My name is Sally Vose, I live in Bath and I live on a fixed income, which means that I will never be able to afford an electric vehicle. I would never buy anything that is mandated by the government.

The consideration for the state to put California standards on our vehicles is not only another nail in our coffin by this out of control governor but will bankrupt most of Maine's average citizens. We cannot afford to go down this road, we cannot comprehend why you would even consider this bankrupting move, nor can you justify this terrible move.

You need to return the state to we the people and read our State Constitution and adhere to it as well. The governor was elected to protect and defend our state, not destroy it by pandering to left leaning climate change ideologues who think they know what is best for our state.
