These photos just came in. Shouldn't be any hunters out there now. Could it be officers?

Good morning detective Philippon,

Attached are some game Cam Photos that came from the [REDACTED]  
[REDACTED] in Lisbon last evening.

One photo is from last night and another is from a few weeks back for comparison. Initially I didn't see anything on the photo from last night, but once the HD version came in it appears there is a figure (or object, hard to tell) in the distance. I circled the area in the third photo for your reference. Lastly, I have included a daytime photo from yesterday that appears blank, but will provide a frame of reference.

These pics are from a Spypoint Link Micro cellular game camera. The photos aren't very clear, but I believe there are better resolution images stored on the SD card of the camera. Let me know if you'd like to retrieve the card [REDACTED]

Thanks to you and all of our officers and first responders for your efforts.

I, [Redacted] as owner or authorized user, do hereby give my consent and permission for the item(s) described below to be searched by law enforcement officer Lisbon Police Det. Richard St. Amant, or by any law enforcement officer trained in the forensic examination of electronic devices or civilian employee assigned to the Maine State Police Computer Crimes Unit. A Search, which may include a complete forensic examination.

I hereby state that I possess the authority to allow law enforcement officers to search the item(s) described below.

I have been advised of and understand my Constitutional right to refuse to give my consent to search the items described below. I also understand that I can revoke my consent at any time.

I give my consent to this search voluntarily and as an act of my own free will, and not because of any inducement, threats or promises. I further state that no inducements, threats or promises have been made that would compel me to sign this consent form.

I understand that any files, images, documents, or other evidence discovered pursuant to a search of the item(s) described below may be used as evidence in a court of law and as such may be discoverable by parties to any action as a result. A forensic examination may include copying all of the data on the device and retention of that material.

I understand that, unless explicitly stated below, I am authorizing a complete search of the item(s) without limitation using acceptable forensic techniques.

Items to be searched (describe and include identifying characteristics such as serial numbers) and information to be searched for (evidence sought).

# AT&T Records Key

AT&T searches all available databases to ensure all responsive records are provided. Multiple reports may be provided in response to your request.

**Note: Blank fields or “-1” do not indicate an issue with the record. It simply means the information was not passed from the network to the CDR System.**

## AT&T Mobility Voice Descriptions

Column/Field Name	Description
Item	Row Number. This denotes a leg of a call or transaction. A leg of a call represents each time the call is processed through a network switch. Calls may go through several switches in AT&T's network in order to reach the intended party.
Conn.Date	Connection Date. The date of the call.
Conn.Time(UTC)	Connection Time. The time the call was connected. Time is in UTC. Times is expressed in military time as HH:MM:SS.
Conn Date Time	Connection date and time- Date and Time the call was connected. Displayed as one column on the Landline Call Detail Records.
SeizureTime	The number of seconds it took to travel through our systems before the call connected.
ET (Elapsed Time)	Duration of the transaction. Duration is in MM:SS

AT&T Proprietary

The information contained here is for use by authorized persons only and is not for general distribution.

**Originating Number**

The phone number the call/text originated from. For data records, this does not necessarily mean the number originated the data transaction. The network constantly communicates with internet enabled devices and the data records do not indicate if a customer initiated a data transaction. Some abbreviations are found after a number using (). They are defined as follows:

**Dialed (D)**- The number that the originating party dialed. Appears in subsequent line of the same row in the Originating Number column. (Note: only appears if the Terminating number differs from the Dialed number)

**Special Dialing Characters- A = \*, B = #** Appears as part of Dialed Number (D) Digits.

**FORWARDED (F)**- The number the terminated number forwarded the call to. Appears in subsequent line of the same row in the Originating Number column.

**ORIGINAL ORIGINATING (OO)**- Denotes the number that originated the call before call forwarding was invoked. Appears in subsequent line of the same row in the Originating Number column.

**TRANSLATED (T)**- Indicates if a number was translated to a different number. For example, if the number called is 911, then that gets translated to a ten-digit number for routing to a 911 dispatch center. The (T) indicates the number the translation was from, not the number translated to.

**Terminating Number**

The number the transaction terminated to.

<b>IMEI International Mobile Equipment Identifier</b>	<p>Can be 15 or 16 digits. A 15-digit number that uniquely identifies an individual wireless device. The first 14 digits are unique. The 15<sup>th</sup> digit is a check digit that validates the prior 14 digits.</p> <p>A 16 digit IMEI is an "IMEI(SV)." SV Stands for software version number. The last two digits identify the software version.</p> <p>Only the IMEI of the number requested is displayed.</p>
<b>IMSI International Mobile Subscriber Identity</b>	<p>This is a unique 15-digit identifier given to each mobile subscriber and is stored on the Subscriber Identity Module(SIM). The IMSI consists of a MCC (Mobile Country Code), a MNC (Mobile Network Code) and a MSIN (Mobile Station Identification Number):</p> <ul style="list-style-type: none"> <li>• 3-digit MCC ties the SIM to a specific country</li> <li>• 3-digit MNC ties the SIM to a specific network within that country</li> <li>• 9-digit MSIN ties the SIM to a specific customer</li> </ul>
<b>CT (Call Type)</b>	<p>Denotes if the leg of a call is an originating leg or terminating leg.</p> <p>Mobile Originating (MO) Mobile Terminating (MT) Service Originating (SO) Service Terminating (ST)</p> <p><b>A service record is generated when the network generates a leg of a call to reach a service on the network. For example, a leg connecting to the voicemail platform denotes a service invoked on the network and may show up as a service record.</b></p> <p>See "Item" at beginning of the table for definition of a leg of a call.</p>
<b>Feature</b>	<p>This column represents the type of call that occurred as recorded by our network and used for purposes of processing a call on AT&amp;T's network. These are not necessarily indicative of features on a customer's account or the types of services subscribed to.</p>

## Cell Location

### Identifiers:

3G Network cell Site= LAC/CID      4G Network Cell Site= ECGI

### Examples:

3G Network Cell Site [27077/11621:-80.05629;26.74779;350;90.0;89]

LAC/CID      LONG:LAT      Sector:Beamwidth:Time on Tower

4G Network Cell Site [133151247;520122;-96.912452;33.013937;358;-1.0;28]

ECGI:ENB-ID      LONG:LAT      Sector:Beamwidth:Time on Tower

### Definitions:

LAC - Location Area Code. This number identifies the specific region a cell tower is located in. The number is used internally in AT&T for network purposes.

CID - Cell Identity. This number identifies the location of the tower within a specified region. The number is used internally in AT&T for network purposes.

ECGI - Enhanced cell global identity. A nine digit number that indicates the location of a cell tower when 4G technology is being used. The number is used internally in AT&T for network purposes.

ENB-ID - Evolved Node B (eNodeB) Hardware connected to the AT&T mobility network that communicates directly with a mobile device. This number is used internally to AT&T to identify a specific antenna on a tower when 4G technology is used.

Longitude - A geographic coordinate that specifies an East-West Position of a point on the earth's surface. The Latitude represented is of the cell tower.

Latitude - A geographic coordinate that specifies a North-South Position of a point on the earth's surface. The Longitude represented is of the cell tower.

Sector - A number out of 360 degrees that indicates the side of the cell site antenna used in processing the call.

Beamwidth - A number out of the 360 degrees that specifies the angle of coverage of the RF signal coming from a particular cell site sector.

Time on Tower - If applicable, shows the amount of time (in seconds) the device spent on each cell tower involved in the transaction.

**AT&T Mobility Common Scenarios**

Scenario	Description
<b>Many or all Zero Duration Calls</b>	Voice usage reports showing all calls with zero durations in the Elapsed Time "ET" column indicate calls that were not connected. Numbers such as this are commonly used for routing purposes if there is no associated subscriber.
<b>Report Differences</b>	<p>Because calls can traverse many networks, AT&amp;T provides records of all calls that traverse its wireline, wireless and international gateways.</p> <p>ReportAU- Calls that traverse the mobility network.</p> <p>ReportLandline- Calls that traverse the wireline and Voip network.</p> <p>ReportICDR--Calls that traverse AT&amp;T's international gateway.</p> <p>ReportSTIR – Calls that have gone through attestation process to authenticate Caller ID.</p> <p>A call may show up on one or more report however AT&amp;T has no ability to definitively state or correlate calls as being the same transaction. You may infer any conclusions based on your own analysis of the records.</p>
<b>ET 60:00- Data Usage</b>	Data records have a maximum limit of 60 minutes in the CDR record system. Another record is created when a continuous data session exceeds the 60 minute limit.

**AT&T Timing Advance Descriptions**

Column/Field Name	Description
<b>Timing Advance</b>	A network measurement of the time it takes for a signal to travel from the tower to the device and back. The Timing Advance value is a unitless integer. Multiply this value by 78.07 to get the distance from the Tower in Meters.

AT&T Proprietary

The information contained here is for use by authorized persons only and is not for general distribution.

<b>Cell ID</b>	Cell Identity. This number identifies the location of the tower within a specified region. The number is used internally in AT&T for network purposes.
<b>Sector/Beamwidth</b>	Sector - A number out of 360 degrees that indicates the side of the cell site antenna used in processing the call. Beamwidth - A number out of the 360 degrees that specifies the angle of coverage of the RF signal coming from a particular cell site sector.

### Feature Definitions for Mobility Voice Report

Features represents the type of call that occurred as recorded by our network and used for purposes of processing a call on AT&Ts network. These are not necessarily indicative of features on a customer's account or the types of services subscribed to.

AT&T Mobility SMS Descriptions

Column Name	Description
<b>Originating Number</b>	Number that originated the SMS
<b>Terminating Number</b>	Number that received the SMS
<b>Description</b>	If known, describes the direction of the SMS SMSO (SMS originating) SMST (SMS terminating)
<b>IMEI International Mobile Equipment Identifier</b>	Can be 15 or 16 digits. A 15-digit number that uniquely identifies an individual wireless device. The first 14 digits are unique. The 15th digit is a check digit that validates the prior 14 digits. A 16 digit IMEI is an "IMEI(SV)." SV Stands for software version number. The last two digits identify the software version. Only the IMEI of the number requested is displayed.
<b>IMSI International Mobile Subscriber Identity</b>	This is a unique 15-digit identifier given to each mobile subscriber and is stored on the Subscriber Identity Module (SIM). The IMSI consists of a MCC (Mobile Country Code), a MNC (Mobile Network Code) and a MSIN (Mobile Station Identification Number): <ul style="list-style-type: none"> <li>• 3-digit MCC ties the SIM to a specific country</li> <li>• 3-digit MNC ties the SIM to a specific network within that country</li> <li>• 9-digit MSIN ties the SIM to a specific customer</li> </ul>
<b>MMS Type</b>	Mobile Multimedia Service (MMS) Message Type indicates the types of media embedded in the MMS Message. Values include: Text, Image, Audio or Video. There can be more than one value in the same message. If this field is blank, it is an SMS.

### AT&T Wi-Fi Data Descriptions

This report signifies data transactions where the customer is connected to Wi-Fi using AT&T VPN service.

Column Name	Description
Bytes Up	Number of bytes sent from the wireless handset to the cell site.
Bytes Dn	Number of bytes sent from the cell site to the wireless handset.
Originating Number	Number of the device making the data connection.  For data records, the Originating Number does not necessarily mean the number originated the data transaction. The network constantly communicates with internet enabled devices and the data records do not indicate if a customer initiated a data transaction.

Attest Type	<p>A - Full Attestation</p> <ul style="list-style-type: none"> <li>• Is responsible for the origination of the call onto the IP-based service provider voice network.</li> <li>• Has a direct authenticated relationship with the customer and can identify the customer.</li> <li>• Has established a verified association with the telephone number used for the call.</li> </ul> <p>B - Partial Attestation</p> <ul style="list-style-type: none"> <li>• Is responsible for the origination of the call onto the IP-based service provider voice network.</li> <li>• Has a direct authenticated relationship with the customer and can identify the customer.</li> <li>• Has NOT established a verified association with the telephone number being used for the call.</li> </ul> <p>C - Gateway Attestation</p> <ul style="list-style-type: none"> <li>• Has no relationship with the initiator of the call (e.g., international gateways).</li> </ul>
Ver_Orig	Originating TN that was used to validate Caller ID.
Ver_Term	Terminating TN that was used to validate Caller ID.

### AT&T Wireline Descriptions

Column Name	Description
Sec. Orig	Secondary Originating Number. A secondary number associated with the call transaction. This number can either be a wireline or mobility number. As an example, if it is a non-mobility number, this could be a number that sits behind a customer's internal phone network such as a PBX. There are other numerous situations when secondary originating numbers are part of a call transaction.
CIC	Carrier Identification Code. The number in this column translates to identifying the interexchange carrier of the call. A public listing of CIC codes can be found at the following url: <a href="http://www.nanpa.com/reports/reports_cic.html">http://www.nanpa.com/reports/reports_cic.html</a>
Call Code	Represents the type of call that was processed on the wireline network.
Orig . Acc.	Originating Access ID. When a call is received from another carrier and traverses AT&T's VoIP network. This number translates to what carrier sent AT&T the call.

AT&T Proprietary

The information contained here is for use by authorized persons only and is not for general distribution.

AT&T Wireline Common Call Code Descriptions

Call Code Number	Call Code Name	Description
47	Default AIN Call Type Code	Default call code indicating that some Advanced Intelligent Network (AIN) feature was requested or utilized.
343	Terminating Access Verification	This call code is used to either bill or validate a billing transaction where a call traversed more than one carrier's network.
808	VoIP Default	Originating customer paid AT&T VoIP call.
342	Originating Access Verification	This call code is used to either bill or validate a billing transaction where a call traversed more than one carrier's network.
325	MEGACOM 800	A direct-connect service for customers who receive high volumes of calls of long duration. Usually associated with a business.
60	AT&T Station Paid	Long Distance call where the originating number is also the billing responsible party.
119	Terminating Access	This call type code provides details for a call that enters the terminating exchange from an Interexchange Carrier (IC).
720	Connecting Network Access	Call received over connecting network access incoming trunk.
306	CMC Toll Switch Application	Cellular Mobile Carrier (CMC) Toll switch
100	Direct Services Dialing Capability (DSDC)	This call code indicates that the serving office (Switch) utilized call processing capabilities of another office for some or all of the call. Also known as Service Assist.
129	Basic SDN Call	Generally, this indicates some type of AIN (Advanced Intelligent Network) feature was used or requested, including call features or routing.
141	IEC Number Service Call	This call type code provides details for toll-free calls that are transported by an Interexchange Carrier (IC).
360	OSO Recording/HICAP	Originating Screening Office (OSO) national 800 number database (NCP) dip records.

AT&T Proprietary

The information contained here is for use by authorized persons only and is not for general distribution.

110	Inter-LATA Station Paid	This call type code is generated for direct-dialed, station-paid internetwork calls routed by means of an interexchange carrier.
337	ISDN CPN/BN to Terminating End	Integrated Services Digital Network (ISDN) customer voice or data session.
98	Collector tracer	This Call Type Code is used in all audit (tracer) records generated by an Automatic Message Accounting Teleprocessing System (AMATPS) collector.
309	MEGACOM	An interstate service that permits outward calling from designated AT&T serving offices to stations throughout the US.
364	Readyline	An inbound Toll Free call service terminating on an existing local POTS line.
134	Feature Group B Originating LATA	This call type code provides details for Feature Group B originating calls (AIN, InterLATA and fg B - Originating).
806	VoiceTone	This service provides interactive IVR, toll free and contact center services.

AIN - Advanced Intelligent Network: SS7 Signaling based enhanced features, including, but not limited to: Local Number Portability (LNP), Toll Free calling, Prepaid calling services, Reverse Charging, VPN, Call Screening, Private number plans, location based.

AT&T Proprietary

The information contained here is for use by authorized persons only and is not for general distribution.

### AT&T International Descriptions

ColumnName	Description
<b>OrigCountry</b>	The country the call originated from based on the NPA-NXX of the party that placed the call.
<b>DialCountry</b>	The country of the number dialed based on the NPA-NXX of the dialed number.
<b>InCountry</b>	Inbound Country. The country AT&T terminated the call to. This does not necessarily mean the called party is in the listed country. This represents the country that AT&T directed the call to in order to properly route the call to its final destination. Other carriers may pick up the call after the call has left the AT&T network.
<b>OutCountry</b>	Outbound Country. The country AT&T routed the call from. This does not necessarily mean the call originated from the listed country. This represents the country AT&T's network was used in to properly route the call to its final destination.
<b>AnsInd</b>	Indicates if the call was answered.
<b>FromCPN</b>	From Calling Party Number. Indicates if the call originated from the Originating Number.

### Self-Care

Here are some tips for taking care of yourself from Psychological First Aid:

- **Maintain a healthy routine:**
  - o Exercise regularly.
  - o Eat a balanced diet.
  - o Drink sufficient water.
- **Know your limits:**
  - o If you feel particularly troubled by a case or client, consult your supervisor, and please hand it off.
  - o Maintain hope.
  - o Believe in something with strong meaning for you, whether family, religion, country, or ideal.
- **Reflect:**
  - o How have you managed stress before?
  - o Focus on your personal stress reactions and preferred coping mechanisms.
- **Rest sufficiently:**
  - o Take regular breaks and take long slow breaths if you feel yourself begin to get overwhelmed.
  - o Leave when your shift is done.
  - o Get some rest to be able to be effective on your next shift.
  - o Stay connected to your support system.

### Incident Priorities and Objectives

Incident Priorities:

1. Staff Safety and Wellbeing
2. Operations
3. External Relations

Incident Objectives:

#	Description
1.1	Ensure all client-facing RC staff are not wearing red clothing (including RC vests), while providing black lanyards and gray t-shirts to the workforce.
1.2	Prioritize staff wellness related to an optimal work schedule, with supervisors proactively planning and monitoring time off for staff members.
1.3	Arrange DMH teams to make wellness checks on DRO staff.
2.1	Communicate with external partners to identify scheduled and day-of events.
2.2	Coordinate with partners to provide DMH & OSC services when requested for their teams.
3.1	3 IDC teams to initiate contact and, where appropriate, casework with clients previously identified via the FAC intake form.
3.2	IDC teams will be on standby for day-of event requests
3.3	2 Mobile Care Teams will be deployed into the community.
3.4	Support partner organizations with follow up calls by IDC as requested.
