These vehicles are death traps, they don't run or charge well in the winter. They use the same power source for heat and wipers in the cold weather, so they lose power due to the cold, since the batteries lose power under 32° F, and the need for heat and wipers and lights at night in cold weather! They spontaneously explode into fire, that lasts for hours, they pollute with poisonous gas when they burn, they contaminate up to ten thousand gallons of water when they burn, they can poison fire fighters with Cobalt when they fight these fires. And they can spontaneously reignite days later!! Need I say more!??? This is a deadly pot pipe dream!!! Don't even think about doing this!!!! This will be a deadly disaster!!!!

Congressional hearing...the electric grid .mp4

4 MB

They spontaneously combust into hours long fires, even days after being put out!! They pollute with poisonous gas for hours when they burn, they pollute thousands of gallons of water when fires are put out, and they can give firefighters Cobalt poisoning!!! This would be an unnecessary disaster!!! Even congressional Testimony concurs!!!
