GREEN LAKE PROJECT

P-7189

PROJECT BOUNDARY MAP

SUBMITTED: SEPTEMBER 12, 2022

The GIS files that were submitted earlier were incomplete. The transmission line was missing from the map. The transmission line is now included and a new set of GIS files are included with this filing.

During this work the project boundary data were re-evaluated and checked. Using the complete and latest GIS data, the project boundary is understood to have a total area of 3315 acres. This is composed of 3312 acres of impoundment, 0.4 acres of land owned by Green Lake Water Power Company, and 2.3 acres of US Fish and Wildlife Service land.
