Subject: EV vs Gas power vehicles

Hi,

I am against how fast the public are being pushed to purchase and use EV vehicles. They use too much electricity when we need it for other things. They are not good for long distances. They are known to catch fire and fire departments are not equipped to put out electrical fires.

Battery technology has not reached a point of being safe and effective. It costs a lot of money to make batteries. EV vehicles are too expensive, batteries are too expensive.

I could go on and on about why this is a bad idea. Politicians should be making decisions that support people, not make life harder.

Stop the nonsense about EVs. Look at Hybrid cars..... they use less gas and they are self-charging..... why is no one talking about Hybrid cars?

Regards,

Louise Jones
