Jami and Jay - The attached photos, taken Sunday and Monday, May 24-25, at the site of the proposed installation, appear to show staging activity within 75 feet of high tide and commencement of construction within the NRPA-regulated area. All may be in order, but the gathering of these previously-manufactured and assembled component parts of the dock system on the shore and in the river prior to this Friday's formal presentation and public hearing and, of course, to the issuance of any local permit raise legal questions pertinent to your permits that I cannot answer. Again, all may be in order, Has the applicant now completed all required conditions on your end? Thank you -- Bill
