Federal Railroad Administration  
1200 New Jersey Avenue, SE  
Washington, DC 20590

**RE: Support for *Driving Maine's Rural Economy through Freight Rail Efficiency* CRISI  
2024 Grant**

Dear Administrator Bose:

It is my pleasure to write today in support of the Maine Department of Transportation's (DOT) *Driving Maine's Rural Economy through Freight Rail Efficiency Project* application for a 2024 Consolidated Rail Infrastructure and Safety Improvements (CRISI) Grant.

The application outlines Maine DOT's important plans to administer needed improvements to the Eastern Maine Railway (EMR) line through Maine via the Project. Rail improvements consist of replacing worn-out and obsolete rail, crossties, and turnouts with modern and reliable rail infrastructure along 130 miles of rail line. The Project will do all of the following:

- Replace key rail infrastructure in northern and eastern Maine, improving reliability in the supply chain;
- Connect the state's forest products industry to export markets;
- Support the creation of new businesses and family-wage jobs in rural communities;
- Reduce transportation costs and greenhouse gas emissions;
- Decrease truck traffic and crashes on rural roadways; and
- Improve Maine and U.S. competitiveness in the global marketplace.

The Project also includes the rehabilitation of existing dormant track to serve the sustainable One North industrial park in the rural Town of Millinocket. Our Katahdin's One North campus, a substantially repurposed brownfield site, requires rail service to source input materials for their operations and connect tenants to national and global markets. For example, a bio-fuel producer and land-based aquaculture facility are examples of new businesses intending to locate there. Projects like this one directly support expansions of existing businesses, many of which desire rail freight service, and pave the way for new ventures that support these companies or that start unrelated distribution and manufacturing operations.

As the State Senator representing Millinocket and other areas served by NBM Railways, there is a great need to connect emerging manufacturing with existing markets, including the ports of Searsport and Portland; and it is important to support timber-related processing and manufacturing as well as other processing of locally-sourced goods.

With the implementation of this public-private partnership, we can improve existing business operations and position our region for new and sustainable industries. I respectfully request your favorable consideration of the *Driving Maine's Rural Economy through Freight Rail Efficiency Project*.

Sincerely,

A handwritten signature in black ink, appearing to read 'Harold Stewart', with a stylized flourish at the end.

Harold 'Trey' Stewart  
State Senator
