
- ✓ Interstitial leak detector†
- ✓ Drop tube
- ✓ Overfill valve
- ✓ Overfill alarm
- ✓ Block valve
- ✓ Anti-siphon valve
- ✓ Pressure relief
- ✓ Piping & fittings
- ✓ Dispensers
- ✓ Breakaway
- ✓ Automatic nozzles
- ✓ Hose
- ✓ Dispenser mount
- ✓ Impact valve
- ✓ Decals
- ✓ O&M manual
- ✓ Pumps

Plus a wide variety of options to meet your specific needs.

- ✓ Stairs
- ✓ Filters
- ✓ Stage I or II accessories
- ✓ Swivel
- ✓ Card reader
- ✓ Rain Shields
- ✓ Plus many more

† Only applicable on doublewall tanks.

Modern's AST 40

With a fueling rate of up to 40 GPM*, Modern's AST-40 provides convenience for large fleets, marinas, fueling of heavy equipment, and even retail sales where allowed by local authorities. Modern's AST 40 is the answer for almost any high volume fuel application.

Modern's AST 20

Modern's AST 20 offers fueling at a rate up to 20 GPM* for small fleets, municipal garages, school bus facilities, motor sport venues, etc.

Modern's AST 10

Modern's AST 10 small units are designed to deliver up to 10 GPM*. The AST 10 is ideal for golf courses, fork lift fueling and other lower volume yard applications. This basic package represents the most economical way to do your fueling.

* Gallons per minute ratings based on gasoline service
