This rule from a mechanical standpoint makes no sense. Maine is very rural, the control that it gives the government is off the map. Environment wise lithium is not clean to mine and the overall no pollution from the car is a joke, it just gets produced somewhere else. Just like these solar farms that are destroying our state not to mention the wind turbines, what a joke, they all have limits. Full electric for all cars is crazy and to mandate this ridiculous ideas is so unconstitutional. No government has the right to tell you what you can and can't have believe and do.
