Re: Scoping Document 2 Not Warranted

To the Parties Addressed:

On November 19, 2019, we issued Scoping Document 1 (SD1) for the Rumford Falls Hydroelectric Project. We provided interested agencies, non-government organizations and the public the opportunity to help identify the scope of issues to be addressed in the Environmental Assessment. We said that we would incorporate any comments into a second scoping document (SD2), if warranted.

While we received several comments during the scoping process, they do not affect the content of SD1. Therefore, we will use SD1 to prepare the Environmental Assessment and not issue SD2.

Any questions about the scoping process should be directed to Ryan Hansen at ryan.hansen@ferc.gov or at (202) 502-8074.

Sincerely,

David Turner, Chief
Northwest Branch
Division of Hydropower Licensing
