Update for 2021-2022 (5S2 Perkins)
Credit Bearing Data Collection.

The Helpdesk has informed MDOE-CTE the 5S2 Credit Bearing upload is not functioning as expected. Because of this, we have decided to lessen the burden for schools.
For school year 2021-2022, if a student has taken multiple courses, we only need one (1) course to be enter per student to satisfy the reporting requirements for your school.

For example:
- Student took 3 courses with postsecondary institutions, only need to report (1) of the courses
  We don't need one entry per institution, only one entry per student.
- Only courses associated with CIPs (01.0000) Agriculture thru (52.1910) Hospitality need to be reported.

Course ID has been added to the Credit Bearing Data Synergy screen. Please enter in the Course ID as provided by the institution the student is attending.

The Course ID can be a combination of numbers and letters without any spaces.
If the Course ID provided by the institution is longer than the textbox, add as much as you're able to.
You may skip over the Credit Type because its no longer required.

Synergy Screen example

We hope to have the system fully functioning for the next school year.
