

## EV FAILURES

These EVs are not ready for prime time. You have not studied them enough to give any more than a rudimentary explanation as to why these would be good for Maine. Have you ever tried to put five gallons of electricity in a can?? If you get stranded with no power, you have no way to get out. With your hybrid you could. But they're asking for Straight EVs, and that is multiple disasters waiting to happen!! I have a minimum of 10,000 field hours on the job, and have been working in the field in general for over 50 years. I wired up my parent's new garage in 1974, when I was 16, from the fuse box out! And I also studied law and you have not demonstrated enough knowledge even about the field of electricity to me to justify what is being proposed here. You need to back up and rethink this before you get us into a real mess!! And copying a failed state like California is a fool's errand!! They are already telling people not to charge them during peak hours, as well as an air conditioning advisory!! Would you go to a doctor who was that ill prepared??? I guess you better not!!! If you can't charge these, you can't drive them!! PERIOD!!! I WOULD NEVER BUY ONE OF THESE GLORIFIED GOLF CARTS!!!! EVER!!!!

Message: I studied house wiring in shop class, electronics PRVTC in Portland, Maine in high school, house wiring in Job Corps, and hobbyed in electronics starting in 1969, when I was 11, when I was already studying electronics at home before I even went to high school by books I bought at Radio Shack. I designed and installed a 4 function telephone phone bugging system in my parents house in 1969, and wired up our new garage th we all built ourselves, in 1974, when I was 16. I used the same basic design in the system that I used on the state police case. As well as house wiring in Job Corps, and have 10,000 field hour the general field of electrical and electronics. Ar you could not pay me to own one of these glori golf carts!! Electric heat is a huge draw, so drivr these things any distance in the winter would b break down nightmare. Your mileage is cut by 1 to 2/3 while towing, and then more if you run t heat and lights!! Its a cute toy, and nothing mor And these 22 videos will prove that!! Robert Pelletier |
