to all who think you can demand we all buy an electric vehicle,
kiss my butt. Who do you think you are ? We are free to make up our own minds about what we buy with our money. these E.V. vehicles cost more than just the price to buy them. and YOU ALL KNOW IT ! Protera out in CALIFORNIA is already going bankrupt because of their faulty products all over the country. The minerals mined from the earth costing millions of dollars, using thousands of gallons of diesel fuel running in heavy equipment , but ooo no, you can't run it in a vehicle. too much carbon... What a crock. We live on carbon and so do the trees and plants you fools! strip mining ,destroying the planet to build these expensive batteries, that cannot be recycled, buy really what is recycled today anyway... hence why the ocean is now full of plastic ! and they are extremely explosive and burn for days blowing off toxic chemicals that probably more than likely will harm our firemen and women by breathing the crap, wasting hundreds of gallons of water to put them out if not having to use chemicals to put them out. more than likely slave labor and children in factories in china or africa being forced to make them . and in the factories run by more "fossil fuel" that you profess to hate . fossil fuels have brought more people out of poverty than anything in this world. and while you can close your eyes because it happens in a country that you cannot see, your idiotic ideas are doing nothing but hurting everyone in our country. Tell me how many of you actually OWN ONE !? There was not one , not a single E.V. in the parking lot in Augusta the other day. you're nothing but a bunch of lying hippocrates . read the state of maine constitution , then read the constitution of the united states of america. go pound sand.
