

December 10, 2020

Maine EMS has been notified that there is an issue with the release from Image Trend today to the MEFIRS run reporting system. They have identified a solution and are releasing a fix for it in the next two days. In the meantime, there is a solution you can implement to work around this issue. Please see below for the instructions:

In the interim, a workaround is to turn on the Repeat Patient Warning Banner setting. This can be found by those with admin privileges and is under your *Agency Tab* > *Configuration* > *Repeat Patients* > *Enable Repeat Patient Warning* = Yes
